updated edition takes notice of recent shifts in thought with regard to such issues as biological cloning conjoined twins copyright digital reproduction and multiple personality disorder At once abbreviated and refined it will be of interest to anyone concerned with proglems of authenticity identity and originality   Constructing the Self in a Digital World Cynthia Carter Ching,Brian J. Foley,2012-09-10 It has become popular in recent years to talk about identity as an aspect of engagement with technology in virtual environments in games in social media and in our increasingly digital world But what do we mean by identity and how do our theories and assumptions about identity affect the kinds of questions we ask about its relationship to technology and learning Constructing the Self in a Digital World takes up this question explicitly bringing together authors working from different models of identity but all examining the role of technology in the learning and lives of children and youth   Psychology and the Other David Goodman,Mark Freeman,2015 The figure of the Other is an important though underutilized vehicle for exploring and reconceptualizing classic psychological and philosophical issues from identity and purpose to human frailty and suffering Moreover it can be used to reorient inquiry toward aspects of the human condition that are often regarded as secondary or peripheral for instance our responsibility to others and to the environment A broad spectrum of disciplines including psychology philosophy theology and religious studies speak about the challenges we face in encountering the Other vis vis our receptivity openness and capacity to entertain the stranger in our midst Through constructive critical exchange Psychology and the Other engages such perspectives on the Other from various subdisciplines within psychology and related disciplines The volume uses the language of the Other as a vehicle for rethinking aspects of psychological processes especially within the therapeutic context As a group the contributors demonstrate that the language of the Other may be more fitting than the egocentric language frequently employed in psychology They also embrace the challenge to create new theories and practices that are more ethically attuned to the dynamic realities of psychological functioning The book is organized into three sections The first deals with foundational philosophical concerns and provides an introduction to the project of thinking Otherwise The second section brings these fundamental philosophical concerns to bear on the therapeutic situation especially in the realm of relational psychoanalysis The final section of the book addresses concrete psychological situations in which the Other figures prominently and where the power of thinking Otherwise is most visibly demonstrated   **Learning One's Native Tongue** Tracy B. Strong,2019-11-26 Citizenship is much more than the right to vote It is a collection of political capacities constantly up for debate From Socrates to contemporary American politics the question of what it means to be an authentic citizen is an inherently political one With Learning One s Native Tongue Tracy B Strong explores the development of the concept of American citizenship and what it means to belong to this country starting with the Puritans in the seventeenth century and continuing to the present day He examines the conflicts over the meaning of citizenship in the writings and speeches of prominent thinkers and leaders ranging from John Winthrop and Roger Williams to Thomas Jefferson Nathaniel Hawthorne

Abraham Lincoln Frederick Douglass and Franklin Roosevelt among many others who have participated in these important cultural and political debates The criteria that define what being a citizen entails change over time and in response to historical developments and they are thus also often the source of controversy and conflict as with voting rights for women and African Americans Strong looks closely at these conflicts and the ensuing changes in the conception of citizenship paying attention to what difference each change makes and what each particular conception entails socially and politically
