**Intelligent Information Processing V** Zhongzhi Shi, Sunil Vadera, Agnar Aamodt, David Leake, 2010-09-21 This volume comprises the 6th IFIP International Conference on Intelligent Information Processing As the world proceeds quickly into the Information Age it encounters both successes and challenges and it is well recognized nowadays that intelligent information processing provides the key to the Information Age and to mastering many of these challenges Intelligent information processing supports the most advanced productive tools that are said to be able to change human life and the world itself However the path is never a straight one and every new technology brings with it a spate of new research problems to be tackled by researchers as a result we are not running out of topics rather the demand is ever increasing This conference provides a forum for engineers and scientists in academia and industry to present their latest research findings in all aspects of intelligent information processing This is the 6th IFIP International Conference on Intelligent Information Processing We received more than 50 papers of which 35 papers are included in this program as regular papers and 4 as short papers We are grateful for the dedicated work of both the authors and the referees and we hope these proceedings will continue to bear fruit over the years to come All papers submitted were reviewed by two referees A conference such as this cannot succeed without help from many individuals who contributed their valuable time and expertise

**Processes and Foundations for Virtual Organizations** Luis M. Camarinha-Matos, Hamideh Afsarmanesh, 2013-06-05 Processes and Foundations for Virtual Organizations contains selected articles from PRO VE 03 the Fourth Working Conference on Virtual Enterprises which was sponsored by the International Federation for Information Processing IFIP and held in Lugano Switzerland in October 2003 This fourth edition includes a rich set of papers revealing

the progress and achievements in the main current focus areas VO breeding environments Formation of collaborative networked organizations Ontologies and knowledge management Process models and interoperability Infrastructures Multi agent approaches In spite of many valid contributions in these areas many research challenges remain This is clearly stated in a number of papers suggesting a new research agenda and strategic research roadmaps for advanced virtual organizations With the selected papers included in this book PRO VE pursues its double mission as a forum for presentation and discussion of achievements as well as a place to discuss and suggest new directions and research strategies Encyclopedia of Computer Science and Technology Allen Kent,James G. Williams,2001-05-22 This volume investigates automated scheduling and course scheduling at the University of Waikato to traffic control for real time VBR services in ATM network

*Encyclopedia of Library and Information Science* Allen Kent,2002-03-26 This supplement examines achieving synergy between computer power and human reason to the unified medical language system UMLS **Knowledge Engineering and Management** Guus Schreiber,2000 Prologue The Value of Knowledge 2 Knowledge Engineering Basics 3 The Task and Its Organizational Context 4 Knowledge Management 5 Knowledge Model Components 6 Template Knowledge Models 7 Knowledge Model Construction 8 Knowledge Elicitation Techniques 9 Modelling Communication Aspects 10 Case Study The Housing Application 11 Designing Knowledge Systems 12 Knowledge System Implementation 13 Advanced Knowledge Modelling 14 UML Notations Used in Common KADS 15 Project Management **Modeling with Rules Using Semantic Knowledge Engineering** Grzegorz J. Nalepa,2017-10-04 This book proposes a consistent methodology for building intelligent systems It puts forward several formal models for designing and implementing rules based systems and presents illustrative case studies of their applications These include software engineering business process systems Semantic Web and context aware systems on mobile devices Rules offer an intuitive yet powerful method for representing human knowledge and intelligent systems based on rules have many important applications However their practical development requires proper techniques and models a gap that this book effectively addresses *Real Time Fault Monitoring of Industrial Processes* A.D. Pouliezios,George S. Stavrakakis,2013-03-09 This book presents a detailed and up to date exposition of fault monitoring methods in industrial processes and structures The following approaches are explained in considerable detail Model based methods simple tests analytical redundancy parameter estimation knowledge based methods artificial neural network methods and nondestructive testing etc Each approach is complemented by specific case studies from various industrial sectors aerospace chemical nuclear etc thus bridging theory and practice This volume will be a valuable tool in the hands of professional and academic engineers It can also be recommended as a supplementary postgraduate textbook For scientists whose work involves automatic process control and supervision statistical process control applied statistics quality control computer assisted predictive maintenance and plant monitoring and structural reliability and safety *KADS* Guus Schreiber,Bob Wielinga,Joost Breuker,1993-05-05 KADS is a structured methodology for the development of knowledge

