Practical Work In School Science Which Way Now:

Practical Work in School Science Jerry J. Wellington, 1998 Practical work has been part of science education for just over 100 years and is accepted as an essential and exciting part of understanding this discipline Although it can be costly and sometimes messy it simply has to be done if students and teachers are to progress in their understanding Schools and universities invest millions of pounds in it and the National Curriculum reveres it but what exactly is going on in classrooms around the country and how are the leading practitioners moving with the times This book attempts to reflect on the value and purpose of practical work as part of the scientific curriculum Why are practical exercises so necessary and what do they contribute to the learning process The chapters examine many issues such as how practical work is perceived by students and teachers whether we will move on to the virtual lab the limitations of current hands on work and valuable alternatives to it the connections between practical work in science education and authentic science what role experimentation plays in current educational practice Jerry Wellington is Reader in Education at Sheffield University and has taught science at all academic levels <u>Practical Work in School Science</u> Jerry Wellington, 2002-01-22 Practical work has been part of science education for just over 100 years and is accepted as an essential and exciting part of understanding this discipline Although it can be costly and sometimes messy it simply has to be done if students and teachers are to progress in their understanding Schools and universities invest millions of pounds in it and the National Curriculum reveres it but what exactly is going on in classrooms around the country and how are the leading practitioners moving with the times This book attempts to reflect on the value and purpose of practical work as part of the scientific curriculum Why are practical exercises so necessary and what do they contribute to the learning process The chapters examine many issues such as how practical work is perceived by students and teachers whether we will move on to the virtual lab the limitations of current hands on work and valuable alternatives to it the connections between practical work in science education and authentic science what role experimentation plays in current educational practice Jerry Wellington is Reader in Education at Sheffield University and has taught science at all academic levels Assessment Reform in Science Benny B.H.W Yung, 2006-02-03 Fairness and Fear I was startled at the subtitle of the book when I first heard it Our series has some imaginative titles but none so evocative as this one But fear and fairness capture much of teacher thinking about assessment Indeed teachers struggle to be fair with students certainly c cerned and often fearful of failures to be fair and repercussions that teachers can face as a result Then there is the fearful enterprise of imposed assessment regimes that many teachers face Dr Yung s book allows us to hear from the teachers on these concerns this is no top down policy statement His account is readable and highly instructive and I hope that copies will find their way to the desks of many school administrators and policy personnel We are indeed pleased to release this volume William W Cobern Book Series Editor 2000 2005 Foreword by Peter Fensham Two things are very clear to me about formal educational systems What is assessed in these systems determines what teachers and students recognize

Constructing Worlds through Science Education John K. Gilbert, 2013-05-13 Internationally renowned and award winning author John Gilbert has spent the last thirty years researching thinking and writing about some of the central and enduring issues in science education He has contributed over twenty books and 400 articles to the field and is Editor in Chief of the International Journal of Science Education For the first time he brings together sixteen of his key writings in one volume This unique book highlights important shifts in emphasis in science education research the influence of important individuals and matters of national and international concern All this is interwoven in the following four themes explanation models and modeling in science education relating science education and technology education informal education in science and technology alternative conceptions and science education A scholarly contribution to educational praxis M.A. Mokoena, J.M. (Ona) Janse van Rensburg, M. Erasmus, E. Mentz, C.B. Zulu, A. Cronje, E.K. Materechera, W.T. Dudu, A.T. Kanyimba, S.P. Raath, C. Kruger, A. Loubser, A.E. Pienaar, A. Klopper, S. Ellis, N.T. Petersen, J. de Beer, J. Varughese, A. Seugnet Blignaut, C. Els, 2016-12-31 This publication contains original research targeting scientific specialists in the field of education through research endeavours grounded on a philosophical basis as well as being embedded in the empirical The research methodology of each chapter emanates from applicable philosophical assumptions in the form of an applicable theoretical and conceptual framework The latter forms a firm basis for the application of sound empiricism The content of this book adds to the body of scholarly knowledge in education In his evaluation of the book Acting Executive Dean Faculty of Education and Training Professor Akpovire Oduaran made the following remarks To a large extent the ideas put together in this book have come from data generated not just from literature found in books and journals but actual interactions with educators and the learning environment So then what the reader is offered in this volume is the articulation of ideas that have been interrogated structured and presented in surprisingly simplistic and yet incisive and academically enriching content that can match the standards of scholarship that is available in the Western World Yet what makes this book so welcome relevant and timely is the fact that it is built around Afrocentric theories and practices such as one may find in imported literature

