When Species Meet Donna J. Haraway, 2013-11-30 In 2006 about 69 million U S households had pets giving homes to around 73.9 million dogs 90.5 million cats and 16.6 million birds and spending more than 38 billion dollars on companion animals As never before in history our pets are truly members of the family But the notion of companion species knotted from human beings animals and other organisms landscapes and technologies includes much more than companion animals In *When Species Meet* Donna J Haraway digs into this larger phenomenon to contemplate the interactions of humans with many kinds of critters especially with those called domestic At the heart of the book are her experiences in agility training with her dogs Cayenne and Roland but Haraway's vision here also encompasses wolves

chickens cats baboons sheep microorganisms and whales wearing video cameras From designer pets to lab animals to trained therapy dogs she deftly explores philosophical cultural and biological aspects of animal human encounters In this deeply personal yet intellectually groundbreaking work Haraway develops the idea of companion species those who meet and break bread together but not without some indigestion A great deal is at stake in such meetings she writes and outcomes are not guaranteed There is no assured happy or unhappy ending socially ecologically or scientifically There is only the chance for getting on together with some grace Ultimately she finds that respect curiosity and knowledge spring from animal human associations and work powerfully against ideas about human exceptionalism
