Politics Of Civil Society Building Eur:

The New Politics of European Civil Society Ulrike Liebert, Hans-Jörg Trenz, 2012-08-21 Over the past two decades civil society has played a pivotal role in Europe from the demise of Communist rule to the reunification of Europe followed by the expansion of the single market to the reconstitution of democracy in the enlarged European Union European civil society has emerged as a social space between EU governance and the citizens of the member states populated by non state agents claiming to represent speak for or participate on behalf of the most varied social constituencies in EU decision making This book consolidates European civil society research by re viewing its conceptual normative and empirical analytical foundations With contributors from political science to sociology to law it captures the evolving practices of European civil society that stretch across the national local the European and the global realm Developing an analytical framework that highlights the interplay between civil society building and polity building from above as well as from below within the legal and institutional framework of the EU they examine whether and how civil society can contribute to making democracy work in normative democratic theoretical perspectives This book will be of interest to students and scholars of civil society European politics political science and sociology

The Weakness of Civil Society in Post-Communist Europe Marc Morjé Howard, 2003-03-27 Over a decade has passed since the collapse of communism yet post communist citizens are still far less likely to join voluntary organizations than people from other countries Why do post communist citizens mistrust public organizations What explains this pattern of weak civil society And what does this mean for democracy in the region This engaging study addresses these questions with a provocative argument about the enduring impact of the communist experience on its countries and citizens Howard argues that the experience of mandatory participation in state controlled organizations and vibrant private networks during the communist period combined with the disappointment with post communist developments have left most citizens with a lasting aversion to public activities Howard analyzes the findings from over 30 democratic countries on the World Values Survey and also presents extensive and original evidence from his own research focused on Eastern Germany and Russia

Civil Society and Governance in Europe William A. Maloney, Jan W. Van Deth, 2008-01-01 The research presented in this book based on new primary data demonstrates that in terms of civil society actors adapting to the European political space the Europeanization process has an uneven development This innovative book integrates top down approaches for the study of relationships within the developing EU multilevel system i e the consequences of Europeanization for civil society at the local level and bottom up approaches i e the consequences of civil society for the process of European integration and democracy in the EU The contributors argue that exploration of these recursive linkages requires a rethinking of the relationships between local national and trans national civil society on the one hand and multi level governance on the other In analyzing the opportunities for civil society associations to contribute to European integration and decision making from various perspectives the following findings are

presented amongst others engagement with and confidence in the EU compared to national institutions is relatively weak among associational members party elites play a key gatekeeper role in the European space the EU and interest groups have had limited success in stimulating the development of citizen engagement civil society and social capital in various countries In the rapidly expanding field of research on democratic decision making in Europe this book will be welcomed by academics and scholars alike at postgraduate levels and above Experts working in the field of European decision making such as lawyers and lobbyists who are looking for conclusions based on high quality empirical research will also find much in this book to engage them

Civil Society and Activism in Europe William A. Maloney, Jan W. Van Deth, 2010-04-05 This book examines the role of civil society organizations in several advanced European democracies Germany the Netherlands Spain Switzerland and the United Kingdom Specifically the book focuses on how voluntary organizations contribute to civic and democratic health and assesses the impact of different organizational types on social capital Building on Citizenship and Involvement in European Democracies and Social Capital and Associations in Europe 2007 this volume seeks to widen and deepen the analysis by introducing new data on activists and combining it with the organizational data and the population data It evaluates the impact of the organizational context on individual activity profiles and attitudes and values of activists and provides a unique assessment on the contribution that voluntary associations make to civil and democratic society Part One deals with the consequences of associational involvement for several attitudinal and behavioural orientations and Part Two expands the scope of the effects of voluntary associations towards European attitudes This book is essential reading for students and scholars of civil society democracy political participation politics and sociology

Civil Society in Central and Eastern Europe Sabine, 2014-04-15 As well as promoting debates about liberal democracy the dramatic events of 1989 also bought forth a powerful revival in the interest of the notion of civil society This revival was reflected mainly in two broad tracts of literature The first was primarily focused on the events surrounding the Solidarity movement in Poland and the tumultuous events of 1980 81 The second was concerned with the Velvet Revolutions more broadly Following the events of 1989 there appeared a number of works sharing the common central argument that civil society played a key role in the overthrow of these Communist regimes in 1989 Challenging the centrally accepted wisdom that dissent in totalitarian regimes was representative of civil society Civil Society and Communism posits the argument that the totalitarian public sphere a new theoretical typology presents a more robust and rigorous way by which to understand dissent and opposition in totalitarian Czechoslovakia Poland and the GDR

