Looking Into A Mirror:

Look In My Mirror Javier Sanchez, 2009 A father tells his daughter how he feels about her **The Universe in the Rearview Mirror** Dave Goldberg, 2014-06-24 A great read Goldberg is an excellent guide Mario Livio bestselling author of The Golden Ratio Physicist Dave Goldberg speeds across space time and everything in between showing that our elegant universe from the Higgs boson to antimatter to the most massive group of galaxies is shaped by hidden symmetries that have driven all our recent discoveries about the universe and all the ones to come Why is the sky dark at night If there is anti matter can there be anti people Why are past present and future our only options Saluting the brilliant but unsung female mathematician Emmy Noether as well as other giants of physics Goldberg answers these questions and more exuberantly demonstrating that symmetry is the big idea and the key to what lies ahead **The Allure of the Mirror** Yanlong Guo, 2025-09-23 In Han China 202 BCE 220 CE few luxury objects were as widely coveted as bronze mirrors Typically circular and ranging from seven to thirty centimeters in diameter these mirrors were crafted from high tin bronze with highly reflective surfaces on the front and intricate designs and auspicious inscriptions on the reverse The Allure of the Mirror explores how and why these objects historically known as haowu fine things became so beloved throughout early imperial China Tracing their production and consumption from manufacture in imperial princely and private workshops to their roles in life and death Yanlong Guo uncovers the varied ways these seemingly trivial objects took on social and cultural significance Across social classes mirrors had a wide range of uses as status symbols personal tools romantic tokens family heirlooms auspicious amulets treasured gifts and funeral offerings Guo demonstrates how these fine things once exclusive to elites gradually became accessible to a wider segment of society Mirrors he argues connected people across the empire fostering a shared cultural community of aesthetic tastes and social values from royal courts to rural households Interdisciplinary and comprehensive The Allure of the Mirror offers fresh insights into the relationship among art society and ideology in the Han Empire revealing how decorative objects could bridge social divides and shape cultural identity

From Virtue to Vice Richard A. O'Connor, Penny Van Esterik, 2015-03-01 The recovered possess the key to overcoming anorexia Although individual sufferers do not know how the affliction takes hold piecing their stories together reveals two accidental afflictions One is that activity disorders dieting exercising healthy eating start as virtuous practices but become addictive obsessions The other affliction is a developmental disorder which also starts with the virtuous those eager for challenge and change But these overachievers who seek self improvement get a distorted life instead Knowing anorexia from inside the recovered offer two watchwords on helping those who suffer One is negotiate to encourage compromise which can aid recovery where coercion fails The other is balance for the ill to pursue mind with body activities to defuse mind over body battles Telling Rhythm Amittai F. Aviram, 1994 Provides a postmodern theory of poetry that sees rhythm as its essential quality **Intermediate Light** Robert Alexander Houston, 1925 **Aristotle's Gynecology** Mariska Leunissen, 2025 In Aristotle's Gynecology Mariska Leunissen examines Aristotle's methods for the establishment of gynecological facts within his natural science arguing that many of the gynecological phenomena at stake such as menstruation and the nature of menstrual blood the role of female pleasure during sex and women's experiences of erotic dreams and their knowledge of conception and their experiences of false pregnancy and childbirth were mostly for socio cultural reasons not at all or not immediately accessible for a male natural scientific observer such as Aristotle Given this lack of immediate empirical evidence Aristotle employed alternative methods for the establishment of facts such as relying on signs and circumstantial empirical evidence or using analogical and probabilistic reasoning and relied heavily on existing expert reports such as mainly early medical sources but also sometimes verbal reports from women themselves Moreover Aristotle used a secondary standard for testing the results of this inquiry namely one which he originally developed for investigations into physically remote meteorological and cosmological phenomena that are not apparent to observation and according to which statements of facts are credible if they are ontologically possible Leunissen thus reconstructs Aristotle's gynecology in the context of his commitments to empiricism and his scientific methods for the fact establishing phase of natural science and elucidates the role his concepts of evidence credibility and signs play in his natural scientific research However through its focus on Aristotle's use of gendered knowledge and his reconstruction of natural phenomena believed to be characteristic of women Leunissen's book also offers a glimpse of the lived experiences and reproductive beliefs of women in Ancient Greece
