D. F.

VINCENT,2025-01-22 The Cutters Practical Guide being the present acknowledged Standard System of Cutting at the Tailor and Cutter Office and the System taught to the Students at our Academy it has in a variety of forms and adaptations been laid before the members of the tailoring trade The cordial reception it has met has induced us to develop both the System and its applications and prepare these for publication in more permanent form Part One has already appeared in which the System is adapted more particularly to Youths and Juvenile Garments A promise was then made that Part Two embracing every Style and Class of Gents Body Coats would ultimately be published The present work will be valued not only for its

application to ordinary coats but by many more because it embraces many garments which in most trades are regarded special and unusual Among these we may reckon Military Naval and Livery garments with other classes of official and non official dress which the head of every respectable firm is liable to be called upon to make The work throughout will be found thoroughly practical in its mode of representing and dealing with the various styles and classes of garments Everything superfluous is studiously avoided The work is prepared for practical Cutters and for everyday use which will be greatly facilitated by the large clear type and equally clear engraving of the Plates We feel confidence in placing it in the hands of our many patrons

The Cutter's Practical Guide, Part 1 W. D. F. VINCENT, 2025-01-22 The confidence with which this work was first introduced has been well justified by the result a very large edition having been disposed of Very rarely if ever has a work so comprehensive been published in connection with the art of cutting Though nominally a work on Juvenile Cutting it embraces nearly every garment made by tailors Besides systems for and treatises on Trousers and Veats systems for Morning Coats and Dress Coats it also deals with Military Garments Liveries and many other garments all worked out by a system which has now become well nigh universally popular a unique feature of the work being its beautifully engraved illustrations and diagrams We have had very many indications that the work is highly appreciated by all who have procured it and many testimonies might be recorded if that were necessary This Third Edition has been prepared in all its original completeness With such a work in their possession neither the inexperienced student nor the cutter in full practice should have any difficulty producing any of the garments treated and illustrated in this work
