Evidence-Based Practice Manual Albert R. Roberts, Kenneth Yeager, 2004-01-15 This book provides an interdisciplinary approach summarising the key elements issues concepts and procedures in developing and applying evidence based practice Discussions include programme evaluation quality and operational improvement strategies research grant applications utilising statistical procedures and more *Reshaping Theory in Contemporary Social Work* William Borden, 2009-11-05 William Borden's persuasive collection of original essays reaffirms the place of theory in social work practice showing how different theoretical models therapeutic languages and modes of intervention strengthen eclectic and integrative approaches to psychosocial intervention A distinguished group of scholars and practitioners examine emerging developments in cognitive theory psychodynamic thought resilience research and family therapy psychobiography and narrative perspectives and conceptions of place and environment in psychosocial intervention They introduce integrative frameworks for intervention and examine a series of crucial issues in the field including the role of theory in evidence based practice the development of practice wisdom and the ways in which conceptions of love acceptance and social justice influence theorizing and practice The contributors to this volume each one carefully selected reaffirm the framing perspectives and core values of the social work profession and identify fundamental challenges and tasks in developing theory and practice Exploring contemporary yet no less essential concerns they reflect the richness and creativity of theorizing in our time From Child Welfare to Child Well-Being Sheila Kamerman, Shelley Phipps, Asher Ben-Arieh, 2009-10-23 This chapter provides a brief overview of the book highlighting the modest progress from child welfare to child well being reflected in these chapters and the parallel movement in Kahn's career and research as his scholarship developed over the years It then moves to explore the relationship between two overarching themes child and family policy stressing a universal approach to children and social protection stressing a more targeted approach to disadvantaged and vulnerable individuals including children and the complementarity of these strategies Introduction To a large extent Alfred J Kahn was at the forefront of the developments in the field of child welfare services protective services foster care adoption and

family preservation and support. Over time his scholarship moved to a focus on the broader policy domain of child and family policy and the outcomes for child wellbeing. His work as is true for this volume progressed from a focus on poor disadvantaged and vulnerable children to a focus on all children. He was convinced that children by definition are a vulnerable population group and that targeting all children employing a universal policy as a strategy would do more for poor children than a narrowly focused policy targeted on poor children alone. As we first argued more than three decades ago: Not for the Poor Alone: Universalism and Income Testing in Family Policy: one could target the most disadvantaged within a universal framework and this would lead to more successful results than targeting only the poor.

Evidence-based Practice - Modernising the Knowledge Base of Social Work? Hans-Uwe Otto, Andreas Polutta, Holger Ziegler, 2009-06-04 The quest to create an evidence based Social Work practice is emerging strongly in different fields of Social Work and social policy. In this volume internationally renowned proponents and opponents of this approach deliver profound analyses of the meaning and implications of an evidence based perspective which clearly challenges the nature of the knowledge base of the established Social Work practice and apparently reevaluates and reshapes the character of welfare professionalism.
