Practical Research with Children Jess Prior,Jo Van Herwegen,2016-06-03 Practical Research with Children is designed to help the reader understand techniques for research with children based on real world experience The book describes a wide range of research methods focusing equally on quantitative and qualitative approaches and considers how different methods can be integrated It highlights the benefits and challenges of each method and gives emphasis to best practice with expert guidance on how to avoid potential pitfalls in order to obtain valuable insights into how children develop The volume includes fifteen chapters arranged over three sections Each chapter explores a particular method or combination of methods and discusses both theoretical and practical issues using a diversity of domains including different ages cultures populations and settings Uniquely the book includes newer methods such as eye tracking and digital technologies alongside well established behavioural methods which are used for research with children With contributions from internationally renowned researchers and practitioners from a range of disciplines the book will be indispensable reading for a wide audience including for students in psychology education and nursing undertaking research projects with children and also for anyone looking to understand the research behind current theories in child development

Practical Research and Statistics K.J. Kovach,2018-03-19 The main aim of this new book is to provide a single efficient and effective source for college and university students to understand research development and learn then apply statistical concepts while developing a Research Proposal or Research Study using the American Psychological Association APA format It is a specialist text particularly well suited for introductory accelerated and short courses that emphasize quantitative approaches within research activities After teaching over 30 years the authors know that several different texts commonly must be bought or used in learning to develop a research proposal or research study Additionally many colleges and universities have combined various research and statistical courses into one course or program Students therefore have to learn what research is and its many concepts learn various descriptive and inferential statistics and apply APA format for completed reports during one school term Instructors as well as students easily appreciate that a detailed grasp of the above three components during a single university course would be a daunting task Hence the authors offer this practical integration and application of all three components into a single recommended text as an efficient effective bridge to learning these complex areas Mind Maps are used to help readers organize the many detailed concepts and techniques herein These Mind Maps are presented with the central concept at or near the middle of the diagram and subordinate concepts and techniques arranged as branches clockwise from the upper right around to the upper left For Instructors adopting this text an Instructor Guide chapter PowerPoint R files and Test bank will be provided to facilitate the one course concept email a request to KJKovach@btinternet.com See also the authors web site <https://PracticalResearchandStatistics.com> Authors Note Certain technical examples and
