The Presence of the Past in Politics Heino Nyyssönen, 1999 **Hungary since 1945** Árpád von Klimó, 2017-12-14

Lying on the political fault line between East and West for the past seventy five years the significance of Hungary in geopolitical terms has far outweighed the modest size of its population This book charts the main events of these tumultuous decades including the 1956 Uprising the end of Hungarian communism entry into the European Union and the rise to power of Viktor Orbán and the national conservative ruling party Fidesz **Magyars and Political Discourses in the New Millennium** Melinda Kovács, 2014-11-20 In this book Melinda Kovács analyzes various areas of Hungarian political discourse newspapers party websites informational books on the EU and government produced brochures sent to all households in Hungary The inquiry is supported by an understanding of politics as achieving and negotiating change in discourse which is not to be equated with simple language use In addition to language discourse also encompasses the meanings shared by members of a political community along with the conventions of what is possible or plausible in politics In the case of Hungary at the start of the twenty first century it is quite plausible to promote ethno nationalism and it is quite possible to understand Hungarian political community in terms of historical references different from or devoid of communism and post communism An exploration of discourses generated between 1999 and 2013 reveals that while political developments in recent years have been a cause for legitimate concern Hungarian political discourse has been making these developments plausible Catholics and Political Violence in the Twentieth Century Lucia Ceci, 2024-10-14 Catholics and Political Violence in the Twentieth Century presents a historical reconstruction of the ways in which Catholics have justified the recourse to political violence during the twentieth century a period marked by major wars nationalisms decolonization ideological clashes and episodes of genocide Legitimation processes are particularly complex when this violence is not endorsed by the state and perhaps used against it Depending on perspective the protagonists of this radical form of collective action may be seen as terrorists or freedom fighters Written by a leading historian of contemporary Catholicism this book examines a series of case studies from different parts of the world selected because of the central role played by the Catholic religion They range from Northern Ireland to the Basque Country from the Philippines to Colombia and from Mexico to Rwanda It highlights how theological sources paradigms of martyrdom and symbols of the Christian tradition have provided a catalogue of reasons to give moral value to violence and promote it in the name of God By looking at the history of Catholicism in global terms and adopting a transnational perspective Catholics and Political Violence in the Twentieth Century sheds a critical light on the themes that are crucial to understanding the relationship between religion and violence It will appeal to scholars and students working and studying in the fields of Modern and Contemporary History Religious Studies Terrorism Studies Cultural and Global Studies Intellectual History and the History of Political Thought *Fabricating Authenticity in Soviet Hungary* Péter Apor, 2015-03-01 This book explores the memory of the First Hungarian Soviet Republic of 1919 which proved

crucial for communist Hungarian political culture in the twentieth century Apor approaches the topic in an innovative way focusing on the understudied aspects of European memory cultures Offering great insights on how a dictatorship remembers and the concept of authenticity Apor's study integrates the broad range of processes through which history is sought to be rendered authentic The volume successfully reveals the crooked history of the retrospective revisions of the iconic First Republic between the years of its 30th and 40th anniversary 1949 and 1959

Narrating, Doing, Experiencing Annikki Kaivola-Bregenhøj, Barbro Klein, Ulf Palmenfelt, 2006-06-15 How do people tell of experiences things and events that mean a lot to them and are unforgettable Eight Nordic folklorists here examine personal experience stories and the way they are narrated in an attempt to gain an understanding of the people behind them and to reveal how these people handle their history their lives and their cultural memory All the articles are based on interviews and narrator researcher collaboration The stories tell about birth sickness and miraculous cures intergenerational relations war and matters not normally talked about The analyses complement one another and the work may be used as a university course book

