Practicing Sociologists Wanted Working:

Event Theory for a Sociology of Practice Frank Hillebrandt, 2025-05-22 The sociological theory of practices developed in this book from the concept of the event compels us to question how practices not only chain into forms of practice The approach also allows us to see how these practices give rise to practice formations that manifest as enduring zones of intensity within society This very problem is at the center of the considerations pursued here and is unfolded through an analysis of pop music as a formation of practice As an exemplary case study the author chooses the Love and Peace Festival on Fehmarn from the year 1970 In doing so the book brings to life a period of pop music that has much more to do with our present than it may seem at first glance

Sociologists Backstage Sarah Fenstermaker, Nikki Jones, 2011-04-27 Published social science rarely gives real attention to the actual doing of research making the process appear magical or at least self evident and simple This book is intended to right the balance by illuminating the craft and the choices made as the research process unfolds for the sociologist The metaphorical image of going backstage speaks to the reader's experience with each of the seventeen interviews which illuminate the choices and constraints of researchers as well as unanticipated developments good and bad The volume represents a range of interests themes research philosophies and approaches from a diverse group of contributors Particularly suited for advanced undergraduate and graduate research methods students the volume addresses virtually all of the most vexing methods questions through accessible and compelling first hand descriptions of sociological research The volume is an invaluable addition to the library of all social science researchers From the Foreword by Howard Becker The stories in *Sociologists Backstage* tell how the contributors who differ in so many ways dealt with the situations they found themselves in as they did their research and how who they were and what they had become in their lives intersected with those situations The stories will fascinate you and give you a lot to think about as you go ahead with your own research adventure

Discourse : Event : Practice Franka Schäfer, 2025-10-14 With *Discourse Event Practice* the author presents a dynamic theoretical program for a discourse theoretically informed sociology of practice oriented toward the concept of the event She outlines the sociological relationship between the concepts of discourse event and practice diagnoses their distorted relationship and explains the dynamization of dichotomous conceptions as the guiding principle of her argumentation Through a reconstruction of the discourse theoretical foundations the practical theoretical conditions the situation of the method discussion and the starting point of sociological protest research she forms the basis of the research program and marks the question of the association of discourses and practices as a gap which is elucidated using the example of protest research The core of the book is a nuanced examination of the concept of event developed from the influence of Foucault as a primary basis for transformation and translated into a concept of event that ensures a relationship between discourse and practice that overcomes dichotomies within a post structuralist materialism In addition the potential of the program lies in the expansion of practice studies to include an explicit perspective on power and

domination illustrated through an analysis of the practices of resistance as exemplified by the Yippie Festival of Life
