Schmidt-Lainé,2012-12-06 This volume contains invited lectures and contributed papers presented at the NATO Advanced
Research Workshop on Mathematical Modeling in Combustion and related topics held in Lyon France April 27 30 1987 This
conference was planned to fit in with the two month visit of Professor G S S Ludford to the Ecole Centrale de Lyon He kindly
agreed to chair the Scientific and Organizing Committee and actively helped to initiate the meeting His death in December
1986 is an enormous loss to the scientific community in general and in particular to the people involved in the present
enterprise The subject of mathematical modeling in combustion is too large for a single conference and the selection of topics
reflects both areas of recent research activity and areas of interest to Professor G S S Ludford to whose memory the
Advanced Workshop and this present volume are dedicated The meeting was divided into seven specialized sessions
detonation theory mathematical analysis numerical treatment of combustion problems flame theory experimental and
industrial aspects complex chemistry and turbulent combustion It brought together researchers and engineers from
University and Industry see below the closing remarks of the workshop by Prof N Peters The articles in this volume have
been judged and accepted on their scientific quality and language corrections may have been sacrificed in order to allow
