The only comprehensive text to focus on trauma, stress, crisis, and disaster counseling from a clinical practice perspective. This overarching text intended both for mental health practitioners in training and for practicing clinicians focuses on the impact of stress, crisis, trauma, and disaster on diverse populations across the lifespan as well as on effective treatment strategies. The second edition is newly grounded in a trauma scaffold providing foundational information that therapists can build upon step by step to treat individuals affected by more complex trauma events. This resource newly addresses the mental health implications of COVID 19 which has had an enormous impact on multitudes of people since the beginning of the pandemic; its repercussions likely to continue for some time into the future. Two new chapters address the confluence of crises related to anthropogenic climate change and the effects of mass violence.