Remains of Socialism Maya Nadkarni, 2020-07-15 In *Remains of Socialism* Maya Nadkarni investigates the changing fates of the socialist past in postsocialist Hungary She introduces the concept of remains both physical objects and cultural remainders to analyze all that Hungarians sought to leave behind after the end of state socialism Spanning more than two decades of postsocialist transformation *Remains of Socialism* follows Hungary from the optimism of the early years of transition to its recent right wing turn toward illiberal democracy Nadkarni analyzes remains that range from exiled statues of Lenin to the socialist era Bambi soda and from discredited official histories to the scandalous secrets of the communist regime's informers She deftly demonstrates that these remains were far more than simply the leftovers of an unwanted past Ultimately the struggles to define remains of socialism and settle their fates would represent attempts to determine the future and to mourn futures that never materialized

Conservatism and Memory Politics in Russia and Eastern Europe Katalin Miklóssy, Markku Kangaspuro, 2021-12-13 This book discusses the diverse practices and discourses of memory politics in Russia and Eastern Europe It argues that currently prevailing conservatism has a long tradition which continued even in Communist times and is different to conservatism in the West which can accommodate other viewpoints within liberal democratic systems It considers how important history is for conservatism and how history is reconstituted according to changing circumstances It goes on to examine in detail values which are key to conservatism such as patriotism Christianity and religious life and the traditional model of the family the importance of the sovereign national state within globalization and the emphasis on a strong paternal state featuring hierarchy authority and political continuity The book concludes by analysing how far states in the region are experiencing a common trend and whether different countries conservative narratives are reinforcing each other or are colliding

Challenges to Democracy Sten Berglund, 2001-01-01 The book is written in a systematic clear and accessible style and provides an excellent introduction to the state of democracy in

contemporary postsocialist Europe Recommended for undergraduate graduate research and faculty collections P Rutland Choice The euphoria evidenced in the aftermath of the collapse of communist regimes in the late 1980s and early 1990s sometimes conveyed the impression that the process of democratization would be achieved without difficulty or tribulation This book sets out to provide a thorough comparative analysis of the challenges which face the emerging democracies of Central and Eastern Europe and considers the impact of political change Drawing heavily on available survey data the book provides an in depth account of how the new democracies of Central and Eastern Europe have coped with four major challenges political fragmentation nationalism lack of respect for human rights and poorly developed civil service systems The book demonstrates that although the first few years of the 1990s were marked by increasing disenchantment with the new regimes the change of governments as a direct result of the electoral process and the prospects for European integration have served to reverse this negative trend Indeed the authors find that the new political systems have managed to cope with the challenges so effectively that striking similarities with Western democracies are now apparent

Narrating, Doing, Experinecing Annikki Kaivola-Bregenhøj, Klein Barbro, Palmenfelt Ulf, 2018-11-01 How do people tell of experiences things and events that mean a lot to them and are unforgettable Eight Nordic folklorists here examine personal experience stories and the way they are narrated in an attempt to gain an understanding of the people behind them and to reveal how these people handle their history their lives and their cultural memory All the articles are based on interviews and narrator researcher collaboration The stories tell about birth sickness and miraculous cures intergenerational relations war and matters not normally talked about The analyses complement one another and the work may be used as a university course book

History and memory Geoffrey Cubitt, 2013-01-18 In recent years memory has become a central though also a controversial concept in

historical studies a term that denotes both a new and distinctive field of study and a fresh way of conceptualizing history as a field of inquiry more generally This book which is aimed both at specialists and at students provides historians with an accessible and stimulating introduction to debates and theories about memory and to the range of approaches that have been taken to the study of it in history and other disciplines Contributing in a wide ranging way to debate on some of the central conceptual problems of memory studies the book explores the relationships between the individual and the collective between memory as survival and memory as reconstruction between remembering as a subjective experience and as a social or cultural practice and between memory and history as modes of retrospective knowledge

