Pediatric Formulations Daniel Bar-Shalom, Klaus Rose, 2014-01-30 Until the 1990s it was generally accepted that medicines were first developed for adults and their use in children was investigated later if at all One of the main tasks of hospital pharmacies was the manufacturing of child appropriate formulations in a more or less makeshift way The first change came in 1997 with U S legislation that rewarded manufacturers to do voluntary pediatric research Ten years later the European Union passed legislation that required manufacturers to discuss all pediatric aspects including formulations with the regulatory authorities as a condition of starting the registration procedure In consequence manufacturers must now cover all age groups including the youngest ones So far pediatric formulations were more a focus for academic researchers Through the changed regulatory environment there is now a sudden high commercial demand for age appropriate formulations This book begins by highlighting the anatomical physiological and developmental differences between adults and children of different ages It goes on to review the existing technologies and attempts to draw a roadmap to better innovative formulations in particular for oral administration The regulatory clinical ethical and pharmaceutical framework is also addressed

Handbook of Parenting Marc H. Bornstein, 2005-02-16 Despite the fact that most people become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny volume 1 concerns how children influence parenting Volume 2 relates parenting to its biological roots and sets parenting in its ecological framework Volume 3 distinguishes among the cast of characters responsible for parenting and is revealing of the psychological make ups and social interests of those individuals Volume 4 describes problems of parenting as well as the promotion of positive parenting practices Written to be read and absorbed in a single sitting each chapter addresses a different but central topic in parenting and is rooted in current thinking and theory as well as classic and modern research on that topic All chapters follow a standard organization including an introduction to the chapter as a whole followed by historical considerations of the topic a discussion of central issues and theory a review of classic and modern research forecasts of future directions for theory and research and a conclusion In addition to considering their own convictions and research the chapter contributors present and broadly interpret all major points of view and central lines of inquiry

number of phenomena from early twentieth century efforts to define children and higher order primates as liminally human and the postwar cultural fascination with extraterrestrial life to anxieties over AIDS SARS and other cross species diseases In these cases the efforts to define a universal humanity create the means with which to reinforce notions of human difference and maintain human nonhuman hierarchies In foregrounding how evolving definitions of the human reflect shifting attitudes about social inequality Glick shows how the consideration of nonhuman subjectivities demands a rethinking of long held truths about biological meaning and difference
