Physical Examination Health Assessment 4th Canadian Edition is the gold standard in physical examination textbooks. This new edition reflects today's nursing practice with a greater focus on diverse communities, evidence-informed content throughout, and new and enhanced case studies focusing on critical thinking and clinical judgement. It's easy to see why this text is 1 with Canadian nursing students. Approximately 150 normal and abnormal examination photos for the nose, mouth, throat, thorax, and pediatric assessment give you a fresh perspective on these key system examinations with cultural diversity and developmental variations. Social determinants of health considerations cover the shifting landscape of Canada's populations with strategies for integrating social, economic, and ethnocultural diversity into students' health assessments. Assessment strategies relevant to Indigenous populations, harm reduction, nutrition, and transgender persons inform practitioners on respectful, complete care. Sectional colour bars segment body systems according to content. Structure and Function, Subjective Data, Objective Data, Documentation, and Critical Thinking. Abnormal Findings Documentation and critical thinking sections provide real-world clinical examples of specific patients and how to document assessment findings. Abnormal findings tables help you recognize, sort, and describe abnormalities. Separate chapter on pregnancy provides a thorough foundation for assessing the pregnant patient. Developmental Considerations sections highlight content specific to infants, children, adolescents, pregnant individuals, and older adults. Content covering the electronic health record, charting, and narrative recording provides examples of how to document assessment findings. Two-column format distinguishes normal findings from abnormal findings and uses full-colour, step-by-step photos to clarify examination techniques and expected findings. Promoting Health boxes focus on this key aspect of Canadian health care. Summary checklists offer reviews of key examination steps.
