First, Second, and Other Selves Jennifer Whiting, 2016 In her essay collection First Second and Other Selves Essays on Friendship and Personal Identity well known scholar of ancient philosophy Jennifer Whiting gathers her previously published essays taking Aristotle s theories on friendship as a springboard to engage with contemporary philosophical work on personal identity and moral psychology Whiting examines three themes throughout the collection the first being psychic contingency or the belief that the psychological structures characteristic of human beings may in fact vary not just from one cultural or socio historical context to another but also from one individual to another The second theme is the belief that friendship informs an understanding of the nature of the self an idea that springs from Whiting s uncommon reading of Aristotle s writings on friendship Specifically Whiting explains a scenario in which a virtuous agent adopts a kind of impersonal attitude both towards herself and towards her character friends loving both because they are virtuous this scenario ties in with an examination of the Aristotelian concept of the ideal friend as an other self or a friendship that evolves from character rather than ego as well as Whiting s meditation on whether or not a virtuous individual should have a special sort of concern for her own future self distinct in kind from the concern that she has for others The third theme is that of rational egoism a concept that Whiting critiques especially in the context of Aristotle s eudaimonism The central tenet of the collection is the message that taking ethocentric or character based attitudes both towards ourselves and towards our friends sheds light on the nature of personal identity and helps to combat ethnocentric and other objectionable forms of bias a message that is becoming increasingly urgent in light of the recent deaths of Trayvon Martin and Michael Brown
