Legal Secrets Kim Lane Scheppele, 1988 Does the seller of a house have to tell the buyer that the water is turned off twelve hours a day Does the buyer of a great quantity of tobacco have to inform the seller that the military blockade of the local port which had depressed tobacco sales and lowered prices is about to end Courts say yes in the first case no in the second How can we understand the difference in judgments And what does it say about whether the psychiatrist should disclose to his patient's girlfriend that the patient wants to kill her Kim Lane Scheppele answers the question Which secrets are legal secrets and what makes them so She challenges the economic theory of law which argues that judges decide cases in ways that maximize efficiency and she shows that judges use equality as an important principle in their decisions In the course of thinking about secrets Scheppele also explores broader questions about judicial reasoning how judges find meaning in legal texts and how they infuse every fact summary with the values of their legal culture Finally the specific insights about secrecy are shown to be consistent with a general moral theory of law that indicates what the content of law should be if the law is to be legitimate a theory that sees legal justification as the opportunity to attract consent This is more than a book about secrets It is also a book about the limits of an economic view of law Ultimately it is a

work in constructive legal theory one that draws on moral philosophy sociology economics and political theory to develop a new view of legal interpretation and legal morality

**American Secrets** José Liste-Noya,Eduardo Barros-Grela,2011-09-16 Predicated upon the principles of political freedom cultural openness religious tolerance individual self reliance and ethnic diversity the United States of America has been tempted recurrently by the lures of the secret American Secrets explores this political historical and cultural phenomenon from many often surprisingly overlapping angles in these analyses of the literary and cultural uses and abuses of secrecy within a democratic culture Through analyses of diverse literary works and cultural manifestations from Mark Twain's anti imperialist prophecies to 9 11 conspiracy theories from the traumas of the Vietnam war to the homophobia of the American military establishment from the unresolved dilemmas of nuclear politics to the secret ecologies shunted aside by the exploitation of the environment from the questionings of national identity on the ethnic and trans sexual margins to the confessional modes of poetry and the poetics of the unspeakable and unrepresentable these essays reveal the politics within the poetics and indissociably the poetics fueling the politics of secrecy in its ambivalent deployment Secrecy often seems to be a question without an answer or an answer that either seems to beg the question or to be a question itself These essays address this paradox with their own questioning explorations In answering such questions the volume as a whole provides an illuminating overview of the pervasiveness of the secret and its modalities in American culture while also dealing specifically with the poetics of the secret in its various historically recurrent literary manifestations

**What Every 18 Yr. Old Needs To Know** Paul from White Lake,2008-11-03 Why is there so much bipartisan bickering Why are some folks so darned adamant about their political viewpoints Should we all actually develop a political belief system But who really gives a hoot about politics anyways Have the schools of this USofA adequately prepared our 18 year olds for one of the important privileges that they can now engage namely to vote And even after 18 years old how and when does each of us actually become EXPERT at selecting our politicians How can any one person know who to vote for and does it really make any difference which way we vote They say that if I don't vote then I have no right to complain about who we get in our government But that doesn't make any sense or is it just me Some say that the MEDIA is biased but how can that be They just report the news don't they Why won't our government just do more to FIX things and to HELP people What SHOULD our government REALLY do to help us solve our

problems I've even heard people talk about dark and strange conspiracy theories about people who are so super rich and powerful who plan things in secret and that THEY are the REAL people in control in this world playing us as if we're all just tokens on a game board

**I've Got a Lot to Say, but Who's Listening????** A. SIMMONS,2011-06-08 Poems that will make you laugh Some might bring a tear But most certainly will make you think and appreciate our LORD and Savior JESUS CHRIST *Silence and Concealment in Political Discourse* Melani Schröter,2013-05-08 This book constitutes a significant contribution to political discourse analysis and to the study of silence both from the point of view of discourse analysis as well as pragmatics and it is also relevant for those interested in politics and media studies It promotes the empirical study of silence by analysing metadiscourse about politicians silence and by systematically conceptualising the communicativeness of silence in the interplay between intention to be silent expectation of speech and relevance of the unsaid Three cases of sustained metadiscourse about silent politicians from Germany are analysed to exemplify this approach based on media texts and protocols of parliamentary inquiries Ideals of political transparency and communicative openness are identified as a basis for disappointed expectations of speech which trigger and determine metadiscourse about politicians silences Finally the book deals critically with the role of those who act as advocates of the public s demand to speak out Algorithms Unplugged Berthold Vöcking,Helmuth Alt,Martin Dietzfelbinger,Rüdiger Reischuk,Christian Scheideler,Heribert Vollmer,Dorothea Wagner,2010-12-10 Algorithms specify the way computers process information and how they execute tasks Many recent technological innovations and achievements rely on algorithmic ideas they facilitate new applications in science medicine production logistics traffic communication and entertainment Efficient algorithms not only enable your personal computer to execute the newest generation of games with features unimaginable only a few years ago they are also key to several recent scientific breakthroughs for example the sequencing of the human genome would not have been possible without the invention of new algorithmic ideas that speed up computations by several orders of magnitude The greatest improvements in the area of algorithms rely on beautiful ideas for tackling computational tasks more efficiently The problems solved are not restricted to arithmetic tasks in a narrow sense but often relate to exciting questions of nonmathematical flavor such as How can I find the exit out of a maze How can I partition a treasure map so that the treasure can only be found if all parts of the map are recombined How should I plan my trip to minimize cost Solving these challenging problems requires logical reasoning geometric and combinatorial imagination and last but not least creativity the skills needed for the design and analysis of algorithms In this book we present some of the most beautiful algorithmic ideas in 41 articles written in colloquial nontechnical language Most of the articles arose out of an initiative among German language universities to communicate the fascination of algorithms and computer science to high school students The book can be understood without any prior

knowledge of algorithms and computing and it will be an enlightening and fun read for students and interested adults