Building Civil Society and Democracy in New Europe Sven Eliaeson, 2009-03-26 The European enlargement process culminating in 2004 was as a follow up to die Wende and the implosion of the Russian empire an event of the same magnitude as 1815 and 1919 Like 1918 19 it was an exit into history a momentous event in post Westphalian Europe Even if acceptance of ten new countries was premature it was appropriate to the moment history provided The presence of the New kids on the block meant both problems and prospects The end of the

cold war meant the fall of the iron curtain but a mental remnant of the curtain remains in terms of attitudes regarding civility corruption and transparency and expectations for democratic politics Several of the new countries are late children of 1848 For them entering NATO was more important than joining the EU and also preceded EU membership Poland is bigger than the other 2004 countries together and has a heavy historical legacy It is as Germany used to be imprinted by its special path between East and West and fear of being encircled by enemies Although the Building of Civil Society and Democracy in countries in transformation can draw on experiences from the countries already within the EU there is no primrose path for EU integration It is moreover an irony that the new member states as a result of the expectations for post Communist politics build institutions of a kind that are no longer sufficiently efficient for old Europe The new countries became a full scale experiment in rule by experts now by neo liberals instead of Communists A common European public sphere and civil society might emerge but its form remains visible only at the horizon **Armenia and Europe** Pål Wilter Skedsmo,2019-11-14

Armenia receives one of the highest levels of international aid per capita in the Western world and among the highest of the post Soviet states This ethnographic study based on new primary research looks at aid in the South Caucasus and its role in Armenia s relationship with Europe In particular Skedsmo argues that the Aarhus Convention which entitles citizens of Europe to access information and participation in decision making in environmental matters has allowed Armenian citizens to adapt and control the direction of their country s political future in various ways whether through protest activism or legal challenges A new examination of aid and development and the structures these create Europe and Armenia will be an essential case study for scholars of development for regional specialists in the post soviet area especially South Caucasus social anthropologists students of post socialism and development postcolonialism In addition the book will be of interest for practitioners and European policy makers transnational organizations and others involved in development policies and projects in the region **Civil Society in Communist Eastern Europe** Matt Killingsworth,2024-10-31 As well as

promoting debates about liberal democracy the dramatic events of 1989 also bought forth a powerful revival in the interest of the notion of civil society This revival was reflected mainly in two broad tracts of literature The first focused primarily on events surrounding the Solidarity movement in Poland and the tumultuous events of 1980 81 The second was concerned with the Velvet Revolutions more broadly Following the events of 1989 there appeared a number of works sharing the common central argument that civil society played a key role in the overthrow of these Communist regimes in 1989 Killingsworth s book presents three broad arguments all of which reject the way civil society has been applied in the analysis of opposition and dissent in totalitarian Czechoslovakia the GDR and Poland First it argues that the totalitarian nature of Soviet type regimes means that it was not possible for a genuine civil society to exist Second the civil society paradigm as it has been applied to opposition and dissent in Soviet type regimes in Eastern Europe lacks analytical rigour Thirdly the book argues that the dominant liberal interpretation of dissenting opposition in Soviet type regimes is politically and morally flawed

The Building of Civil Europe 1951-1972 Stefanie Pukallus, 2018-11-27 This book argues that early European Commission officials envisaged an integrated civil Europe from the outset Largely overlooked is the fact that between 1951 and 1972 there was a group of European Commission and before that the High Authority officials who wished to build a Civil Europe to sit alongside an economic and political Europe This Civil Europe was it was hoped to become home to a European citizenry equipped with a European civil consciousness that complemented their national and local loyalties To this end these officials pioneered a series of civil initiatives designed to begin the process of building Civil Europe This book analyses three such civil initiatives the building of the first European School the European Community's participation in Expo 58 and the production of the European Community's own documentaries From the start Europe was designed and conceived of in terms of a European general civil public and not solely in terms dictated by economic and political interests

Civil Society in Southeast Europe, 2021-11-08 Since the fall of communism in 1989 Southeast Europe has been a site of far reaching societal transformation much of it marked by political crisis economic upheaval ethnic tension and bitter war The book comprises articles investigating the history and development of civil society in post communist Southeast Europe How is civil society to be grasped what are the historical factors shaping the civil societies of the region what is the function of civil society in the transition to democracy and a market economy and what are the prospects for the future development of the civil societies of the region in an age of globalization these are just a few of the major questions addressed in this collection of articles Many of the authors are social scientists philosophers and activists from the region offering first hand critical analysis of the state of civil society in Southeast Europe and suggesting theoretical and practical strategies for the future course of its development The aim is to provide the reader with insight into the complex challenges that face the civil societies of the region

Anti-corruption Measures in South Eastern Europe Civil Society's Involvement OECD, 2002-04-26 This report provides policymakers and other stakeholders with an assessment of the legal and institutional environment in which civil society operates together with recommendations for reform designed to enable civil society organisations and others to play a role in the fight against corruption

