## Practical Reality:

**Practical Reality** Jonathan Dancy, 2000-08-03 Practical Reality is about the relation between the reason why we do things and the reasons why we should. It maintains that current philosophical orthodoxy bowdlerizes this relation making it impossible to understand how anyone can act for a good reason. In order to understand this Dancy claims we have to abandon current conceptions of the reasons why we act: our motivating reasons as mental states of ourselves. Belief, desire, explanations of action, or purely cognitive accounts in terms of beliefs alone drive too great a wedge between the normative and the motivational. Instead we have to understand a motivating reason as the sort of thing that could be a good reason for instance that the eggs are ready. This rather than my believing that they are ready must be my reason for taking them off the cooker. Most contemporary philosophers think that this view cannot be true. Dancy aims to demonstrate that things can be as he thinks they must be. By giving a fresh account of values and reasons he finds a place for normativity in philosophy of mind and action and strengthens the connection between these areas and ethics. *The Elements of Mentality* David Hume, 2003-06-12 In the 18th century David Hume suggested that the science of man psychology was the foundation for all other sciences philosophy. Now a latter day Hume offers a model of mentality that sets psychology and philosophy on common footings eliminating the breach between the sciences and the humanities. From this backdrop the author offers solutions to some of the great questions: the nature of reality, value, certainty, validity, free will, morality, and justice. Kant, Fichte, and the Legacy of Transcendental Idealism Halla Kim, Steven Hoeltzel, 2014-12-18 Kant, Fichte, and the Legacy of Transcendental Idealism contains ten new essays by leading and rising scholars from the United States, Europe, and Asia who explore the historical development and conceptual contours of Kantian and post-Kantian philosophy. The collection begins with a set of comparative essays centered on Kant's transcendental idealism, placing special stress on the essentials of Kant's moral theory, the metaphysical outlook bound up with it, and the conception of the legitimate role of religion supported by it. The spotlight then shifts to the post-Kantian period in a series of essays exploring a variety of angles on Fichte's pivotal role: his uncompromising constructivism, his overarching conception of the philosophical project, and his radical accounts of the nature of reason and the constitution of meaning. In the remaining essays the focus falls on German idealism after Fichte, with particular attention to Jacobi's critique of idealism as nihilism, Schelling's development of an idealistic philosophy of nature, and Hegel's development of an all-encompassing idealistic science of logic. The collection, edited by Halla Kim and Steven Hoeltzel, will be of great value to scholars interested in Kant, Fichte, German idealism, post-Kantian philosophy, European philosophy, or the history of ideas. **The Pragmatic Mind** Mark Bauerlein, 1997 English professor Mark Bauerlein studies the pragmatism of Emerson, James, and Peirce and its overlooked relevance for the neopragmatism of later thinkers. Bauerlein argues that those original pragmatists are often cited casually and imprecisely as mere precursors to contemporary intellectuals, but in fact many broad social and academic reforms hailed by new pragmatists were actually grounded in the old
