Writing, Authorship and Photography in British Literary Culture, 1880 - 1920 Emily Ennis, 2022-03-24 At the turn of the 20th century printing and photographic technologies evolved rapidly leading to the birth of mass media and the rise of the amateur photographer Demonstrating how this development happened symbiotically with great changes in the shape of British literature Writing Authorship and Photography in British Literary Culture 1880 1920 explores this co evolution showing that as both writing and photography became tools of mass dissemination literary writers were forced to re evaluate their professional and personal identities Focusing on four key authors Thomas Hardy Bram Stoker Joseph Conrad and Virginia Woolf each of which had their own private and professional connections to photographs this book offers valuable historical contexts for contemporary cultural developments and anxieties At first establishing the authors response to developing technologies through their non fiction personal correspondences and working drafts Ennis moves on to examine how their perceptions of photography extend into their major works of fiction A Laodicean Dracula The Secret Agent The Inheritors and The Voyage Out Reflecting on the first graphic revolution in a world where text and image are now reproduced digitally and circulated en masse and online Ennis redirects our attention to when image and text appeared alongside each other for the first time and the crises this sparked for authors how they would respond to increasingly photographic depictions of everyday life and in turn how their writing adapted to a distinctly visual mass media **Virginia**

Woolf's Common Reader Katerina Koutsantoni, 2016-02-11 In the first comprehensive study of Virginia Woolf's Common Reader Katerina Koutsantoni draws on theorists from the fields of sociology sociolinguistics philosophy and literary criticism to investigate the thematic pattern underpinning these books with respect to the persona of the common reader Though these two volumes are the only ones that Woolf compiled herself they have seldom been considered as a whole As a result what they reveal about Woolf's position with regard to the processes of writing reading and critical analysis has not been fully examined Koutsantoni challenges the critical commonplace that equates Woolf's strategy of self effacement and personal removal from her works as a necessary compromise that allowed her to achieve authorial recognition in a male dominated context Rather Koutsantoni argues that an investigation of impersonality in Woolf's essays reveals the potential of the genre to function both as a vehicle for the subjective and dialogic expression of the author and reader and as a venue for exploring topics with which the ordinary reader can relate As she explores and challenges the meaning of impersonality in Woolf's Common Reader Koutsantoni shows how the related issues of subjectivity authority reader response intersubjectivity and dialogism offer useful perspectives from which to examine Woolf's work **Drafty Houses in Forster, Eliot and**

Woolf Ria Banerjee, 2024-06-18 This book argues that E M Forster T S Eliot and Virginia Woolf engaged sustainedly with real and imagined places as sites of counter cultural politics These writers used architectural images in diaries essays novels poems and plays to express their dissatisfaction with imperial London from the glorification of war to the erosion of local

religious and linguistic traditions and rigidly gendered practices in domestic and public life Drafty Houses shows that each author experienced post war modernity as intimate spatial dislocation in Egypt Forster in the church Eliot or in London s museums and streets Woolf and traces connections between their personal experiences and lesser read publications to theorize about the impact of places on their writerly perspectives By closely examining each author s negotiation of space symbolic of Englishness empire and global politics Drafty Houses considers the limits and the open ended possibilities of liberal humanism Christian conservatism and feminist pacifism

Being of Two Minds Jonathan Goldberg, 2022-09-20 Being of Two Minds examines the place that early modern literature held in Modernist literary criticism For T S Eliot Virginia Woolf and William Empson the early modern period helps model a literary future At stake in their engagements across time were ontological questions about literature and its ability to mediate between the one and the many the particular and the general life and death the past and the present If reading and writing literature enables the mind to be in two places at once creative experience serves as a way to participate in an expanded field of consciousness alongside mortality Goldberg reads the readings that these modernists performed on texts that Eliot claimed for the canon like the metaphysical poets and Jacobean dramatists but also Shakespeare Milton Montaigne and Margaret Cavendish Ontological concerns are reflected in Eliot s engagement with Aristotle s theory of the soul and Empson s Buddhism These arguments about being affect minds and bodies and call into question sexual normativity Eliot glances at a sodomitical male male mode of literary transmission Woolf produces a Judith Shakespeare to model androgynous being Empson refuses to distinguish activity from passivity to rewrite gender difference The work of one of our leading literary and cultural critics Being of Two Minds spans centuries to show how the most compelling and surprising ideas about mind experience and existence not only move between early modernity high modernism and our own moment but are also constituted through that very movement between times and minds