Religious Communities and Civil Society in Europe Rupert Graf Strachwitz, 2020-06-08 The seemingly vitalizing impact of religiosity on civil society is a research topic that has been extensively looked into not only in the USA but increasingly also in a European context What is missing is an evaluation of the role of institutionalized religious communities and of circumstances that facilitate or impede their status as civil society organisations This anthology in 2 volumes aims at closing this gap by providing case studies regarding political legal and historical aspects in various European countries Vol 2 provides some theoretical aspects a report on the final conference and case studies from Germany France United Kingdom Italy Poland and

the Ukraine as well as a special chapter on Brazil and a Note on Religious Political Ideology **Europeanizing Civil Society** Rosa Sanchez Salgado, 2014-11-04 The European Union clearly matters for Civil Society Organizations CSOs EU officials and European political entrepreneurs has been crucial in the promotion of funding and access opportunities but they have been proven to have little capacity to use CSOs for their own purposes **Political Science in Central-East Europe** Rainer Eisfeld, Leslie A. Pal, 2010-07-21 The book will survey the recent development and current state of the art of political science in post communist Central and Eastern Europe It will comprise a three comparative overviews Political Science and Regime Change in East Central Europe from the 20th to the 21st Century Analytical and Normative Elements in Political Science Approaches Is there a Specific Central East European Pattern Political Science Associations in East Central Europe How Important how much International Cooperation b 20 detailed and comparable country reports Albania Armenia Belarus Bulgaria Croatia Czech Republic Estonia Georgia Hungary Latvia Lithuania Macedonia Moldova Poland Romania Russia Serbia Slovakia and Ukraine c a chapter on the European Confederation of Political Science Associations The country reports will include tables on political science faculty students with political science as a major and sub fields taught at both state and private universities as per the end of 2008 They will cover the following topics Institutionalization of the discipline achievements deficits prevailing approaches and funding of research in the discipline s sub fields curricula admission regulation and degree system in political science teaching national representation and international cooperation major journals and published books political science associations international links public impact of the discipline labor market challenges and opportunities *Participatory Democratic Innovations in Southeast Europe* Irena Fiket, Čedomir Markov, Vujo Ilić, Gazela Pudar Draško, 2024-04-08 This volume strengthens the dialogue between conceptual perspectives approaches and fields on deliberative and participatory forms of democratic innovation and offers novel insights focusing on the Southeast European space Traditional forms of participation seem insufficient in satisfying the growing complexity of the democratic processes especially in the context of autocratizing societies It is crucial to examine the possibilities of democratic innovation in political research and practice trying to establish a connection between the possibilities and limits of representative democracy and social movements as possible carriers of the process of democratic innovation This book offers novel insights into practices of civil society and social movements and their pathways carved to initiate a deep change in political thinking and practice and compelling insights for scholars and students of Southeast Europe social movements and democracy Exploring Civil Society Marlies Glasius, David Lewis, Hakan Seckinelgin, 2004-08-02 This volume explores how the idea of civil society has been translated in different cultural contexts and examines its impact on politics worldwide Comparing and contrasting civil society in Latin America and Eastern Europe Western Europe and the United States Africa and South Asia and the Middle East the contributors show that there are multiple interpretations of the concept that depend more on the particular political configuration in different parts of the world than on cultural predilections They also

demonstrate that the power of civil society depends less on abstract definitions and more on the extent to which it is grounded in the context of actual experiences from around the world This book includes some of the biggest names in the area such as Mary Kaldor Ronnie Lipschutz and Helmut Anheier *Religion and Civil Society in Europe* Joep de Hart,Paul Dekker,Loek Halman,2013-07-15 Religion is back again in Europe after never having been gone It is manifest in the revival of religious institutions and traditions in former communist countries in political controversies about the relationship between the church es and the state and about the freedom of religion and the freedom to criticize religion and in public unease about religious minorities This book is about religion and civil society in Europe It moves from general theoretical and normative approaches of this relationship via the examination of national patterns of religion state relations to in depth analyses of the impact of religion and secularization on the values pro social attitudes and civic engagement of individuals It covers Europe from the Lutheran North to the Catholic South and from the secularized West to the Orthodox East and Islamic South East with comparative analyses and country studies concluding with an overall Europe USA comparison **State and Civil Society in Northern Europe** Lars Trägårdh,2007-01-01 In the current neo liberal political and economic climate it is often suggested that a large and strong state stands in opposition to an autonomous and vibrant civil society However the simultaneous presence in Sweden of both a famously large public sector and an unusually vital civil society poses an interesting and important theoretical challenge to these views with serious political and policy implications Studies show that in a comparative context Sweden scores very highly when it comes to the strength and vitality of its civil society as well as social capital as measured in terms of trust lack of corruption and membership of voluntary associations The Swedish Model therefore offers important insights into the dynamics of state and civil society relations which go against current trends of undermining the importance of the welfare state and presents autonomous civic participation as the only way forward

Rethinking Citizenship in Central and Eastern Europe Nina Kolleck,Ireneusz Pawel Karolewski,2025-05-23 This book delves into the intricate landscape of citizenship practices in Central and Eastern Europe an area often overlooked in research Through an interdisciplinary lens the contributors explore how education and political participation shape these practices in a region marked by historical and social complexities The book offers fresh insights into how citizenship is perceived and practiced highlighting the role of civic education in fostering political engagement By addressing both the challenges and opportunities of citizenship in this dynamic region this volume contributes to broader debates on democracy and civic participation across Europe and beyond