Lustration and Transitional Justice Roman David, 2011-09-21 How do transitional democracies deal with officials who have been tainted by complicity with prior governments Should they be excluded or should they be incorporated into the new system In Lustration and Transitional Justice Roman David examines major institutional innovations that developed in Central Europe following the collapse of communist regimes While the Czech Republic approved a lustration vetting law based on the traditional method of dismissals Hungary and Poland devised alternative models that granted their tainted officials a second chance in exchange for truth David classifies personnel systems as exclusive inclusive and reconciliatory they are based on dismissal exposure and confession respectively and they represent three major classes of transitional justice David argues that in addition to their immediate purposes personnel systems carry symbolic meanings that help explain their origin and shape their effects In their effort to purify public life personnel systems send different ideological messages that affect trust in government and the social standing of former adversaries Exclusive systems may establish trust at the expense of reconciliation while inclusive and reconciliatory systems may promote both trust and reconciliation In spite of its importance the topic of inherited personnel has received only limited attention in research on transitional justice and democratization Lustration and Transitional Justice is the first attempt to fill this gap Combining insights from cultural sociology and political psychology with the analysis of original experiments historical surveys parliamentary debates and interviews the book shows how perceptions of tainted personnel affected the origin of lustration systems and how dismissal exposure and confession affected trust in government reconciliation and collective memory

Democracy and Myth in Russia and Eastern Europe Alexander Wöll, Harald Wydra, 2007-10-18 In the absence of democratic state institutions eastern European countries were considered to possess only myths of democracy Working on the premise that democracy is not only an institutional arrangement but also a civilisational project this book argues that mythical narratives help understanding the emergence of democracy without democrats Examining different national traditions as well as pre communist and communist narratives myths are seen as politically fabricated programmes of truth that form and sustain the political imagination Appearing as cultural literary or historical resources myths amount to ideology in narrative form which actors use in political struggles for the sake of achieving social compliance and loyalty with the authority of new political forms Drawing on a wide range of case

studies including Ukraine Russia Poland Hungary and Czechoslovakia this book argues that narratives about the past are not simply legacies of former regimes but have actively shaped representations and meanings of democracy in the region Taking different theoretical and methodological approaches the power of myth is explored for issues such as leadership collective identity formation literary representation of heroic figures cultural symbolism in performative art as well as on the constitution of legitimacy and civic identity in post communist democracies *National Rhetorics in the Syrian Immigration Crisis* Clarke Rountree, Jouni Tilli, 2019-10-01 The Syrian refugee crisis seriously challenged countries in the Middle East Europe the United States and elsewhere in the world It provoked reactions from humanitarian generosity to anti immigrant warnings of the destruction of the West It contributed to the United Kingdom s Brexit from the European Union and the election of Donald Trump as president of the United States This book is a unique study of rhetorical responses to the crisis through a comparative approach that analyzes the discourses of leading political figures in ten countries including gateway destination and tertiary countries for immigration such as Turkey several European countries and the United States These national discourses constructed the crisis and its refugees so as to welcome or shun them in turn shaping the character and identity of the receiving countries for both domestic and international audiences as more or less humanitarian nationalist Muslim friendly Christian and so forth This book is essential reading for scholars wishing to understand how European and other countries responded to this crisis discursively constructing refugees themselves and an emerging world order

Discourse, Culture and Organization Tomas Marttila, 2018-09-22 This edited volume brings together leading international researchers from across the social sciences to examine the theoretical premises methodological options and critical potentials of the Essex School of discourse analysis founded on the work of Ernesto Laclau and Chantal Mouffe In doing so it presents a clear picture of a poststructuralist and post foundational research program to postdisciplinary discourse research Divided into three parts it begins by elaborating the ontological theoretical and methodological foundations of the Essex School s approach to discourse analysis The second part provides empirical case studies showing how the Essex School research program informs and instructs empirical discourse research In the concluding third part authors explain how and with what possible consequences this strand of discourse research contributes to social practices of critique It offers a crucial contribution to the further methodologization and operationalization of the Essex School s approach so as to make it a viable alternative to discourse analytical approaches that take dominant positions in today s field of discourse studies The book s transdisciplinary focus will attract readers who use discourse analysis in all areas of the social sciences and humanities particularly applied linguistics cultural anthropology sociology philosophy and history National Narcissism Eric Beckett Weaver, 2006 *National Narcissism* offers a groundbreaking anthropological and sociological approach to nationalism through an expos of the belief systems and psychology of extreme nationalists for whom nationalism is a form of religion This theoretical approach is illustrated with examples primarily taken from Hungary with a special focus in two

