Proctor,2018-01-17 Traditional thermal and freezing processing techniques have been effective in maintaining a safe high
quality food supply However increasing energy costs and the desire to purchase environmentally responsible products have
been a stimulus for the development of alternative technologies Furthermore some products can undergo quality loss at high
temperatures or freezing which can be avoided by many alternative processing methods This second edition of Alternatives
to Conventional Food Processing provides a review of the current major technologies that reduce energy cost and reduce
environmental impact while maintaining food safety and quality New technologies have been added and relevant legal issues
have been updated Each major technology available to the food industry is discussed by leading international experts who
outline the main principles and applications of each The degree to which they are already in commercial use and
developments needed to extend their use further are addressed This updated reference will be of interest to academic and
industrial scientists and engineers across disciplines in the global food industry and in research and to those needing
information in greener or more sustainable technologies Who's who in the West ,2001 *Popular Photography* ,1991-01
