Gleach, 2021-05 Centering the Margins of Anthropology's History circles around the conscious recognition of margins and suggests it is time to bring the margins to the center both in terms of a changing theoretical openness and a supporting body of scholarship *The Alien Abduction Phenomenon* Paul Meehan, 2025-06-13 News reports books articles and films about alien abductions have long captured the public imagination This book traces the evolution of the phenomenon from the late 1940s flying saucer era and the contactee and occupant sightings of the 1950s to the widespread abduction stories of the 1960s and beyond It examines how broader social cultural and scientific contexts have shaped these accounts and offers a critical analysis of their interpretations over time Also discussed are the key researchers who have sought to understand the nature and intentions of alleged extraterrestrial beings or ufonauts while addressing the skepticism about the subject The efforts of the scientific community to investigate unidentified aerial phenomenon UAP and abductions are assessed acknowledging both the challenges and limitations of such inquiries Firsthand encounters with non human entities are examined attempting to uncover the forces behind these sightings and arguing that there could be unforeseen consequences of ignoring the phenomena **The Thing** Phil Hore, 2023-08-14 In 1982 Universal Pictures a studio famous for its monster movies unleashed a new terror on the silver screens of the world that would change everything not that anyone knew that at the time Today John Carpenter's THE THING consistently ranks in the top of favourite or influential film lists but when it was first released it was not only considered a bomb reviewers used words like obscene gross and instant junk For the first time we look at the history of the entire THING franchise not just the 1982 film or its prequel nor the original 1951 version The Thing from Another World In this book we look at the radio versions the comics novels computer games music and how from a 1931 novella by John W Campbell Jr The Thing began infecting our lives and eventually took over the world by initiating one of the longest media franchises in history and influencing many others like ALIEN Dr Who and the X files Interviewing many of those involved we'll look at the marketing strategies the reviews the blunders censorship and yes we may even figure out exactly why The Thing failed at the box office in 1982 **High Strangeness** Jerome Clark, 1996 **Your Creative Brain** Shelley Carson, 2012-09-19 Research based techniques that show everyone how to expand creativity and increase productivity Harvard psychologist Shelley Carson's provocative book published in partnership with Harvard Health Publications reveals why creativity isn't something only scientists investors artists writers and musicians enjoy in fact all of us use our creative brains every day at home work and play Each of us has the ability to increase our mental functioning and creativity by learning to move flexibly among several brain states Explains seven brain states or brainsets and their functions as related to creativity productivity and innovation Provides quizzes exercises and self tests to activate each of these seven brainsets to unlock our maximum creativity Your Creative Brain called

Science, Culture and the Search for Life on Other Worlds John W. Traphagan, 2016-08-26 This book explores humanity s thoughts and ideas about extraterrestrial life paying close attention to the ways science and culture interact with one another to create a context of imagination and discovery related to life on other worlds Despite the recent explosion in our knowledge of other planets and the seeming era of discovery in which we live to date we have found no concrete evidence that we are not alone Our thinking about life on other worlds has been and remains the product of a combination of scientific investigation and human imagination shaped by cultural values particularly values of exploration and discovery connected to American society The rapid growth in our awareness of other worlds makes this a crucial moment to think about and assess the influence of cultural values on the scientific search for extraterrestrial life Here the author considers the junction of science and culture with a focus on two main themes 1 the underlying assumptions many of which are tacitly based upon cultural values common in American society that have shaped the ways researchers in astrobiology and SETI have conceptualized the nature of their endeavor and represented ideas about the potential influence contact might have on human civilization and 2 the empirical evidence we can access as a way of thinking about the social impact that contact with alien intelligence might have for humanity