chapters on the role of gender in nationalism The state of politics and society in Hungary is also examined in a way that steps beyond the usual simplistic flat narratives of what Hungarians are like by stressing the broad variety of viewpoints current in Hungarian society the milieu in which a small minority of extreme nationalists are able to make their voice heard out of proportion to their numbers or political support The theory offered by National Narcissism has wide ranging implications for the future study of extremist nationalism in nation states throughout the world Sociologists anthropologists nationalism studies specialists social psychologists and historians of the recent past in Hungary will find that this theoretical book richly illustrated with examples from Hungarian society challenges positive and negative stereotypes about nationalism extremism post communism central and eastern Europe the European Union and not least about Hungarians themselves The Birth and Death of Liberal Democracy in Hungary Emilia Palonen,2025-07-30 The Birth and Death of Liberal Democracy in Hungary explores the transformation of Hungary s political landscape in the post communist era and demonstrates how political populism and polarisation became mainstream in the country How did a nation once regarded as a model of democratic transition become an electoral autocracy and an exemplar for populist illiberal post liberal and radical right leaders across the globe In the book Emilia Palonen critiques the simplistic use of terms such as populism and illiberalism emphasising the importance of understanding the relational and performative nature of political discourse She highlights how populist logic framing politics as a struggle between the people and the elite has fuelled polarisation and eroded democratic engagement The Hungarian case illustrates that populism and polarisation are not external threats to democracy but can arise from within it Prime Minister Viktor Orb n s consolidation of power was not the result of a sudden authoritarian takeover but rather the outcome of long term political polarisation and widespread public disillusionment with democracy This shift was enabled by the failures of left wing parties and a growing public appetite for stability even at the expense of democratic norms Palonen draws particularly on Ernesto Laclau s theory of populism to argue that political polarisation is not merely a reflection of societal divisions but a strategic logic of political meaning making This hegemonic polarisation fosters rigid political identities and antagonisms making constructive democratic debate increasingly difficult Rather than focusing solely on demographic or interest based divisions Palonen emphasises the role of affect identification and rhetorical articulation in shaping political subjectivities The global rise of populism is contextualised within this framework Palonen stresses that populism is not a model of governance but a style of mobilisation that fills the symbolic void at the heart of democracy Ultimately the book calls for a rethinking of democratic theory and practice advocating for an agonistic model of democracy in which political contestation is embraced rather than suppressed It warns that polarisation though often attributed to populist leaders is sustained by both sides of the political spectrum and reflects deeper structural and discursive dynamics *Local Memories in a Nationalizing and Globalizing World* M. Beyen,B. Deseure,2015-03-10 In historical studies collective memory is most often viewed as the product of nationalizing strategies carried out by political

lites in the hope to create homogeneous nation states In contrast this book asserts that collective memories develop out of a never ending triangular negotiation between local national and transnational actors From Socialist to Post-Socialist Cities Alexander C. Diener, Joshua Hagen, 2016-04-14 The development of post socialist cities has become a major field of study among critical theorists from across the social sciences and humanities Originally constructed under the dictates of central planners and designed to serve the demands of command economies post socialist urban centers currently develop at the nexus of varied and often competing economic cultural and political forces Among these nationalist aspirations previously simmering beneath the official rhetoric of communist fraternity and veneer of architectural conformity have emerged as dominant factors shaping the urban landscape This book explores this burgeoning field of research through detailed cases studies relating to the cultural politics of architecture urban planning and identity in the post socialist cities of Eurasia This book was published as a special issue of Nationalities Papers
