The Look of Things Carsten Strathausen, 2003-12-04 Examining the relationship between German poetry philosophy and visual media around 1900 Carsten Strathausen argues that the poetic works of Rainer Maria Rilke Hugo von Hofmannsthal and Stefan George focused on the visible gestalt of language as a means of competing aesthetically with the increasing popularity and reality effect of photography and film Poetry around 1900 self reflectively celebrated its own words as both transparent signs and material objects Strathausen says In Aestheticism this means that language harbors the potential to literally present the things it signifies Rather than simply describing or picturing the physical experience of looking as critics have commonly maintained modernist poetry claims to enable a more profound kind of perception that grants intuitive insights into the very texture of the natural world

Adorno and Philosophical Modernism Roger S. Foster, 2016-08-29 Adorno and Philosophical Modernism The Inside of Things offers an original interpretation and vigorous defense of Theodor Adorno's idea of philosophy as the practice of what Roger Foster calls philosophical modernism Adorno's philosophical writings from the early 1930s to the mature works of the late 1960s are deeply informed by a distinctively modernist vision of human experience This book seeks to establish that Adorno's unique and lasting contribution to philosophy consists in his sustained and rigorous development of this modernist vision into an encompassing practice of philosophical interpretation The essential features of this vision can be discerned in all of Adorno's major writings in philosophy social theory and aesthetics Its defining element is the idea of a pattern underlying ordinary experience which although not directly accessible can be disclosed by the reconstructive work of philosophical or literary language This vision Foster argues can be discerned in the major works of literary modernism including Woolf Proust and Musil as well as in the interpretive technique of psychoanalysis developed by Sigmund Freud The importance of Adorno's contribution to twentieth century philosophy can only be fully appreciated by understanding how he developed this vision into an overarching practice of philosophical interpretation that furnished a coherent and profound response to the decay of experience afflicting late modern societies In this book Foster expounds that interpretive practice exploring its ramifications and in particular its relation with literary modernism and places it in critical dialogue with alternative philosophical

