naming conventions and written narratives to create carefully visualized landscapes that emphasize the touristic aspects of Arizona Analyzing the visual culture of tourism in illuminating detail this book documents how Arizona came to be identified as an appealing tourism destination Providing a historically situated analysis Dori Griffin draws on samples from a comprehensive collection of materials generated to promote tourism during Arizona s first half century of statehood She investigates the relationship between natural and constructed landscapes visual culture and narratives of place Featuring sixty six examples of these aesthetically appealing maps the book details how such maps offered tourists and other users a cohesive and storied image of the state Using historical documentation and rhetorical analysis this book combines visual design and historical narrative to reveal how early twentieth century mapmakers and map users collaborated to imagine Arizona as a tourist s paradise

Treasures of the Earth Saleem H. Ali, 2009-01-01 Would the world be a better place if human societies were somehow able to curb their desires for material goods Saleem Ali s pioneering book links human wants and needs by providing a natural history of consumption and materialism with scientific detail and humanistic nuance It argues that simply disavowing consumption of materials is not likely to help in planning for a resource scarce future given global inequality development imperatives and our goals for a democratic global society Rather than suppress the creativity and desire to discover that is often embedded in the exploration and production of material goods which he calls the treasure impulse Ali proposes a new environmental paradigm one that accepts our need to consume treasure for cultural and developmental reasons but warns of our concomitant need to conserve In evaluating the impact of treasure consumption on resource rich countries he argues that there is a way to consume responsibly and alleviate global poverty
