The Lost Chronicles of the Maya Kings David Drew, 2002-05-01 An in depth discussion of the latest archeological findings about the Mayan civilization explores the sophistication of this long misunderstood culture and addressing such issues as why the civilization disappeared why they built cities in jungles and more **Mysterious Advanced Astronomy in Mesoamerica** Norah Romney, The Olmec language and Teotihuacan language are still outside this preliminary classification the ones represented by the Olmec area and those of Teotihuacan which are currently being studied and discovered Though it is still difficult to prove there is some probability that the Olmec language preceded Totonac In contrast it is more specific than the writings and speech of Teotihuacan which led to Nahua s development The Mexican population that migrated to Nicaragua later spread this language in its various variants throughout the central Valley of Mexico even reaching the south of Mesoamerica to Nicaragua During the destruction and abandonment of Teotihuacan around 600 the written system of their successors the Toltecs was lost but may have been revived later in Aztec ideographic writing

Mysterious Mesoamerican Cultures Norah Romney, Mayan ideas spread via broadcast and influenced divergent cultures and languages It is possible to trace the influence of the Mayan civilization far beyond its confines 400 to 600 A D One or two of these lesser civilizations may have existed contemporaneously with the great Mayan civilization but most were at their best long after the great culture had declined This chapter will emphasize the ties between these lesser civilizations and the Mayas and analyze their characteristics Toward Mexico and the Isthmus of Panama we will proceed northwest Along the Gulf of Mexico and across the Isthmus of Tehuantepec the Mayas developed their arts of life in narrowing bands In terms of importance Comalcalco appears to be the most westerly Mayan city A large ruin is also located near San Andres Tuxtla and the Tuxtla Statuette is among the earliest dated Maya objects Archaic and Maya figurines coexist in this coastal belt where arid and humid conditions coexist Mayan culture may have originated here Little has been studied on the archaeology of this part of Mexico Although the earliest known rubber specimens were found at Chichen Itza s Sacred Cenote the material s ceremonial and practical uses are primarily related to the Olmeca and Totonac cultures In southern Vera Cruz and western Tabasco where the Aztecs later called Nonoalco the Olmeca may be found Ancient Mexican traditions frequently mention this region as a symbol of Maya civilization Incense water proofing drumstick tips etc were all made from rubber There was also a sacred game played with a large rubber ball with goals set high in parallel walls of a specially constructed court which could be compared to basketball Olmeca may have been a Mayan tribe but they may also have spoken Mexican The Olmeca ruled parts of the Mexican highlands before the Toltecs according to Ixtlilxochitl s history When the Toltec empire collapsed they may have fled south for we find a group of this name in Nicaragua at the time of the Conquest

Ancient Origins of Mesoamerica Norah Romney, The Central Andes Mexico El Salvador Honduras Guatemala Nicaragua Costa Rica Peru and Bolivia all have deep roots in their pre Columbian civilizations The first chapters of Latin America s history correspond to those who inhabited it before encountering Europeans This is especially true in Mesoamerica The objectives are to show the development of the peoples and high civilizations of Mesoamerica before the arrival of the Mexica Aztecs in the Valley of Mexico 1325 second to examine the key features of the political and socioeconomic organization as well as the artistic and intellectual achievements achieved during the fourteenth and fifteenth centuries under Mexica Aztec rule Finally present a vision of Mesoamerican life on the eve of the European

invasion 1519 between North and South America's solid continental masses the area of Mesoamerica that is the region where it developed with great cultural difficulties which reached an area of about 900 000 km² when the Spaniards arrived with its varied isthmic characteristics and geographical features such as Tehuantepec and Fonseca Gulfs the Yucatan Peninsula and the Gulf of Honduras Gulf German specialists such as Eduard Seler introduced *Mittel Amerika* over 70 years ago to denote the region where high indigenous cultures flourished in central and southern Mexico Norah Romney focused attention on what he called Mesoamerica many years later The concept of Mesoamerica goes beyond geography High indigenous culture and civilization have also developed and unfolded in various forms and periods When the Spanish invaded in 1519 its northern borders were the Sinaloa River to the northwest and the Panuco to the northeast it extended beyond the Lerma River basin in the north central part Its southern limits were the Motagua River that empties into the Gulf of Honduras in the Caribbean the south shore of Lake Nicaragua and the Nicoya Peninsula in Costa Rica and these locations developed highly advanced cultures showing a greater degree of geographical and ecological diversity than any other region of comparable extension in the entire planet There is a complex geological history in the region Recent volcanic activity and mountain formation have played a vital role in the shape of various natural regions The mountains have two volcanic axes one that runs east west along the southern limits of the Valley of Mexico and the other that runs northwest southeast through Mexico and Central America

