

ESCAPE FROM ASYLUM

The background of the cover is a dark, moody photograph. It depicts a woman from behind, wearing a long, white, textured dress. She has her hands pressed against her head, suggesting distress or a mental state. She is standing in front of a dark, rectangular opening, possibly a doorway or a tunnel entrance. The surrounding environment is dark and appears to be made of rough, rocky or cave-like walls. The overall atmosphere is mysterious and unsettling.

A Love of Reading Robert Adams, 2011-01-14 Every year Robert Adams prepares a series of five reviews of contemporary novels to be delivered alone on a theatre stage to sold out audiences in Toronto and Montreal In A Love of Reading Adams

has now gathered 18 of his most brilliant reviews from Jack Maggs by Peter Carey and The Poisonwood Bible by Barbara Kingsolver to A Fine Balance by Rohinton Mistry and Barney's Version by Mordecai Richler. In them he skillfully interweaves a nimble and entertaining discussion of plot, theme and characterization with fascinating historical, biographical and literary context. He is repeatedly drawn to the spectacle of less than perfect humans making their way in a hostile world and as a result a review by Robert Adams is almost always a hugely satisfying mix of rich pathos and abundant humour. Famously, Adams reads a book a day from which he selects only those novels that are truly extraordinary that have made him see some part of the world or some aspect of the human condition in a new light because for Adams the best books always take the reader on a journey with a destination very distant from the point of departure. It should be not only a journey of discovery, an exploration of the author's vision but also of risk. By matching one's own vision to that of the author, says Adams, the reader enters an exciting negotiation to produce a new vision of his own. This joint enterprise between reader and writer, the shared risk and the wonder of discovery is the foundation of A Love of Reading. For the last six years, Robert Adams has presented an annual series of book reviews to sold-out audiences. Eighty per cent of Adams' 3,000 subscribers in Toronto and Montreal renew for the following season. This book is a selection of modern classics from a discriminating and entertaining guide. Perfect for reading groups. Quill Quire, noting the jump in sales of any book reviewed by Adams, has called the phenomenon 'The Adams Effect'.

Love and Eugenics in the Late Nineteenth Century Angelique Richardson, 2003 The idea of eugenics human selective breeding originated in Victorian Britain in response to the urban poor

Darwin's evolutionary theory had laid the foundations for eugenics replacing paradise with primordial slime. Man had not fallen from Grace but risen from the swamps. And as architect of his own destiny he might rise still further. Eugenics was developed by Darwin's cousin Francis Galton in the 1860s. Embracing the idea of evolution, eugenicists argued that through the judicious control of human reproduction and the numerical increase of the middle class, Britain's supremacy in the world could be maintained. Born and bred among the competitive Victorian middle class, eugenics was a biologicistic discourse on class. Aiming at racial improvement by altering the balance of class in society, it was, Galton argued, practical Darwinism. Eugenics found its most sustained expression in fiction and the periodical press and was central to late nineteenth century ideas on social progress, forming part of the debate between hereditarians and environmentalists that peaked in the closing years of the century. Even Gladstone had his vital statistics measured in Galton's eugenic laboratory. Among the champions of eugenics were social purity feminists and New Women writers such as George Egerton, Ellice Hopkins and Sarah Grand, who argued that women were naturally biologically moral and that through rational reproduction, middle class women could regenerate the British imperial race. The New Woman has been the subject of numerous recent critical works. However, the oppressive ideas that coexisted with the emancipatory theories of some New Women, ideas that were supremely class-conscious, remain largely unexamined, as the focus remains on her more progressive aspects.

Love and Eugenics in the Late Nineteenth Century recontextualizes New Woman writers, demonstrating that they were as concerned with the questions of poverty, sickness and health as they were with the changing role of women, the issue for which they are currently generally known and celebrated. Focusing on fiction and the press and drawing on the papers and published work of Galton and other eugenicists, Angelique Richardson reveals the cultural pervasiveness of eugenics and explores for the first time the intimate relations between early feminism and eugenics, making a radical contribution to nineteenth century studies.

A Critical Edition of Caroline Norton's Love in "The World" Ross Nelson, Marie Mulvey-Roberts, 2023-10-10 Caroline Norton s forgotten novel which has remained unpublished until now tells of the perils of courtship facing a na ve young girl Alixe who has been launched onto the London social season Her encounters with both a worthy and an undesirable suitor open an intriguing window onto the fashionable society of the 1820s in which *Love in the World* takes place In placing her heroine in these

predicaments Norton was able to draw upon her own experiences of the bon ton as the time in which the novel is set coincides with her first ball in March 1826 when she burst upon the scene with all her beauty and brilliance later recalling I came out to find all London at my feet She believed that London could be as callous as the metropolitan social scene might prove treacherous and in alerting the reader to the dangers of fashionable society she makes ample use of her own observations as a debutante at her first London season In a highly readable and coherent narrative with an indeterminate ending which throws a spotlight onto her life and times the plot of *Love in the World* initially follows a pattern broadly representative of her own experience before developing in unexpected and surprising ways
