Pragmatics Of Discourse Anaphora In English Evidence From Conversational Repair:

The Pragmatics of Discourse Anaphora in English Ronald Geluykens, 1994 The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other The TiEL series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics The Pragmatics of Discourse Anaphora in English Ronald Geluykens, 2013-08-26 No detailed description available for The Pragmatics of Discourse Anaphora in English

Computational and Conversational Discourse Eduard H. Hovy, Donia R. Scott, 2013-06-29 People engage in discourse every day from writing letters and presenting papers to simple discussions Yet discourse is a complex and fascinating phenomenon that is not well understood This volume stems from a multidisciplinary workshop in which eminent scholars in linguistics sociology and computational linguistics presented various aspects of discourse The topics treated range from multi party conversational interactions to deconstructing text from various perspectives considering topic focus development and discourse structure and an empirical study of discourse segmentation The chapters not only describe each author's favorite burning issue in discourse but also provide a fascinating view of the research methodology and style of argumentation in each field

Concise Encyclopedia of Pragmatics J.L. Mey, 2009-08-07 Concise Encyclopedia of Pragmatics Second Edition COPE is an authoritative single volume reference resource comprehensively describing the discipline of pragmatics an important branch of natural language study dealing with the study of language in its entire user related theoretical and practical complexity As a derivative volume from Encyclopedia of Language and Linguistics Second Edition it comprises contributions from the foremost scholars of semantics in their various specializations and draws on 20 years of development in the parent work in a compact and affordable format Principally intended for tertiary level inquiry and research this will be invaluable as a reference work for undergraduate and postgraduate students as well as academics inquiring into the study of meaning and meaning relations within languages As pragmatics is a centrally important and inherently cross cutting area within linguistics it will therefore be relevant not just for meaning specialists but for most linguistic audiences Edited by Jacob Mey a leading pragmatics specialist and authored by experts The latest trends in the field authoritatively reviewed and interpreted in context of related disciplines Drawn from the richest most authoritative comprehensive and internationally acclaimed reference resource in the linguistics area Compact and affordable single volume reference format *From Discourse Process to Grammatical Construction* Ronald Geluykens, 1992-10-16 This study deals with interactional processes in conversational discourse and the way they may get syntacticized into grammatical constructions It investigates the link between discourse function and syntactic form and the ways in which grammatical form is a reflection on communicative function through examining the communicative functions of Left Dislocation in English The investigation is corpus based and

focuses on spontaneous conversation but other discourse types are also taken into account The overall perspective is resolutely empirical and preconceptions about the possible functions of Left Dislocation are avoided Contents 1 Theoretical preliminaries 2 Referent introduction 1 interaction 3 Referent introduction 2 recoverability 4 Referent introduction 3 topicality 5 Other functions of LD 6 Prosodic aspects of LD 7 LD in other discourse types 8 A broader perspective 9 General conclusion Notes Appendices References Subject and author indices **Alternative Linguistics** Philip W. The papers in this volume were presented at the Fifth Biennial Symposium of the Department of Linguistics Rice University March 1993 The participants were asked to concentrate in depth and in a self reflective way upon some range of data The intent was multifold The first purpose was descriptive It was expected that the participants would carry out their task in a retrospective way exemplifying and building upon their previous work but it was also expected that they would begin to demonstrate the configuration of some area in a more comprehensive picture of language The point was to take at least one substantive step in the depiction of what we think language will ultimately be like The contributions were both specific and generalizing with focus as much upon methodology as upon hypotheses about language In examining descriptive practice we continued to concentrate upon issues which concerned us all and at the same time we tried to advance the discourse by the results of such description We hoped that problematic and recalcitrant data would make our own practice clearer to us and that it might also instruct us in the refinement of our conceptions of language *Interactional Linguistics* Elizabeth

Couper-Kuhlen, Margret Selting, 2018 Reviewing recent findings on linguistic practices used in turn construction and turn taking repair action formation and ascription sequence and topic organization the book examines the way linguistic units of varying size sentences clauses phrases clause combinations particles are mobilized for the implementation of specific actions in talk in interaction A final chapter discusses the implications of an interactional perspective for our understanding of language as well as its variation diversity and universality Supplementary online chapters explore additional topics such as the linguistic organization of preference stance footing and storytelling as well as the use of prosody and phonetics and further practices with language **Encyclopedia of Language and Linguistics**, 2005-11-24 The first edition of ELL 1993

Changing the Topic: An Interactional Linguistics Analysis of Topic Flow in English Conversation Ronald