Advanced Knowledge of the Mayan Civilization Rhandel Lopez, In the almost total isolation of the tropical lands of the Yucatán Peninsula the Maya developed a science based civilization more than 1 000 years before European explorers arrived Overlooking the emerald rainforest were their majestic skylines Architectural wonders with magnificent carvings adorned with hieroglyphic inscriptions these wonders were stunners This sophisticated urban center was the largest on Earth during the middle of the first millennium A D More than technologically stunning works of art and architecture the sprawling Maya city states were conceived to overwhelm observers with a sense of wonder In addition to being centers of power these cities were incubators of science and technology places of learning and hubs of commercial activity that generated wealth for the kingdom After the demise of the Maya civilization these magnificent cities survived against all odds for more than a millennium Due to the innovative Maya technology employed during their construction the structures have remained intact despite environmental degradation the ravages of time natural disasters and the prying roots of the jungle These brilliant societies developed scientific advances and technological methods of discovery that were a millennium ahead of those produced by European sciences to preserve their cities It is even more impressive that these technological advances were created without the influence of outside cultures unlike in Europe Maya cities were designed and built on a grand scale with functional efficiency and artistic elegance Each city was a triumph of grace and power with its monumental palaces and temples There are no other styles of architecture like Mayan Unlike any different culture in Mesoamerica and any other world style of architecture its inventive design is alien and bizarre Where did this style originate

Their art style also inspires their veneration of the cosmos and its impact on the Maya civilization's philosophy. Ancient Egypt had fewer cities and pyramids than the Maya civilization, which was among history's longest-lived cultures. More than 50 independent city states governed the Maya world spread out over 125 000 square miles. Civilization of the Americas

Ethan Gomez, Introduction There is much more to Mesoamerica than the Aztec, Mayan and Toltec civilizations. In fact, several different ancient Mesoamerican civilizations had their own gods and religious beliefs. These civilizations included the Olmec civilization, Zapotec civilization, Teotihuacan civilization, Maya civilization, Toltec civilization, and Aztec civilization. The Olmec civilization is the first known Mesoamerican civilization. The name Olmec comes from the Nahuatl word for rubber people, and they were pre-Columbian people living in what is now southern Mexico in the modern-day states of Veracruz and Tabasco. The Olmecs are essential to history because they were the first Mesoamerican people to develop a writing system, use hieroglyphics, and construct significant stone monuments such as pyramids. The calendar developed by the Olmecs was one of their most remarkable achievements. They based their calendar on 365 days divided into 18 months of 20 days each, plus 5 extra days at the end of each year, so it was different from our current calendar. They also used zero as part of their number system, which is why we still use it today. The Zapotec civilization was in the Oaxaca Valley, Mexico. This Mesoamerican civilization was known for using the Mesoamerican writing system and art. The Zapotecs were one of the first civilizations in Mexico to develop a writing system. They used it to write on stone or pottery, but we don't know what their language sounded like because no one left any written records about them or their lives, so all that remains is physical evidence like pottery with pictures and hieroglyphs carved into it. This type of evidence is called epigraphic because it's an inscription on something else, like a statue. The city of Teotihuacan was a center of trade and politics. It existed from about 300 BC until 600 AD when it was abandoned. The site has been a subject of archaeology since the 19th century; it is now an essential source of information on Mesoamerican civilization. Among the most significant early cities in pre-Columbian America, the city is located just north of present-day Mexico City in the state/province/county of Mexico, 65 km (40 miles) northeast of the Federal District. Mexico City. The name Teotihuacan means "place where men become gods," possibly an allusion to their belief that their rulers became divine after death. The Teotihuacanos were not only builders but also warriors; they fought with neighboring groups over territory and resources. Their most important military victory came in 378 AD against Xolalpan by capturing its ruler Cuauhtemoc and killing many Xolalpan warriors during battle. After this victory, they took over Xolalpan's lands, including Azcapotzalco, Colhuacan, and Tlaxcala areas, where they established their control over those regions along with other surrounding places like Cholula or Chichen Itza, until finally falling into decline due to internal conflicts caused by constant wars between various ethnic groups within the Aztec Empire itself during its final years before being conquered by Spanish Conquistadors led by Hernán Cortés after they arrived at Cempoala Island between Veracruz and Tlaxcala province in July 1519.
