**Chen T'ai Chi, Volume 1** Michael DeMarco,2015-08-19 When we think of martial arts in old China we get visions of violent convulsions of dynastic change devastating rebellions civil wars and banditry Throughout the centuries there was a need for masters who possessed highly effective martial skills for positions in the military protection services and law enforcement Out of this historical reality emerged a national treasure we call taijiquan Chen style taijiquan formulated during the days of military strategist Qi Jiguang 1528 1587 and its founder is considered to be militia battalion commander Chen Wangting 1600 1680 The art evolved Its mystique remains fundamentally a true fighting art including bare handed forms and applications plus an arsenal of weapons that includes the spear straight sword broadsword and halberd Then there are the associated training methods used to master this complete system such as qigong push hands and standing post All of these practices are infused with knowledge associated with the physical and mental aspects of the human condition Chen style encompasses a complete martial system It has a deserved reputation for its combative efficiency but also as a health nurturing modality The vastness of the Chen style curriculum is way beyond the

scope of most people to fully learn so practitioners focus on what they can handle Usually a solo routine is sufficient Since all taiji styles stem from the original Chen family system the Chens certainly share in the credit for taiji's popularity in general especially as an exercise purely for health benefits Regardless of taiji style be it Chen Yang Wu Sun Hao or other any serious taiji practitioner or scholar should have some understanding of the Chen family roots to get a vision of the whole tree This two volume anthology brings much of the rich heritage conveniently together for your reading In this first volume prepare yourself to sit at the feet of the main representatives of the Chen Village including Chen Xiaowang Chen XiaoXing and Wang Xi'an Read rare text from Chen Xin a member of the literati who expounded on the inner workings of Chen taiji by utilizing Daoist and traditional medical knowledge In addition to the detailed history and penetrating philosophy you'll find here perhaps of greater importance are the clear explanations outlining each step in the learning process toward mastering Chen style taiji Only a very high level teacher can understand what methods of instruction work best Students don't know that's why they should follow a teacher's instructions as closely as possible Chapters included here clarify what proper training entails and why much time and effort gongfu are necessary to gain results As echoed among practitioners in taiji's birthplace If you drink water from Chen Village your feet know how to kick This two volume edition brings you to the village for traditional instruction     *The Principles and Practice of Taijiquan* Andrew Townsend, 2021-03-30 This is the final installment of The Principles and Practice of Taijiquan series The overarching concept of this five volume series is that the art of taijiquan is governed by a set of guiding principles in conjunction with numerous practical methods for applying those principles This approach to the study and practice of taijiquan pertains to both the civil and the martial aspects of the art When we consider the martial applications of the art we should strive to remain true to these guiding principles even while focusing on the practical methods of self defense This approach is particularly relevant to the study and practice of the weapons of taijiquan Unlike the approach of most external styles of Chinese martial arts in which the emphasis is on speed and the reliance upon muscular strength to overcome an armed opponent with one's own weapon in taijiquan the practitioner must employ his or her weapon according to the principles laid down by the founders of the five major family styles These principles are clearly explained in the first chapter of this volume as they apply to weapons in general Subsequent chapters investigate the particular principles methods for handling and martial applications of each of the following weapons the single straight sword dan jian the broadsword dao the double broadswords shuang jian and the double straight swords shuang jian the double cudgels shuang ji n and the double hook swords shuang gou the short stick bang the fan shang the cane zhang the long pole chang gan the staff gun the spear qiang the halberd guandao the two section staff chang xiao bang As this list indicates the range of weapons trained and practiced within the five family styles is quite extensive Many taijiquan practitioners may only be familiar with the more common weapons such as the straight sword the broadsword and the spear The coverage in this volume is intentionally comprehensive in an attempt to present the full complement of taijiquan

weaponry A separate chapter is provided for each of the weapons identified in the above list with the exception of the double straight swords and the double broadswords which are covered in a single chapter and also the double cudgels and the double hook swords which are likewise addressed in a single chapter For each weapon there are specific sections describing the design and components of the weapon exploring the history and derivation of the weapon the methods for handling and wielding the weapon the classically designated techniques for applying the weapon and multiple examples illustrating the martial applications of the weapon Hopefully this level of detail will serve to further the understanding of those individuals who currently practice one or more weapons of the art For novice practitioners seeking to take up their first weapon or for those who want add another weapon to their arsenal this survey should prove an invaluable tool in assisting them with making such a selection

