A romantic couple is shown in a close embrace, kissing. The man, on the right, has dark, wavy hair and is wearing a dark t-shirt. The woman, on the left, has long, light-colored hair and is wearing a light-colored top. They are seated in the front of a car, with the steering wheel and dashboard visible in the lower right corner. The background shows a blurred view of a road and trees, suggesting they are driving. *Love's Knowledge* Martha C. Nussbaum, 1990-11-15 This volume brings together Nussbaum's published papers on the relationship between literature and philosophy especially moral philosophy The papers many of them previously inaccessible to non specialist readers deal with such fundamental issues as the relationship between style and content in the exploration of ethical issues the nature of ethical attention and ethical knowledge and their relationship to written forms and styles and the role of the emotions in deliberation and self knowledge Nussbaum investigates and defends a conception of ethical understanding which involves emotional as well as intellectual activity and which gives a certain type of priority to the perception of particular people and situations rather than to abstract rules She argues that this ethical conception cannot be completely and appropriately stated without turning to forms of writing usually considered literary rather than philosophical It is consequently necessary to broaden our conception of moral philosophy in order to include these forms Featuring two new essays and revised versions of several previously published essays this collection attempts to articulate the relationship within such a broader ethical inquiry between literary and more abstractly theoretical elements      **Cherish That Love**

**A Social Theory of Freedom** Mariam Thalos, 2016-03-17 In A Social Theory of Freedom Mariam Thalos argues that the theory of human freedom should be a broadly social and political theory rather than a theory that places itself in opposition to the issue of determinism Thalos rejects the premise that a theory of freedom is fundamentally a theory of the metaphysics of constraint and instead lays out a political conception of freedom that is closely aligned with questions of social identity self development in contexts of intimate relationships and social solidarity Thalos argues that whether a person is free in any context depends upon a certain relationship of fit between that agent's conception of themselves both present and future on the one hand and the facts of their circumstances on the other Since relationships of fit are broadly logical freedom is a logic it is the logic of fit between one's aspirations and one's circumstances what Thalos calls the logic of agency The logic of agency once fleshed out becomes a broadly social and political theory that encompasses one's self conceptions as well as how these self conceptions are generated together with how they fit with the circumstances of one's life The theory of freedom proposed in this volume is fundamentally a political one

**The Path of Love** Ronald D. Cowen, 2015-02-05 The Buddha was

a scientist Instead of using a microscope or a particle accelerator the Buddha used ESP He had several psychic powers that allowed him to perceive in detail the psychology of karma the evolution of consciousness and subatomic particles He discovered love and self love to be organizing principles that evolved early in the history of intelligent consciousness especially with regard to feelings and emotions Every person has the deepest need to love and be loved He solved the mind body problem by perceiving the physical basis of intelligent consciousness These psychic powers are acknowledged in Hindu and Buddhist scriptures but extremely few people have them This book is essentially a meditation report written by someone who has them While this sounds like an invitation to return this book to the shelf in a bookstore it also documents in depth another report by a physicist Stephen Phillips who relates in comprehensive detail the relationship between modern superstring theory and extrasensory observation of the elements of the periodic table by Annie Besant and Charles Leadbeater of the Theosophical Society This strong connection between modern physics and psychic powers of the Buddha is a real challenge to both the modern scientist and the modern Buddhist

**The Emotions** Peter Goldie, 2002-08 Peter Goldie opens the path to a deeper understanding of our emotional lives through a lucid philosophical exploration of this surprisingly neglected topic He illuminates the phenomena of emotion by drawing not only on philosophy but also on literature and science He considers the roles of culture and evolution in the development of our emotional capabilities He examines the links between emotion mood and character and places the emotions in the context of such related phenomena as consciousness thought feeling and imagination He explains how it is that we are able to make sense of our own and other people's emotions and how we can explain the very human things which emotions lead us to do A key theme of *The Emotions* is the idea of a personal perspective or point of view contrasted with the impersonal stance of the empirical sciences Goldie argues that it is only from the personal point of view that thoughts reasons feelings and actions come into view He suggests that there is a tendency for philosophers to over intellectualize the emotions and investigates how far it is possible to explain emotions in terms of rationality Over intellectualizing can also involve neglecting the centrality of feelings and Goldie shows how to put them where they belong as part of the intentionality of emotional experience directed towards the world from a point of view Goldie argues that the various elements of emotional experience including thought feeling bodily change and expression are tied together in a narrative structure To make sense of one's emotional life one has to see it as part of a larger unfolding narrative The narrative is not simply an interpretative framework of a life it is what that life is Goldie concludes by applying these ideas in a close study of one particular emotion jealousy This fascinating book gives an accessible but penetrating exploration of a subject that is important but mysterious to all of us Any reader interested in emotion and its role in our understanding of our lives will find much to think about here
