The Seven Beauties of Science Fiction Istvan Csicsery-Ronay, 2012-10-01

This major critical work from one of the preeminent voices in science fiction scholarship reframes the genre as a way of understanding today's world. As the application of technoscience increasingly transforms every aspect of life, science fiction has become an essential mode of imagining the horizons of possibility. Though the broad scope of science fiction may vary in artistic quality and sophistication, it shares a desire to imagine a collective future for the human species and the world. A strikingly high proportion of today's films, commercial art, popular music, video games, and non-genre fiction are what Csicsery-Ronay calls science fictional, stimulating science fictional habits of mind. We no longer treat science fiction as merely a genre engine producing formulaic effects but as a mode of awareness which frames experiences as if they were aspects of science fiction. *The Seven Beauties of Science Fiction* describes science fiction as a constellation of seven diverse cognitive attractions that are particularly formative of science fictionality. These are the seven beauties of the title: fictive neology, fictive novums, future history, imaginary science, the science fictional sublime, the science fictional grotesque,

Palmer, 2016-05-10 A wide-ranging and appreciative literary history of the castaway tale from Defoe to the present. Ever since Robinson Crusoe washed ashore, the castaway story has survived and prospered, inspiring a multitude of writers of adventure fiction to imitate and adapt its mythic elements. In his brilliant critical study of this popular genre, Christopher Palmer traces the castaway tales' history and changes through periods of settlement, violence, and reconciliation, and across genres and languages. Showing how subsequent authors have parodied or inverted the castaway tale, Palmer concentrates on the period following H. G. Wells's *The Island of Dr. Moreau*. These much darker visions are seen in later novels including William Golding's *Lord of the Flies*, J. G. Ballard's *Concrete Island*, and Iain Banks's *The Wasp Factory*. In these and other variations, the castaway becomes a cannibal, the castaway's island is relocated to the center of London, female castaways mock the traditional masculinity of the original Crusoe, or Friday ceases to be a biddable servant. By the mid-twentieth century, the castaway tale has plunged into violence and madness, only to see it return in young adult novels such as Scott O. Dell's *Island of the Blue Dolphins* and Terry Pratchett's *Nation*. To the buoyancy and optimism of the original, the result is a fascinating series of revisions of violence and pessimism, but also reconciliation. Encounters with the Posthuman and the Environment Inci Bilgin

Tekin, Zeynep Talay Turner, 2024-10-29 With the advent of posthumanism, many scholars in the humanities have started to explore a transforming conception of the human, recognizing the limits of anthropocentrism both within and between disciplines. Posthumanism may be defined in various ways, but the emphasis in this volume is on the idea of constitutive alterity, not simply in the relationship between human beings and other human beings, but in that between human beings and other species and life forms, and between human beings, nature, and technology. As a result, *Encounters with the Posthuman and the Environment* is located at a crossover between posthumanism and environmental humanities. Between them, they move not only between disciplines but also between levels of abstraction, from the most general reflection to the most everyday empirical detail. At the same time, all the chapters are case studies, whether they address particular aspects of philosophical or scientific posthumanism, analyze particular pieces of film, theatre, art, literature, or recall for us instructive episodes from social history. The aim, at any rate, is to give a feel for the range and depth of the posthumanist problematic within the wider context of environmental humanities. **Technovisuality** Helen Grace, Amy Chan Kit-Sze, Wong Kin

Yuen,2015-12-23 How should we regard the contemporary proliferation of images Today visual information is available as projected printed and on screen imagery in the forms of video games scientific data virtual environments and architectural renderings Fearful and anti visualist responses to this phenomenon abound Spread by digital technologies images are thought to threaten the word and privilege surface value over content Yet as they multiply images face unprecedented competition for attention This book explores the opportunities that can arise from the ubiquity of visual stimuli It reveals that technovisuality the fusion of digital technology with the visual can work wonders not so much dazzling audiences with special effects as reviving our enchantment with popular culture Introducing a new term for an entirely new field of academic study this book reveals the centrality of technovisuality in 21st century life      *Sci-Fi Ultimate Collection: 170+ Space Adventures, Dystopian Novels & Lost World Classics* Jules Verne,Mark Twain,Robert Louis Stevenson,James Fenimore Cooper,Edgar Allan Poe,William Hope Hodgson,George MacDonald,Percy Greg,Jack London,Arthur Conan Doyle,Ernest Bramah,Jonathan Swift,Cleveland Moffett,William Morris,Sinclair Lewis,Anthony Trollope,Richard Jefferies,Samuel Butler,Milo Hastings,David Lindsay,Edward Everett Hale,Edward Bellamy,H.
