increased use of mediation and what disputants need in order to increase their use of cross border mediation The qualitative nature by way of interviews of the research conducted for this book has enabled the identification of nuanced and novel findings regarding mediation s position and potential in cross border dispute resolution These findings together with a detailed examination of the EU Directive on Certain Aspects of Mediation in Civil and Commercial Matters and the EU s continued initiatives to foster the use of mediation form the foundation upon which this book s recommendations are built Changing the frame to view the use of mediation through the disputants perspective as this book does provides the opportunity for the EU to promote cross border mediation in a way which resonates more deeply with disputants and responds more fully to their concerns and needs This thought provoking book will be of interest not only to European and national bodies seeking to promote the use of mediation but clearly also to dispute resolution academics in house counsel and of course mediators and dispute resolution practitioners in general