Geluykens, 2025-06-09 This book presents an in depth analysis of how discourse topics are introduced maintained and closed in British English conversation It highlights the crucial role of real time negotiation and turn taking in ensuring cohesive topic flow Using an inductive bottom up approach the book explores topicality through an operational definition grounded in the traditional Discourse Analysis DA concept of given versus new information This operational framework is used to identify potential topic shifts and is complemented by a detailed micro analysis of interactional sequences Inspired by Conversation Analysis CA it investigates how topics are negotiated trouble spots are resolved and cohesion is collaboratively achieved The combination of DA and CA methodology combined with its attention to the linguistic resources employed by participants explores an exciting new area of Interactional Linguistics The book offers future avenues for potential contrastive studies on topic flow which take into account regional social typological stylistic and diachronic variation It is of interest to researchers working in the fields of information flow conversational interaction and functional linguistics in general Its theoretical apparatus contributes to a clearer understanding of the elusive notion of topicality

NP-Anaphora in Modern Greek

Michael Chiou, 2010-01-08 Anaphora is one of the most fascinating linguistic phenomena as it constitutes a unique and universal property of human language Every single natural language provides linguistic means which facilitate speakers to refer to entities in the world The understanding of the complexity of anaphora and of the problems surrounding it will ameliorate our understanding of the nature of human languages This explains why anaphora constitutes a central research topic in contemporary linguistic science This study examines the phenomenon of NP anaphora with the main focus on modern Greek By maintaining the empirical and theoretical benefits of the classical generative approach to binding in this study we propose a partial pragmatic reduction of the interpretation of NP anaphora in modern Greek in terms of the neo Gricean pragmatic principles of communication The proposed analysis is articulated on the following basis it is argued that the choice of anaphoric expressions and their interpretation by Greek speakers and addressees respectively is heavily

dependent on preference which is regulated by principles of language use and communication Therefore by employing a model which is based on the systematic interaction of the neo Gricean pragmatic principles of communication we provide a neat and more elegant approach to NP anaphora resolution for modern Greek In a nutshell this study offers a quite new perspective into the study of NP anaphora in modern Greek but it is also a little step towards a better understanding of the phenomenon of anaphora across languages

Coherence in Spoken and Written Discourse Wolfram Bublitz, Uta Lenk, Eija Ventola, 1999-06-15 Until very recently coherence unlike cohesion was widely held to be a rather mystical notion However taking account of new trends representing a considerable shift in orientation this volume aims at helping relieve coherence of its mystifying aura The general bibliography which concludes the book bears witness to this intriguing development and the rapidly changing scene in coherence research Preceding this comprehensive up to date Bibliography on Coherence are 13 selected papers from the 1997 International Workshop on Coherence at the University of Augsburg Germany They share a number of theoretical and methodological assumptions and reflect a trend in text and discourse analysis to move away from reducing coherence to a product of formally represented cohesion and or semantically established connectivity Instead they start from a user and context oriented interpretive understanding and rely on authentic data throughout in relating micro linguistic to macro linguistic issues The first group of papers looks at the re creation of coherence in inter alia reported speech casual conversation argumentative writing news reports and conference contributions The second group describes the negotiation of coherence in oral examinations text summaries and other situations that require special efforts on the part of the recipient to overcome misunderstandings and other disturbances The third group discusses theoretical approaches to the description of coherence

Time and Emergence in Grammar Simona Pekarek Doehler, Elwys De Stefani, Anne-Sylvie Horlacher, 2015-12-15 This monograph examines how language contributes to the social coordination of actions in talk in interaction Focusing on a set of frequently used constructions in French left dislocation right dislocation topicalization and hanging topic the study provides an empirically rich contribution to the understanding of grammar as thoroughly temporal emergent and contingent upon its use in social interaction Based on data from a range of everyday interactions the authors investigate speakers use of these constructions as resources for organizing social interaction showing how speakers continuously adapt revise and extend grammatical trajectories in real time in response to local contingencies The book is designed to be both informative for the specialized scholar and accessible to the graduate student familiar with conversation analysis and or interactional linguistics

Constructions Peter Auer, Stefan Pfänder, 2011-08-29 This volume embarks on an exploration of the processual and dynamic character of grammatical constructions in emergence both from an emergent and an emerging perspective Emerging constructions develop out of their discourse contexts Talking of emerging constructions is compatible with a view of grammar as a stable system of rules and structures which may emerge i e come into existence out of a pool of previously unordered elements

