They Know Us Better Than We Know Ourselves Bridget Brown, 2007-08-01 What's really behind Americans' persistent belief in alien abductions Since its emergence in the 1960s belief in alien abduction has saturated popular culture with the ubiquitous image of the almond-eyed alien appearing on everything from bumper stickers to bars of soap Drawing on interviews with alleged abductees from the New York area Bridget Brown suggests a new way for people to think about the alien phenomenon one that is concerned not with establishing whether aliens actually exist but with understanding what belief in aliens in America may tell us about our changing understanding of ourselves and our place in the world They Know Us Better Than We Know Ourselves looks at how the belief in abduction by extraterrestrials is constituted by and through popular discourse and the images provided by print film and television Brown contends that the

abduction phenomenon is symptomatic of a period during which people have come to feel increasingly divested of the ability to know what is real or true about themselves and the world in which they live The alien abduction phenomenon helps us think about how people who feel left out create their own stories and fashion truths that square with their own experience of the world

The Believer Ralph Blumenthal, 2021-03-15 The Believer is the weird and chilling true story of Dr John Mack This eminent Harvard psychiatrist and Pulitzer Prize winning biographer risked his career to investigate the phenomenon of human encounters with aliens and to give credibility to the stupefying tales shared by people who were utterly convinced they had happened Nothing in Mack s four decades of psychiatry had prepared him for the otherworldly accounts of a cross section of humanity including young children who reported being taken against their wills by alien beings Over the course of his career his interest in alien abduction grew from curiosity to wonder ultimately developing into a limitless unwavering passion Based on exclusive access to Mack s archives journals and psychiatric notes and interviews with his family and closest associates The Believer reveals the life and work of a man who explored the deepest of scientific conundrums and further leads us to the hidden dimensions and alternate realities that captivated Mack until the end of his life

Animals as Religious Subjects Celia Deane-Drummond, Rebecca Artinian-Kaiser, David L. Clough, 2013-07-18 This book examines one of the most pressing cultural concerns that surfaced in the last decade the question of the place and significance of the animal This collection of essays represents the outcome of various conversations regarding animal studies and shows multidisciplinary at its very best namely a rigorous approach within one discipline in conversation with others around a common theme The contributors discuss the most relevant disciplines regarding this conversation namely philosophy anthropology religious studies theology history of religions archaeology and cultural studies The first section Thinking about Animals explores philosophical anthropological and religious perspectives raising general questions about the human perception of animals and its crucial cultural significance The second section explores the intriguing topic of the way animals have been used historically as religious symbols and in religious rituals The third section re examines some Christian theological and biblical approaches to animals in the light of current concerns The final section extends the implications of traditional views about other animals to more specific ethical theories and practices

How to Talk to an Alien Nancy du Tertre, 2015-10-19 Even for nonbelievers the author s palpable excitement over the subject matter is endearing and

entertaining Ufologists won't want to miss this work

Foreword Reviews

In 1972 American astronomer and ufologist J Allen Hynek first coined the term close encounter. He also identified three types of close encounters with UFOs. Since then several more types of encounters have been proposed. A close encounter of the fourth kind is an alien abduction. A closer encounter of the fifth kind is voluntary bilateral contact with an alien species. We are no longer just looking at strange flying objects in the skies now we are beginning to interact with the actual pilots, crew and passengers. Do aliens exist? In 2013 one poll showed that nearly half of all Americans (48 percent) believe UFOs may be a sign of extraterrestrial visitation; another found that 10 percent of Americans claim to have actually witnessed an actual UFO; and yet another showed that 2.9 million Americans believe they had actually been abducted by aliens. If aliens exist and are visiting us, we need to talk. Who will speak to them on behalf of planet Earth? Who can translate their intentions, good or evil, toward the human race? How can we learn about their advanced technologies? Can aliens speak human languages? These and even more fascinating questions are all addressed in *How to Talk to an Alien*. Nancy du Tertre covers the various considerations involved with extraterrestrial communication, including the use of alien technology, ET linguistics, and the possibility of using telepathy and dreams. Her handbook for the future should be on every thinking person's bookshelf.