reference to the works of Lata Mani and William Schindler and an investigation of the Mother centric spiritual sensibilities in various religious discourses and devotional literatures among other discussions In short this book investigates the possibilities of inserting the figure of the Great Mother into the critical domain of cultural pluralism thereby celebrating a multiculturalism that is not based on violence and conflict antagonism but grounded in harmony The Mother is seen by the discourse articulated here mainly as a middle ground between flesh and spirit knowledge and passion justice and compassion and in the red shadow of the Mother social epistemologies and academic discourses are radically renegotiated *The Future of Philology* Hannes Bajohr, Benjamin R. Dorvel, Vincent Hessling, 2014-06-19 Philology master science of the nineteenth century has changed so radically over the course of the twentieth century that it is hardly recognizable in the twenty first Its scope has been transformed its methodology contested and its legitimacy called into doubt Does it still make sense to speak institutionally and epistemologically of philology Does this venerable title continue to signify a truly coherent field and not a multitude of scattered currents and competing genealogies differing national characteristics and inconsistent methodologies This volume collects answers by a range of young philologists given at the 11th Annual Columbia University German Graduate Student Conference They show that philology in its practices and theories continues to be the fundament of the ever expanding field of literature and language studies and that a discipline whose very core is the care for the text wields competencies that are indispensable for neighboring fields In conversation with Brecht and George Hamann and Rilke Nietzsche and Heidegger these essays confront questions of materiality epistemology and ontology that define as Sheldon Pollock put it the fate of a soft science in a hard world *A Companion to the Literature of German Expressionism* Neil H. Posthumanism in the Age of Humanism Edgar Landgraf, Gabriel Trop, Leif Weatherby, 2018-10-04 The literary and scientific renaissance that struck Germany around 1800 is usually taken to be the cradle of contemporary humanism Posthumanism in the Age of Humanism shows how figures like Immanuel Kant and Johann Wolfgang Goethe as well as scientists specializing in the emerging modern life and cognitive sciences not only established but also transgressed the boundaries of the human This period so broadly painted as humanist by proponents and detractors alike also grappled with ways of challenging some of humanism's most cherished assumptions the dualisms for example between freedom and nature science and art matter and spirit mind and body and thereby also between the human and the nonhuman Posthumanism is older than we think and the so called humanists of the late Enlightenment have much to offer our contemporary rethinking of the human **The Red Book: Reflections on C.G. Twentieth-century Literary Criticism Gale Research Company, 2007 Excerpts from criticism of the works of novelists poets playwrights and other creative writers 1900 1960 The Technological Unconscious in German Modernist Literature Larson Powell, 2008 Even after the end of modernism and postmodernism the grandiose fantasies of artifice and self reference that have informed so much modernist literature still resonate in the social constructivism of current literary and cultural theory in the idea that we can perform or construct identities or social roles without external constraint as if we had consumer choice of self Larson Powell's book posits nature as a limit to such fantasies redefining aesthetic modernity's conception of and relation to nature and therefore its relation to reality He shows how nature no longer the idealized maternally coded Utopia of the Romantics becomes the trace of specific political sexual and technological traumas The book's four chapters center on the representation of nature in German prose and especially poetry by Rainer Maria Rilke Gottfried Benn Bertolt Brecht and Alfred Döblin from the years 1900 to 1945 while making reference to other literatures as well Powell's term the Technological Unconscious refers to a point of intersection between psychoanalysis and social and scientific theories of modernism and also to the philosophical mediation between history and nature a motif important from Kant to Adorno Powell critiques the tendency toward jargon of an often merely rhetorical theory while continuing to develop the philosophical and conceptual inheritance of Continental traditions He analyzes in connection with the works treated the conceptions of subject and system in the theories of Adorno Luhmann and Lacan and their relation to their complement nature The Technological Unconscious is thus an important polemical intervention both in the debates over interdisciplinarity and in those between eclectic culturalist theories such as New Historicism and postcolonialism on the one hand and systems theory and psychoanalysis on the other Book Jacket Sense and Creative Labor in Rainer Maria Rilke's Prose Works Nicholas Carroll Reynolds, 2021-08-06 This book is an investigation of the role of creative labor and the five senses in Rainer Maria Rilke's prose works including his Primal Sound essay the Stories of God The Notebooks of Malte Laurids Brigge and his monograph on Auguste Rodin It is about several protagonists' quest to achieve creative labor by reconnecting spirit or the unconscious to the hand There are many difficulties in the way however illustrated by Rilke's essays tales and monographs In the process of overcoming these impediments the five senses are expanded and refined Rilke's characters undergo a transformation that not only allows them to do true creative labor but also brings them into a new relationship with themselves the world around them and other people Nicholas Carroll Reynolds received his PhD at the University of Oregon USA He has authored several articles on philosophy and literature and has worked as an editor and translator He is currently employed at Trinity University in San Antonio Texas USA where he teaches in the German Philosophy and First Year Experience programs as well as in Trinity's Study abroad program in Berlin Germany Benjamin's Blind Spot Lise Patt, 2001 Edited by Lise Patt Contributors include Vance Bell David Brottman Martin Gantman David Gross Erich Hertz Petra Kuppers Rajeev S Patke Colin Rhodes Gerhard Richter Marquard Smith Carsten Strathausen **Bioaesthetics**

Carsten Strathausen,2017-10-15 In recent years bioaesthetics has used the latest discoveries in evolutionary studies and neuroscience to provide new ways of looking at art and aesthetics Carsten Strathausen s remarkable exploration of this emerging field is the first comprehensive account of its ideas as well as a timely critique of its limitations Strathausen familiarizes readers with the basics of bioaesthetics grounding them in its philosophical underpinnings while articulating its key components Importantly he delves into the longstanding problem of the two cultures that separate the arts and the sciences Seeking to make bioaesthetics a more robust way of thinking Strathausen then critiques it for failing to account for science s historical and cultural assumptions At its worst he says biologism reduces artworks to mere automatons that rubber stamp pre established scientific truths Written with a sensitive understanding of science s strengths and willing to refute its best arguments Bioaesthetics helps readers separate the sensible from the specious At a time when humanities departments are shrinking and when STEM education is on the rise Bioaesthetics makes vital points about the limitations of science while lodging a robust defense of the importance of the humanities *Play Among Books* Miro Roman,Alice _ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science
