Handbook James Hitchmough, Ken Fieldhouse, 2008-04-15 Professional landscapers and all those involved in creating green
spaces have long been in need of a book that is a guide to plant specification but also makes sense of plants and their
cultivation Plant User Handbook is for practitioners who are professionally engaged in the use of plants in public commercial
and institutional landscapes Planting schemes are undertaken on the basis of a binding contract generally between the client
who owns or leases the landscape and the implementer the landscape contractor with the designer acting both as specifier
and contract administrator Within this contractual relationship planting schemes must be implemented to an agreed
timetable To manage this procedure efficiently landscape designers and managers need quick access to the factual and
scientific background for practical planting design and its implementation through specification writing and contracts The
book covers over 20 well defined topics and is written by leading experts in the industry It is arranged into five sections
Preliminaries to plant use and the landscape Managing plant growth on landscape sites Establishment and management of
trees Establishment and management of smaller woody plants Establishment and management of herbaceous plants
Carefully illustrated with diagrams black and white photographs and colour plates this handbook provides a unique resource
for professionals wanting to improve their specification skills as well as to explore creative approaches to design and
