Top Picks for Homeschool Curriculum Cathy Duffy,2005 A critical volume for the homeschooling community that helps parents make informed choices regarding learning styles and curriculum **Reflections on Theoretical Issues in Argumentation Theory** Frans H. van Eemeren,Bart Garssen,2015-08-08 This volume presents a selection of papers reflecting key theoretical issues in argumentation theory Its six sections are devoted to specific themes including the analysis and evaluation of argumentation argument schemes and the contextual embedding of argumentation The section on general perspectives on argumentation discusses the trends of empiricalization contextualization and formalization offers descriptions of the analytical and evaluative tools of informal logic and highlights selected principles that argumentation theorists do and do not agree upon In turn the section on linguistic approaches to argumentation focuses on the problem of distinguishing between explanation and argument while also elaborating on the role of verbal indicators of argument schemes All essays included in this volume point out notable recent developments in the study of argumentation **Critical Thinking** Max Black,2018-12-05 I have tried to make this book an argument not a catalogue of dogmas Its ideal reader will find himself constantly asking questions for which he will insist on finding his own answers To avoid wasting his time I have made the fullest use of authentic illustrations from newspapers books and other contemporary sources One of the wisest things ever said about our subject is that Logic like whiskey loses its beneficial effect when taken in too large doses While bearing this constantly in mind I have also aimed at a high level of accuracy and the inclusion of nothing that would have to be unlearned at a more advanced level of study This book could never have been written without the help of the students to whom I have lectured on logic and scientific method My chief obligations are to them Logic ought to be easy interesting and enjoyable This book will have been successful if it helps some readers to find it so Prof Max Black [The Rise of Informal](#)

Logic Ralph H. Johnson, 2014-07-15 We are pleased to release this digital edition of Ralph Johnson's *The Rise of Informal Logic* as Volume 2 in the series *Windsor Studies in Argumentation*. This edition is a reprint of the previous Vale Press edition with some minor corrections. We have decided to make this the second volume in the series because it is such a compelling account of the formation of informal logic as a discipline written by one of the founders of the field. The book includes essential chapters on the history and development of informal logic. Other chapters are key reflections on the theoretical issues raised by the attempt to understand informal argument. Many of the papers were previously published in important journals. A number of them were co-authored with J. Anthony Blair. Three of them have appeared only in the present book.

Ad Hominem Arguments Douglas Walton, 1998-09 Douglas Walton presents a clear account of the structure of the ad hominem argument and how that structure can be used to evaluate specific cases of this type of argumentation as fallacious or not.

Foundations of Evidence-Based Medicine Milos Jenicek, 2019-09-19 This comprehensive text focuses on reasoning, critical thinking, and pragmatic decision making in medicine. Based on the author's extensive experience and filled with definitions, formulae, flowcharts, and checklists, this fully revised second edition continues to provide invaluable guidance to the crucial role that clinical epidemiology plays in the expanding field of evidence-based medicine. Key Features: Considers evidence-based medicine as a universal initiative common to all health sciences and professions and all specialties within those disciplines. Demonstrates how effective practice is reliant on proper foundations such as clinical and fundamental epidemiology and biostatistics. Introduces the reader to basic epidemiological methods, meta-analysis, and decision analysis. Shows that structured, modern argumentative reasoning is required to build the best possible evidence and use it in practice and research. Outlines how to make the most appropriate decisions in clinical care, disease prevention, and health promotion. Presenting a range of topics seldom seen in a single resource, the innovative blend of informal logic and structured evidence-based reasoning makes this book invaluable for anyone seeking broad, in-depth, and readable coverage of this complex and sometimes controversial field.

A Christian's Guide to Critical Thinking Henry Virkler, 2006-06-26 Have you ever heard a Bible interpretation or a scientifically based argument that just didn't seem correct? Did you wish you knew how to show that it wasn't true? In a postmodern society, Christians are increasingly confronted with assertions that contradict the principles they believe. They need to be able to critically analyze arguments and know how to refute in a gentle way those assertions that are not true. In order to do this, Christians need three sets of skills: hermeneutical skills to know how to accurately interpret God's Word and be able to correct misinterpretations of Scripture; research design and statistical skills to be able to examine statements about God's world and evaluate whether or not they represent valid conclusions from the data; knowledge of logical fallacies in order to be able to identify when invalid inductive or deductive conclusions were being drawn either from God's Word or from research studies about God's world. This book will help you be able to do the following: know and use valid hermeneutical skills; understand research design and statistical analysis techniques; recognize logical

fallacies and replace them with accurate analyses An excellent resource for pastors Sunday school teachers and group leaders this book is as practical as it is valuable for persons who want to discern truth and refute error in a spirit of love

Critical Thinking and Persuasive Writing for Postgraduates Louise Katz,2018-02-17 This hands on guide to advanced critical analysis and argumentation will help readers to communicate in way that is orderly rigorously supported persuasive and clear It demonstrates how criticality can be paired with creativity to produce an insightful and engaging piece of research and explores how narrative styles and rhetorical devices can be used to boost the persuasiveness of an argument Chapters blend theory with practice and contain a wealth of activities designed to help students put new skills into practice or revitalise those they already have This is an essential resource for postgraduates and advanced undergraduates looking to hone their skills in critical analysis and communicate their ideas with precision and clarity

