Inventing Los Alamos Jon Hunner, 2014-08-04 A social history of New Mexico's Atomic City Los Alamos New Mexico birthplace of the Atomic Age is the community that revolutionized modern weaponry and science An instant city created in 1943 Los Alamos quickly grew to accommodate six thousand people scientists and experts who came to work in the top secret laboratories others drawn by jobs in support industries and the families How these people as a community faced both the fevered rush to create an atomic bomb and the intensity of the subsequent cold war era is the focus of Jon Hunner's fascinating narrative history Much has been written about scientific developments at Los Alamos but until this book little has been said about the community that fostered them Using government records and the personal accounts of early residents *Inventing Los Alamos* traces the evolution of the town during its first fifteen years as home to a national laboratory and documents the town's creation the lives of the families who lived there and the impact of this small community on the Atomic Age

Atomic Women Roseanne Montillo, 2020-05-19 Meet the female scientists who served as both developers of the atomic bomb and the first line of criticism against it in this nonfiction narrative in the tradition of *Bomb and Code Girls* They were leaning over the edge of the unknown and afraid of what they would discover there Recruited from labs and universities from across the United States and even from countries
