Human and Animal Cognition in Early Modern Philosophy and Medicine Stefanie Buchenau, Roberto Lo Presti, 2018-10-26

From the sixteenth to the eighteenth century new anatomical investigations of the brain and the nervous system together with a renewed interest in comparative anatomy allowed doctors and philosophers to ground their theories on sense perception the emergence of human intelligence and the soul-body relationship in modern science They investigated the anatomical structures and the physiological processes underlying the rise differentiation and articulation of human cognitive activities and looked for the anatomical roots of the specificity of human intelligence when compared to other forms of animal sensibility This edited volume focuses on medical and philosophical debates on human intelligence and animal perception in the early modern age providing fresh insights into the influence of medical discourse on the rise of modern philosophical anthropology

Contributions from distinguished historians of philosophy and medicine focus on sixteenth-century zoological psychological and embryological discourses on man the impact of mechanism and comparative anatomy on philosophical conceptions of body and soul and the key status of sensibility in the medical and philosophical enlightenment

Speak Like Singing Kenneth Lincoln, 2007 *Speak Like Singing* honors talk-song visions for all relatives and seeks to plumb if not to reconcile Native and American poetics tribal chorus and solitary vision

**Hunting the Wren** Elizabeth Atwood Lawrence, 1997 A unique interdisciplinary study this book examines the British and European tradition of the wren hunt in which a bird ordinarily revered and protected for most of the year was killed around the time of the annual solstice In focusing on this ancient ritual Elizabeth Atwood Lawrence draws on her training in cultural anthropology and biology to cast a fresh light on the complexities of human-animal relationships Following an introductory chapter on animal symbolism Lawrence proceeds in subsequent chapters to describe the wren both as a biological entity and as the subject of numerous tales and legends to delineate the details of the wren hunt ceremony and the various meanings ascribed to it and finally to relate the ceremony to important contemporary issues in human-animal interactions and current attitudes toward the living environment Whereas most other studies tend to concentrate solely on human perceptions of animals and fail to include the animal's role in the relationship Lawrence's approach shows how the participation of both animal and human determines the symbolic status of the animal which in turn influences the treatment of that animal within a particular society At a time when human destructiveness toward nature has reached tragic proportions Lawrence contends it is critical that we understand the processes by which certain cultural beliefs in combination with observations about the natural history of a particular animal

result in emotional and mental responses that may ultimately determine the fate of that species The author argues persuasively that the wren hunt with its ancient roots associated beliefs and complex meanings in the preindustrialized world still has much to teach us *The Secret Language of the Soul* Jane Hope, 1997-11 This latest in the Secret Language series is an inspiring survey of faith and ritual through the ages from Native American vision quests to chakras avatar and archangels Original and ancient artworks depict some of the most profound and compelling images ever devised This richly illustrated volume is an inviting universal guide to the realm of the divine Over 200 full color illustrations

**The Spell of the Sensuous** David Abram, 2012-10-17 Winner of the International Lannan Literary Award for Nonfiction Animal tracks word magic the speech of stones the power of letters and the taste of the wind all figure prominently in this intellectual tour de force that returns us to our senses and to the sensuous terrain that sustains us This major work of ecological philosophy startles the senses out of habitual ways of perception For a thousand generations human beings viewed themselves as part of the wider community of nature and they carried on active relationships not only with

other people with other animals plants and natural objects including mountains rivers winds and weather patters that we have only lately come to think of as inanimate How then did humans come to sever their ancient reciprocity with the natural world What will it take for us to recover a sustaining relation with the breathing earth In *The Spell of the Sensuous* David Abram draws on sources as diverse as the philosophy of Merleau Ponty Balinese shamanism Apache storytelling and his own experience as an accomplished sleight of hand of magician to reveal the subtle dependence of human cognition on the natural environment He explores the character of perception and excavates the sensual foundations of language which even at its most abstract echoes the calls and cries of the earth On every page of this lyrical work Abram weaves his arguments with a passion a precision and an intellectual daring that recall such writers as Loren Eiseley Annie Dillard and Barry Lopez
