The Lost Empire John Hemsley, 1991 This is an investigation into the mechanisms of change and how these have an impact on the institutional processes in the Soviet Union These processes are defined with a view to establishing how much inertia exists and why and to what extent they may be responsive to the requirements of perestroika It seeks to establish the constraints on and limitations of perestroika as well as looking at the penalties of failure and the effects on the system as a whole

British Book News British Council, 1991 Includes no 53a British wartime books for young people *Revolutionary Movements in Latin America* Cynthia McClintock, 1998 Why were El Salvador's FMLN and Peru's Shining Path able to mount such serious revolutionary challenges in the 1980s and early 1990s And why were they able to do so despite the fact that their countries elected governments were widely considered democratic These two guerrilla groups were very different but both came close to success To explain why the author examines the complex interplay among political and economic factors the nature of the revolutionary organization and international actors McClintock emphasizes that the end of the Cold War does not mean the end of revolutionary groups and that the United States can play an important role in determining the outcome of future confrontations The book concludes with practical policy options for the U S government as it looks to foster peace and democracy in the western hemisphere

Security for a New Europe John Borawski, 1992 *Choice*, 1991 The Triumph of the Flexible Society Manuel Hinds, 2003-11-30 Hinds takes offers a fresh perspective on the social political and economic disturbances now affecting our world This book looks at those disturbances not as separate problems but rather as the coherent symptoms of a deep technological revolution that is changing the shape of society on the scale of the Industrial Revolution the Connectivity Revolution the basis of the New Economy Analyzing the resistance to change that erupted violently in response to that last major economic upheaval Hinds shows how Communism Nazism and fundamentalism owe their triumphs not to the prevalence of poverty or oppression but to the rigidity of societies threatened by profound social changes prompted by rapid technological progress Demonstrating that their rigidity was caused by the same kind of state intervention in the economy that is now being proposed to stop globalization he argues persuasively that only a horizontal flexible society can smoothly manage change in such a way that the pain of transformation and therefore the risk of giving birth to new varieties of

destructive regimes is minimized British Military Planning for the Defence of Germany 1945-50 Paul Cornish,1996-03-14 Using recently released archive material British Military Planning for the Defence of Germany 1945 50 reassesses Britain's strategy for the defence of Germany up to the outbreak of the Korean War Convinced of the capabilities of strategic air power with atomic weapons and convinced that the defence of the Middle East should be the first call on British planning Britain's military chiefs made a series of token gestures designed to boost French morale and consistently refused to make a genuine continental commitment of operational troops Parameters ,1992 **US Military Strategy and the Cold War Endgame** Stephen J. Cimbala,2014-01-14 At the end of the Cold War security concerns are more about regional and civil conflicts than nuclear or Eurasian global wars Stephen Cimbala argues that deterrence characteristics of the pre Cold War period will in the 21st century again become normative **Air University Library Index to Military Periodicals** ,1991

The Gorbachev Bibliography, 1985-1991 Joseph L. Wieczynski,1996 Cybersecurity Discourse in the United States Sean T. Lawson,2019-12-05 This book examines the role of cyber doom rhetoric in the U S cybersecurity debate For more than two decades fear of cyber doom scenarios i e cyberattacks against critical infrastructure resulting in catastrophic physical social and economic impacts has been a persistent feature of the U S cybersecurity debate This is despite the fact that no cyberattack has come close to realizing such impacts This book argues that such scenarios are part of a broader rhetoric of cyber doom within the U S cybersecurity debate and takes a multidisciplinary approach that draws on research in history sociology communication psychology and political science It identifies a number of variations of cyber doom rhetoric then places them into a larger historical context assesses how realistic the fears expressed in such rhetoric are and finally draws out the policy implications of relying on these fears to structure our response to cybersecurity challenges The United States faces very real cybersecurity challenges that are nonetheless much less dramatic than what is implied in the rhetoric This book argues that relying on cyber doom rhetoric to frame our thinking about such threats is counterproductive and encourages us to develop ways of thinking and speaking about cybersecurity beyond cyber doom This book will be of much interest to students of cybersecurity foreign policy public administration national security and international relations in general **A History of Soviet Foreign Policy, 1917-1991 (English-language Titles)**. ,1993 *Infantry* ,1992

Subject Guide to Books in Print ,1993 **Whitaker's Book List** ,1991 Industrial Property Rick Ball,Andy C. Pratt,2018-01-12 This volume first published in 1994 is the first collection of original research on the relationships between industrial property and economic development The contributors all specialists in their field highlight the emerging conflicts between the users and the providers of industrial premises conflicts that may undermine economic potential The need for flexibility in the use and provision of industrial premises is explored in three contexts the transformation of the urban fringe the development of hi tech premises and the redevelopment of old or derelict premises *Bargaining with Multinationals* H. Loewendahl,2001-07-19 In *Bargaining with Multinationals* Loewendahl scrutinises the relationship between multinational

companies regional development and governments using an international political economy framework of bargaining between government and multinationals He critically analyses the role of foreign investment in economic development and examines how governments can link inward investment to regional economic development Based on extensive use of data interviews and case studies of Siemens and Nissan s UK investment the book shows why MNCs have invested in the UK in the past how they bargained with the government and what the impact was on the national and regional economies In particular through linking the strategy of multinationals to the location advantages of the UK it is argued that labour flexibility and incentives were crucial to investment decisions Loewendahl recommends a framework to integrate endogenous and exogenous approaches to developments and proposes a greater role for the region and the EU to control incentives and monitor multinationals