How to Think in Medicine Milos Jenicek,2018-08-06 Mastery of quality health care and patient safety begins as soon as we open the hospital doors for the first time and start acquiring practical experience The acquisition of such experience includes much more than the development of sensorimotor skills and basic knowledge of sciences It relies on effective reason decision making and communication shared by all health professionals including physicians nurses dentists pharmacists and administrators *How to Think in Medicine Reasoning Decision Making and Communications in Health Sciences* is about these essential skills It describes how physicians and health professionals reason make decision and practice medicine Covering the basic considerations related to clinical and caregiver reasoning it lays out a roadmap to help those new to health care as well as seasoned veterans overcome the complexities of working for the well being of those who trust us with their physical and mental health This book provides a step by step breakdown of the reasoning process for clinical work and clinical care It examines both the general and medical ways of thinking reasoning argumentation fact finding and using evidence It explores the principles of formal logic as applied to clinical problems and the use of evidence in logical reasoning In addition to outline the fundamentals of decision making it integrates coverage of clinical reasoning risk assessment diagnosis treatment and prognosis in evidence based medicine Presented in four sections this book discusses the history and position of the problem and the challenge of medical thinking provides the philosophy interfacing topics of interest for health sciences professionals including the probabilities uncertainties risks and other quantifications in health by steps of clinical work decision making in clinical and community health care research and practice Communication in clinical and community care including how to write medical articles clinical case studies and case reporting and oral and written communication in clinical and community practice and care

Scare Tactics Douglas Walton,2013-06-29 Scare Tactics the first book on the subject provides a theory of the structure of reasoning used in fear and threat appeal argumentation Such arguments come under the heading of the argumentum ad baculum the argument to the stick club traditionally treated as a fallacy in the logic textbooks The new dialectical theory is based on case studies of many interesting examples of the use of these arguments in advertising public

relations politics international negotiations and everyday argumentation on all kinds of subjects Many of these arguments are amusing once you see the clever tactic used others are scary Some of the arguments appear to be quite reasonable while others are highly suspicious or even outrageously fraudulent In addition to the examples taken from logic textbooks other cases treated come from a variety of sources including political debates legal arguments and arguments from media sources like magazine articles and television ads The purpose of this book is to explain how such arguments work as devices of persuasion and to develop a method for analyzing and evaluating their reasonable and fallacious uses in particular cases The book shows how such arguments share a common structure revealing several distinctive forms of argument nested within each other Based on its account of this cognitive structure the new dialectical theory presents methods for identifying analyzing and evaluating these arguments as they are used in specific cases The book is a scholarly contribution to argumentation theory It is written in an accessible style and uses many colorful and provocative examples of fear and threat appeal arguments that are suitable for classroom discussions The matters treated will be of interest to professionals and students in law critical thinking advertising speech communication informal logic cognitive science rhetoric and media studies

A Primer on Clinical Experience in Medicine MD, Milos Jenicek, 2012-08-08 Mastery of quality health care and patient safety begins as soon as we open the hospital doors for the first time and start acquiring practical experience The acquisition of such experience includes much more than the development of sensorimotor skills and basic knowledge of the sciences It relies on effective reasoning decision making and comm

Medical Error and Harm Milos Jenicek, 2010-07-02 Recent debate over healthcare and its spiraling costs has brought medical error into the spotlight as an indicator of everything that is ineffective inhumane and wasteful about modern medicine But while the tendency is to blame it all on human error it is a much more complex problem that involves overburdened systems constantly changing techno

Liberal Education and the Idea of the University Karim Dharamsi, James Zimmer, 2019-05-07 The idea of the university and the idea of liberal education share a family resemblance However it is not always explicitly clear what they have in common and what differentiates them This collection brings together arguments and reflections on the

nature of the university and the place of liberal learning in the 21st century It is divided into two parts In the first part authors examine the values and ideals that shape our understanding of liberal learning and the university in the second part authors consider pedagogies informing our practices asking after what underlying presuppositions when made explicit guide our liberal education classrooms in higher education Unique in its approaches this volume includes defenses of liberal education s intrinsic value the commodification of some of its best ideals as well as utilitarian defenses that challenge some orthodox conceptions of liberal learning and its justifications Each in its own right understands liberal learning as essential to the defense of a democratic order On the pedagogical side included are essays that defend a view of liberal education from the vantage of STEM subjects including architecture as well as those we typically associate with the liberal arts This volume will aid academics and students seeking to better grasp an understanding of liberal education but also those seeking to advance their pedagogical ideas about liberal learning Researchers and students in education higher education and those interested in the liberal arts and sciences will find this volume a useful addition to their collection

The Handbook of Rationality Markus Knauff, Wolfgang Spohn, 2021-12-14 The first reference on rationality that integrates accounts from psychology and philosophy covering descriptive and normative theories from both disciplines Both analytic philosophy and cognitive psychology have made dramatic advances in understanding rationality but there has been

little interaction between the disciplines This volume offers the first integrated overview of the state of the art in the psychology and philosophy of rationality Written by leading experts from both disciplines The Handbook of Rationality covers the main normative and descriptive theories of rationality how people ought to think how they actually think and why we often deviate from what we can call rational It also offers insights from other fields such as artificial intelligence economics the social sciences and cognitive neuroscience The Handbook proposes a novel classification system for researchers in human rationality and it creates new connections between rationality research in philosophy psychology and other disciplines Following the basic distinction between theoretical and practical rationality the book first considers the theoretical side including normative and descriptive theories of logical probabilistic causal and defeasible reasoning It then turns to the practical side discussing topics such as decision making bounded rationality game theory deontic and legal reasoning and the relation between rationality and morality Finally it covers topics that arise in both theoretical and practical rationality including visual and spatial thinking scientific rationality how children learn to reason rationally and the connection between intelligence and rationality
