Exploring the management of truth in the Kingdom of Saudi Arabia this book aims to investigate the ways in which the official truth is constructed and institutionalised in the country. The Politics of Truth Management in Saudi Arabia argues that there are two interrelated notions which articulate the ways in which truth is conceptualised in Islam. One at macro level constitutes the trans-historical foundational principles of the religion: a set of engrained beliefs which establish the finality and oneness of Islam in relation to other competing narratives. The other at a micro level takes place internally to find truth within the truth. Unlike Islamic truth at the macro level which is entrenched, the Islamic truth at the micro level refers to the various attempts by different agencies to claim to have found the truth within the truth. Wahhabism which is the product of an eighteenth-century revivalist movement is portrayed as the most authentic reading of Islam. It is seen as the *raison d'être* for the prevailing political mechanism in the country and is introduced as an example of truth management at the micro level. Arguing that truth is not born in a power vacuum and often its construction and institutionalisation signify domination in one way or another, this book will be of interest to students of Religion, Politics and Saudi Politics more specifically.

The Making of Saudi Arabia, 1916-1936 Joseph Kostiner, 1993-12-02. The Making of Saudi Arabia focuses on the transformation of the Saudi state from a loose tribal confederation into a more organized monarchical state, a process which evolved mainly between 1916 and 1936. The study analyzes the formation and evolution of Saudi Arabia's main state attributes: its territorial hub and borders, central government and basic social and regional cohesion. Relying on a careful analysis of vast archival and other sources, Joseph Kostiner explains the historical dynamics of the myriad of relations among tribal groups, rulers and British authorities in the Arabian Peninsula and the changing nature of local political and social institutions. Contributing both to historical knowledge of the Middle East and to comparative analysis on tribes and states, this book offers new information and understanding of Saudi Arabia, one of the most important states in the Middle East. The strategies and dynamics of Saudi territorial expansion, the subsequent attempts to integrate new regions into a united kingdom, the institutionalization of Islamic and lay ruling bodies, the coexistence among nomadic and town-based populations and the development of the Saudi elite are analyzed.