**The Principles and Practice of Taijiquan** Andrew Townsend, 2019-08-20 This book constitutes the third installment of the five volume series that is collectively titled The Principles and Practices of Taijiquan Volume one deals with the principles and practices of taijiquan as related to the performance of the solo form which many practitioners consider to be the primary activity of taijiquan However as a complete martial art taijiquan includes a number other complementary practices and training methods such as stretching loosening single posture training internal strength training weapons training and martial applications A number of these ancillary training methods are addressed in the second volume of this series This book which is the third volume in the series is relevant to all taijiquan aficionados who want to expand their practice to include pushing hands as an important aspect of the martial art of taijiquan The dual person training activities that are broadly referred to as pushing hands or tuishou in Mandarin bridge the gap between the single person practices such as the solo form single posture training body conditioning and internal strength training on the one hand and true martial applications on the other As explained in this text the practice of pushing hands was initially developed to train practitioners to apply the principles of taijiquan while interacting with another individual As such pushing hands is not intended to directly teach practitioners to employ taijiquan for fighting or self defense This is an important distinction and one which is clearly and repeatedly stated in this volume What this volume does accomplish is to review the principles of taijiquan as they apply to the practice of pushing hands The author takes the position that practitioners engaged in learning pushing hands must adhere to the principles of taijiquan as elucidated in the Taijiquan Classics as well as in the classical literature of taijiquan The text employs copious references from the Classics as well as from such important texts such as Chen Kung s Discourses on Intrinsic Energy the Yang Family Forty Chapters Li Yaxuan s commentaries on pushing hands and Chen Xin s Thirty Six Pushing Hands Sicknesses in order to illustrate how to practice pushing hands according to the principles established by the founders and past masters of taijiquan The book also includes the wisdom and experience of more contemporary authorities on taijiquan in general and pushing hands in particular including insights from Dr Ping Siang Tao s Tai Chi Push Hands and C P Ong s Taijiquan Cultivating Inner Strength to cite two specific references Additional

insights and practical training tips are presented based upon the author's own investigation into this fundamental aspect of taijiquan along with the tips and training methods imparted to the author by his many teachers including his primary teacher Grandmaster Jesse Tsao with whom he has trained for the past fifteen years This volume covers single hand and double hand pushing hands patterns fixed step restricted step and moving step pushing hands along with the progressive development of the skills of sticking following listening interpreting receiving neutralizing and issuing Specific topics include concepts such as maintaining central equilibrium rooting the four sides techniques the four corners techniques the five steps the six directions using consciousness rather than strength giving up oneself to follow the other knowing yourself and knowing your opponent storing and releasing alternating soft and hard employing silk reeling energy the secret of the free circle employing momentum and leverage controlling the opponent without being controlled and issuing internal power fajin

**Taijiquan: Masters and Methods** Davidine Sim,2018-08 Few arts are more misunderstood in today's fast paced digital age than Taijiquan Typically it is represented in one of two diametrically opposed but equally misleading ways In the world of martial arts movies Taijiquan masters are portrayed as almost supernatural individuals capable of defeating opponents with little more than a touch Alternatively it has come to be viewed as the slow and simple exercise practised by old people in the park as they try to hang on to some degree of mobility and suppleness Neither depiction is adequate Chen Taijiquan is one of China's most ancient fighting systems with an unbroken lineage stretching back almost 400 years While today many people look exclusively towards the health and exercise benefits of the system the true face of traditional Taijiquan is its unique method of developing martial skill Like all traditional South East Asian martial arts it combines high levels of self discipline

spiritual awareness and combat skills Perhaps more than any other discipline Taijiquan presents a seamless integration of philosophy and martial arts Chen Taijiquan Masters and Methods is the third book by Davidine Siaw Voon Sim and David Gaffney It is the product of some two decades of ongoing research into the oldest of the five traditional schools of Taijiquan Involving more than twenty visits to China as well as trips to South East Asia and throughout Europe to experience and document the insights of some of the foremost elder practitioners of Chen Taijiquan including the late Feng Zhiqiang a senior disciple of the legendary seventeenth generation master Chen Fake Chen Xiaoxing Principal of the Chenjiagou Taijiquan School Chen Xiaowang Chen Zhenglei Wang Xian and Zhu Tiancai often collectively referred to the Four Buddha s Warriors of Chenjiagou Chen Yu the Beijing based son of the eighteenth generation master Chen Zhaokui and Yu Gongbao author of the world s first dictionary of Taijiquan and China s first Professor of Taijiquan Chen Taijiquan Masters and Methods draws together a record of the teachings of a generation of Chen Taijiquan masters who still had a foot in previous times before the commercialisation and mass propagation of Taijiquan A time when the discipline was passed orally from one generation to the next reflecting it s importance as a means for defending self family and community It enables the reader to join a conversation with some of the great masters of Chen Taijiquan and take away fascinating insights into the true nature of the system Taken together their words present a clear exposition of the theoretical and practical standards which define and shape the art
