A Practical Guide to Costume Mounting Lara Flecker, 2013-01-11 The effective preparation of garments for display is essential for exhibitions of contemporary and historical dress. Costumes not only need to be visually appealing but also fully supported and historically accurate. This book provides a comprehensive guide to mounting costumes from the eighteenth century to the present day. It includes methods for adapting and shaping figures to create historical silhouettes, constructing underpinnings and making replicas and toiles using inexpensive and simple techniques. *A Practical Guide to Costume Mounting* is an invaluable resource for conservators, historians and all those working with clothing in museums, private collections and throughout the fashion and theatre industries. Trained as a historical costume maker, author Lara Flecker is the textile display specialist at London's Victoria and Albert Museum. She has worked extensively with the museum's world class costume collection, preparing garments for display. Her simple mounting methods are clearly explained and can be used by people with a wide range of experience, including those with few sewing skills. *Complete Self-instructing Library of Practical Photography ...* James Boniface Schriever, 1909 **Complete Self-instructing Library of Practical**

Meejin Yoon, Eric Höweler, 2009-07-14 Rising stars in Boston's design scene, architects Eric Höweler and J. Meejin Yoon have in a single decade developed a reputation for radical experiments in architectural form. Their design methodology, what they call an expanded practice, combines intense research with interdisciplinary experimentation. Höweler and Yoon's sensational competition-winning lighting entry for the 2004 Athens Olympics exemplifies their fearless approach without any prior experience in public space. Interactive design: the firm constructed a luminous interactive soundscape installation at the base of the Acropolis. *White Noise White Light* featured a field of semiflexible fiber optic strands that emitted white light and white noise in response to the movement of pedestrians. The project an enormous success, enchanted a multitude of visitors who moved amidst the cilia of light. *Expanded Practice* presents twenty-nine recent projects by this young firm, encompassing a broad range of scales and media. The projects divided into distinct but often overlapping research themes include a museum courtyard program inspired by the Voronoi cell packing algorithm, *PS1 Loop*, an outdoor light installation featuring hovering cones that capture and interact with solar energy, rainwater and sound, *Hover*, a garment designed to turn inside out as it unravels, *Möbius Dress*, and a landscape design that weaves technology and texture into an integrated and interactive landscape. *Tripanel*, packed with drawings, diagrams and photographs of each project's design process. *Expanded Practice* provides an inspirational look into one of the most exciting young firms working in architecture today. *Monthly Abstract Bulletin from the Kodak Research Laboratories* Eastman Kodak Company. Companion to Studio Performance Practice is a unique indispensable guide to the training methods of the world's key theatre practitioners. Compiling the practical work outlined in the popular Routledge Performance Practitioners series of guidebooks, each set of exercises has been edited and contextualised by an expert in that particular approach. Each chapter provides a taster of one practitioner's work, answering the same key questions: How did this artist work? How can I begin to put my understanding of this to practical use? Newly written chapter introductions put the exercises in context, explaining how they fit into the wider methods and philosophy of the practitioner in question. All 21 volumes in the original series are represented in this volume. **Monthly Abstract Bulletin from the Kodak Research Laboratories** Eastman Kodak Company. Kodak Research Laboratories, 1929

edited collection is an interdisciplinary study of gems in the early modern world It examines the relations between the art science and technology of gems and it does so against the backdrop of an expanding global trade in gems The eleven chapters are organised into three parts The first part sets the scene by describing how gems moved around the early modern world how they were set in motion and how they were pulled together in the course of their travels The second part is about value It asks why people valued gems how they determined the value of a given gem and how the value of a gem was connected to its perceived place of origin The third part deals with the skills involved in cutting polishing and mounting gems

and how these skills were transmitted and articulated by artisans The common themes of all these chapters are materials knowledge and global trade The contributors to this volume focus on the material properties of gems such as their weight and hardness on the knowledge involved in exchanging them and valuing them and on the cultural consequences of the expanding trade in gems in Eurasia and the Americas
