An open encyclopedia of plant information

There are plenty of sources of plant information online. So what makes Practical Plants different?

It belongs to all of us
Everything is editable by anybody, and licensed under a Creative Commons License to be used by anybody. This is incredibly important for the future as "social" websites claim ownership of our information. The data we create belongs to all of us in common, not any one person or organisation.

A specific focus for a broad audience
It's simple: if a plant has practical uses, inform how to propagate, cultivate, and use it. There is a natural bias towards environmentalism, sustainability, and against chemical agriculture, but the information is widely applicable.

It's practical
Covering edible, material and medicinal uses, design functions, propagation, cultivation, environmental preferences, interactions, subcultures (and so on...) Practical Plants