based systems which has been adopted throughout the world by academic and industrial professionals alike KADS approaches development as a modeling activity Two key characteristics of KADS are the use of multiple models to cope with the complexity of knowledge engineering and the use of knowledge level descriptions as an immediate model between system design and expertise data The result is that KADS enables effective KBS construction by building a computational model of desired behavior for a particular problem domain KADS contains three sections: the Theoretical Basis of KADS Languages and Tools and Applications Together they form a comprehensive sourcebook of the how and why of the KADS methodology KADS will be required reading for all academic and industrial professionals concerned with building knowledge based systems It will also be a valuable source for students of knowledge acquisition and KBS SPECIAL FEATURES KADS is the most widely used commercial structured methodology for KBS development in Europe and is becoming one of the few significant AI exports to the US Describes KADS from its Theoretical Basis through Language and Tool Developments to real Applications

Machine Learning Proceedings 1989 Alberto Maria Segre, 2014-06-28 Machine Learning Proceedings 1989 Business Process Change Paul Harmon, 2019-02-28 Business Process Change A Business Process Management Guide for Managers and Process Professionals Fourth Edition provides a balanced view of the field of business process change Bestselling author and renowned expert in the field Paul Harmon offers concepts methods cases for all aspects and phases of successful business process improvement Students and professionals alike will benefit from the comprehensive coverage and customizable integrated approach to broad business process management that focuses on improving efficiency and productivity In this updated Edition particular attention is paid to the impact of disruptive technology on business and the need for agile transformation Covers Business Process Management Systems and the integration of process redesign and Six Sigma Explores how different process elements fit together including the human aspects of process redesign Presents best practice methodologies that can be applied and tailored to an organization's specific needs Offers invaluable detailed case studies demonstrating how these key methods are implemented **The Psychology of Expertise** Robert R.

Hoffman, 2014-02-25 This volume investigates our ability to capture and then apply expertise In recent years expertise has come to be regarded as an increasingly valuable and surprisingly elusive resource Experts who were the sole active dispensers of certain kinds of knowledge in the days before AI have themselves become the objects of empirical inquiry in which their knowledge is elicited and studied by knowledge engineers experimental psychologists applied psychologists or other experts involved in the development of expert systems This book achieves a marriage between experimentalists applied scientists and theoreticians who deal with expertise It envisions the benefits to society of an advanced technology for capturing and disseminating the knowledge and skills of the best corporate managers the most seasoned pilots and the most renowned medical diagnosticians This book should be of interest to psychologists as well as to knowledge engineers who are out in the trenches developing expert systems and anyone pondering the nature of expertise and the question of how it can

be elicited and studied scientifically The book's scope and the pivotal concepts that it elucidates and appraises as well as the extensive categorized bibliographies it includes make this volume a landmark in the field of expert systems and AI as well as the field of applied experimental psychology

Information Technology for Knowledge Management Uwe M. Borghoff, Remo Pareschi, 2013-03-14 As we approach the beginning of the 21st century we are beginning to see the emergence of knowledge management as a natural evolution of the focus and importance of quality in the 1980s and reengineering in the 1990s Quality placed a huge emphasis on getting all employees to use their brainpower better Reengineering emphasized the use of technology to streamline business processes and take out costs With the lessons of quality and reengineering firmly embedded in our everyday operations continual cost containment and higher quality is a way of life businesses are now turning their attention to growth Growth is a common pursuit Customers

are calling for it Financial markets are calling for it Employees are asking for it because they want an exciting and stimulating environment in which to work If a business doesn't grow it will eventually die because knowledge workers of the 21<sup>st</sup> century won't want to work with or for a business that's not growing Skilled workers have plenty of options to choose from as demand for knowledge workers escalates around the world