Learning Science Teaching: Developing A Professional Knowledge Base Bishop, Keith, Denley, Paul, 2007-11-01 The book argues that highly accomplished science teachers are also continually learning science teachers. It stresses the importance of learning through others by participation in communities of science practitioners as well as individual learning through classroom research. How Science Works Rob Toplis, 2010-12-02 How Science Works provides student and practising teachers with a comprehensive introduction to one of the most dramatic changes to the secondary science curriculum. what it is and how to teach it expert contributors explore issues including the need for curriculum change arguments for scientific literacy for all school students views about science what we understand about scientific methods types of scientific enquiry and importantly effective pedagogies and their implications for practice Aiming to promote discussion and reflection on the ways forward for this new and emerging area of the school science curriculum it considers teaching controversial issues in science argumentation and questioning for effective teaching enhancing investigative science and developing reasoned scientific judgments the role of ICT in exploring How Science Works teaching science outside the classroom How Science Works is a source of guidance for all student new and experienced teachers of secondary science interested in investigating how the curriculum can provide creativity and engagement for all school students America's Lab Report National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Science Education, Committee on High School Laboratories: Role and Vision, 2005-12-20 Laboratory experiences as a part of most U S high school science curricula have been taken for granted for decades but they have rarely been carefully examined What do they contribute to science learning What can they contribute to science learning What is the current status of labs in our nation's high schools as a context for learning science This book looks at a range of guestions about how laboratory experiences fit into U S high schools What is effective laboratory teaching What does research tell us about learning in high school science labs How should student learning in laboratory experiences be assessed Do all student have access to laboratory experiences What changes need to be made to improve laboratory experiences for high school students How can school organization contribute to effective laboratory teaching With increased attention to the U S education system and student outcomes no part of the high school curriculum should escape scrutiny This timely book investigates factors that influence a high school laboratory experience looking closely at what currently takes place and what the goals of those experiences are and should be Science educators school administrators policy makers and parents will all benefit from a better understanding of the need for laboratory experiences to be an integral part of the science curriculum and how that can Aspects of Teaching Secondary Science Sandra Amos, Richard Boohan, 2003-09-02 This book s be accomplished structure reflects the different dimensions to learning science The first section focuses on the importance of talk in the science classroom while the second explores the key role of practical work The third section is concerned with the creative theoretical aspect of science Section four follows this by considering the communication of ideas and how pupils learn to participate in the discourse of the scientific community Section five emphasizes the place of science in the broader context considering its moral and ethical dimensions and its place in a cultural context Finally section six explores the complexity of the task faced by science teachers highlighting the knowledge and skills science teachers must acquire in order to create an environment in which students are motivated to learn science **Teaching and Learning Science** Judith Bennett, 2005-12-07 There is increasingly wide agreement among teachers researchers inspectors advisers and policy makers

that both teaching and research will benefit from being brought closer together But how can this be achieved Hard pressed practitioners cannot be expected to review a constant flow of conference papers journals and other publications even if such items were accessibly written. This unique book synthesizes relevant research findings for the professional practitioner and highlights their implications for the quality of teaching and learning Whether you are a teacher looking to enhance your practice or a researcher looking for a concise overview of or a researcher looking for a concise overview of the literature this book will be a valuable acquisition The Future in Learning Science: What's in it for the Learner? Deborah Corrigan, Cathy Buntting, Justin Dillon, Alister Jones, Richard Gunstone, 2015-09-01 This volume considers the future of science learning what is being learned and how it is being learned in formal and informal contexts for science education To do this the book explores major contemporary shifts in the forms of science that could or should be learned in the next 20 years what forms of learning of that science should occur and how that learning happens including from the perspective of learners In particular this volume addresses shifts in the forms of science that are researched and taught post school emerging sciences new sciences that are new integrations futures science and increases in the complexity and multidisciplinarity of science including a multidisciplinarity that embraces ways of knowing beyond science A central aspect of this in terms of the future of learning science is the urgent need to engage students including their non cognitive affective dimensions both for an educated citizenry and for a productive response to the ubiquitous concerns about future demand for science based professionals Another central issue is the actual impact of ICT on science learning and teaching including shifts in how students use mobile technology to learn science
