Pioneering With Taconite:

Pioneering with Taconite Edward W. Davis, 2004-03 With humor and insight E W Davis tells the story that begins with the discovery of then valueless taconite on Minnesota's Mesabi Iron Range in 1870 and several decades of attempts to process taconite commercially Davis details the ups and downs of the exciting decades long research effort that resulted in a workable extraction method followed by frustrating attempts to form the concentrate into small pellets Finally Davis describes building the first successful commercial processing plant at Silver Bay in the 1950s and the contributions by various companies to the birth of the industry Along the way insider Davis recounts the founding of the three new northern Minnesota taconite towns Babbitt Silver Bay and Hoyt Lakes

Sustaining Lake Superior Nancy Langston, 2017-10-24 A compelling exploration of Lake Superior's conservation recovery and what it can teach us in the face of climate change Lake Superior the largest lake in the world has had a remarkable history including resource extraction and industrial exploitation that caused nearly irreversible degradation But in the past fifty years it has experienced a remarkable recovery and rebirth In this important book leading environmental historian Nancy Langston offers a rich portrait of the lake's environmental and social history asking what lessons we should take from the conservation recovery as this extraordinary lake faces new environmental threats In her insightful exploration Langston reveals hope in ecosystem resilience and the power of community advocacy noting ways Lake Superior has rebounded from the effects of deforestation and toxic waste wrought by mining and paper manufacturing Yet despite the lake's resilience threats persist Langston cautions readers regarding new mining interests and persistent toxic pollutants that are mobilizing with climate change

[Mining North America](#) John R. McNeill, George Vrtis, 2017-07-11 Over the past five hundred years North Americans have increasingly turned to mining to produce many of their basic social and cultural objects From cell phones to cars and roadways metal pots to wall tile and even talcum powder mineral intensive products have become central to modern North American life As this process has unfolded mining has also indelibly shaped the natural world and North Americans relationship with it Mountains have been honeycombed rivers poisoned and forests leveled The effects of these environmental transformations have fallen unevenly across North American societies *Mining North America* examines these developments Drawing on the work of scholars from Mexico the United States and Canada this book explores how mining has shaped North America over the last half millennium It covers an array of minerals and geographies while seeking to draw mining into the core debates that animate North American environmental history generally Taken together the authors contributions make a powerful case for the centrality of mining in forging North American environments and societies

Competition and Productivity Thomas J. Holmes, James Andrew Schmitz, 2010 Does competition spur productivity And if so how These have long been regarded as central questions in economics The extent of competition can be influenced by policy decisions so understanding how competition impacts productivity and in turn living standards is of more than academic importance To fully answer these questions of whether and how an increase in competition impacts productivity two issues must be addressed First the authors define what we mean by an increase in competition Second they attempt to understand the mechanisms through which competition impacts productivity Both issues present substantial challenges which the authors address Illustrations This is a print on demand publication it is not an original

Sail, Steam, and Diesel Eric Hirsimaki, 2024-04-01 Water transportation has played a key role in the Great Lakes region's settlement and economic growth from providing entry into the new lake states to offering cheap transportation for the goods they produced There are numerous tales surrounding the Great Lakes shipping trade but few storytellers have addressed the factors that influenced the use design and evolution of the ships that sailed the inland seas *Sail Steam and Diesel Moving Cargo on the Great Lakes* provides a comprehensive overview of the evolution of Great Lakes ships over the centuries from small birch bark canoes originally used in the region to the massive thousand footers of today The author also looks at the economics of vessel operation in the context of the expanding scope of the shipping industry which was crucial in catapulting America into becoming an industrial juggernaut The captains of industry and the sailors whose labor propelled the trade populate this account which also offers solemn acknowledgment of the high cost paid in both lost ships and lives Although they might not realize it millions of Americans have owed their livelihoods to the Great Lakes boats and this volume is an excellent way to

recognize the importance of this regional industry One Day for Democracy Mary Lou Nemanic, 2007 Just before the turn of the twentieth century immigrants from eastern and southern Europe who had settled in mining regions of Minnesota formed a subculture that combined elements of Old World traditions and American culture Their unique pluralistic version of Americanism was expressed in Fourth of July celebrations rooted in European carnival traditions that included rough games cross dressing and rowdiness In One Day for Democracy Mary Lou Nemanic traces the festive history of Independence Day from 1776 to the twentieth century The author shows how these diverse immigrant groups on the Minnesota Iron Range created their own version of the celebration the Iron Range Fourth of July As mass mediated popular culture emerged in the twentieth century Fourth of July celebrations in the Iron Range began to include such popular culture elements as beauty queens and marching bands Nemanic documents the enormous influence of these changes on this isolated region and highlights the complex interplay between popular culture and identity construction But this is not a typical story of assimilation or ethnic separation Instead One Day for Democracy reveals how more than thirty different ethnic groups who shared identities as both workers and new Americans came together in a remote mining region to create their own subculture Wpa Guide to the Minnesota Arrowhead The Federal Writers' Project, 2008-10-14 This time traveler's guide to the Minnesota Arrowhead Country is an evocative reminder of the state's history and a challenge to contemporary readers who seek to find how that past lives on in the present day Iron Will Terry S. Reynolds, Virginia P. Dawson, 2011-03-15 The history of Cleveland Cliffs a company that played a key role in iron mining development in the Lake Superior region In Iron Will Cleveland Cliffs and the Mining of Iron Ore 1847-2006 Terry S Reynolds and Virginia P Dawson tell the story of Cleveland Cliffs the only surviving independent American iron mining company now known as Cliffs Natural Resources Headquartered in Cleveland Ohio Cleveland Cliffs played a major role in the opening and development of the Lake Superior mining district and Michigan's Upper Peninsula Through Cleveland Cliffs history Reynolds and Dawson examine major transitions in the history of the American iron and steel industry from the perspective of an important raw materials supplier Reynolds and Dawson trace Cleveland Cliffs beginnings around 1850 its growth under Samuel L Mather and his son William G Mather its emergence as an important player in the growing national iron ore market and its tribulations during the Great Depression The authors explore the company's fortunes after World War II when Cleveland Cliffs developed technologies to tap into vast reserves of low grade Michigan iron ore and turned to joint ventures and strategic partnerships to raise the capital needed to implement them The authors also explain how the company became the largest independent producer of iron ore in the United States by purchasing the mining interests of its bankrupt partners during the implosion of the American steel industry in the late twentieth and early twenty first centuries Reynolds and Dawson detail Cleveland Cliffs evolving efforts to deal with labor from its early mostly immigrant workforce to its ambitious program of welfare capitalism in the early twentieth century to its struggles with organized labor after World War II Iron Will is a thorough well organized

history based on extensive archival research and interviews with company personnel This story will appeal to scholars interested in industrial or mining history business historians and those interested in Great Lakes and Michigan history

Hard Places Richard V. Francaviglia,1997-09-01 Working with the premise that there are much meaning and value in the repelling beauty of mining landscapes Richard Francaviglia identifies the visual clues that indicate an area has been mined and tells us how to read them showing the interconnections among all of America s major mining districts With a style as bold as the landscape he reads and with photographs to match he interprets the major forces that have shaped the architecture design and topography of mining areas Covering many different types of mining and mining locations he concludes that mining landscapes have come to symbolize the turmoil between what our society elects to view as two opposing forces culture and nature