Emergent constructions on the contrary are due to the on line production of grammar in time The term emergent emphasises the fact that a grammatical structure is always temporary and ephemeral In both senses grammar is modelled as a highly adaptive resource for interaction On the basis of empirical studies on spoken English German Hebrew Swedish and French the volume addresses the following questions How can what initially appears to be construction x end up being construction y in on line syntax What are the local interactional needs which such processes respond to in the process of their emergence Does the on line re modelling of a construction concern its syntactic or semantic side or both And finally Should emergent grammatical structures as they unfold in real time be seen as stages in the emerging of grammar

The Oxford Handbook of English Grammar Bas Aarts, Jill Bowie, Gergana Popova, 2020 This handbook provides an authoritative critical survey of current research and knowledge in the grammar of the English language The volume's expert contributors explore a range of core topics in English grammar covering a range of theoretical approaches and including the relationship between core grammar and other areas of language

Discourse Markers and (Dis)fluency Ludivine Crible, 2018-04-15 Spoken language is characterized by the occurrence of linguistic devices such as discourse markers e.g. so, well, you know, I mean and other so called disfluent phenomena which reflect the temporal nature of the cognitive mechanisms underlying speech production and comprehension The purpose of this book is to distinguish between strategic vs symptomatic uses of these markers on the basis of their combination function and distribution across several registers in English and French Through deep quantitative and qualitative analyses of manually annotated features in the new DisFrEn corpus this usage based study provides i. an exhaustive portrait of discourse markers in English and French and ii. a scale of disfluency against which different configurations of discourse markers can be diagnosed as rather fluent or disfluent By bringing together discourse markers and disfluency under one coherent framework this book is a unique contribution to corpus based pragmatics discourse analysis and crosslinguistic fluency research

Cross-Cultural Pragmatics Juliane House, Dániel Z. Kádár, 2021-09-30 This book provides a cutting edge introduction to cross cultural pragmatics a field encompassing the study of language use across linguacultures Cross Cultural Pragmatics is relevant for a variety of fields such as pragmatics applied linguistics language learning and teaching translation intercultural communication and sociolinguistics Written by two leading scholars in the field this book offers an accessible overview of cross cultural pragmatics by providing insights into the theory and practice of systematically comparing language use in different cultural contexts The authors provide a ground breaking language anchored strictly empirical and replicable framework applicable for the study of different datatypes and situations The framework is illustrated with case studies drawn from a variety of linguacultures such as English Chinese Japanese and German In these case studies the reader is provided with contrastive analyses of language use in important contexts such as globalised business politics and classrooms This book is essential reading for both academics and students

Main Processes of Thematization and Postponement in English Maria Martinez Lirola, María D. Martínez Lirola, 2009 The

purpose of this book is to describe the main formal and functional characteristics of all the syntactic processes of thematization and postponement in English. It describes in detail the main aspects of cleft sentences, reversed pseudo cleft sentences, topicalization, inversion, left dislocation, passive, extraposition, existential sentences, pseudo cleft sentences, postposition and right dislocation. The main aspects of use will be illustrated with examples from three novels written by the South African writer Alan Paton. The book is divided into three main chapters: the first one is a general introduction which explains some general concepts related to word order, the corpus of examples and to Alan Paton, the author of the novels chosen as a corpus of examples; the second chapter is devoted to the syntactic processes of thematization in English and the third one to the syntactic processes of postponement.

Routledge Dictionary of Language and Linguistics Hadumod Bussmann, 2006-02-20. The Routledge Dictionary of Language and Linguistics is a unique reference work for students and teachers of linguistics. The highly regarded second edition of the *Lexikon der Sprachwissenschaft* by Hadumod Bussmann has been specifically adapted by a team of over thirty specialist linguists to form the most comprehensive and up to date work of its kind in the English language. With its term based approach and emphasis on clear analysis it complements perfectly Routledge's established range of reference material in the field of linguistics.

The Routledge Handbook of Chinese Discourse Analysis Chris Shei, 2019-01-14. Chinese is a discourse oriented language and the underlying mechanisms of the language involve encoding and decoding so the language can be correctly delivered and understood. To date there has been a lack of consolidation at the discourse level such that a reference framework for understanding the language in a top down fashion is still underdeveloped. The Routledge Handbook of Chinese Discourse Analysis is the first to showcase the latest research in the field of Chinese discourse analysis to consolidate existing findings, put the language in both theoretical and socio functional perspectives, offer guidance and insights for further research and inspire innovative ideas for exploring the Chinese language in the discourse domain. The book is aimed at both students and scholars researching in the areas of Chinese linguistics and discourse analysis.
