Manet History Techniques Of The Great:

Marketing Modernism in Fin-de-Siècle Europe Robert Jensen, 2022-02-08 In this fundamental rethinking of the rise of modernism from its beginnings in the Impressionist movement Robert Jensen reveals that market discourses were pervasive in the ideological defense of modernism from its very inception and that the avant garde actually thrived on the commercial appeal of anti commercialism at the turn of the century The commercial success of modernism he argues depended greatly on possession of historical legitimacy The very development of modern art was inseparable from the commercialism many of its proponents sought to transcend Here Jensen explores the economic aesthetic institutional and ideological factors that led to its dominance in the international art world by the early 1900s He emphasizes the role of the emerging dealer gallery market and of modernist art historiographies in evaluating modern art and legitimizing it through the formation of a canon of modernist masters In describing the canon building of modern dealerships Jensen considers the new ideological dealer and explores the commercial construction of artistic identity through such rhetorical concepts as temperament and independent art and through such institutional structures as the retrospective His inquiries into the fate of the juste milieu a group of dissidents who saw themselves as true heirs of Impressionism and his look at a new form of art history emerging in Germany further expose a linear dealer oriented history of modernist art constructed by or through the modernists themselves Manet's Modernism Michael Fried, 1996 Fried put forward a highly original beholder centered account of the evolution of a central tradition in French painting from Chardin to Courbet P 4 of cover **Ways Around Modernism** Stephen Bann, 2013-10-18 Stephen Bann examines the arguments for the centrality of French modernist painting He begins by focusing particularly on the notion of the modernist break as it has been interpreted with regard to painters like Manet and Ingres He argues that curiosity with its origins in the seventeenth century world view can be a valid concept for understanding some aspects of contemporary art that contest the modern suggesting ways of sidetracking the modern by adopting a lengthier historical view *A History of Western Society, Volume C* John P. Capital of the Nineteenth Century The question that guides this volume stems from Walter Benjamin's studies of nineteenth century Parisian culture as the apex of capitalist aesthetics Thirteen scholars test Benjamin's ideas about the centrality of Paris formulated in the 1930s from a variety of methodological perspectives Many investigate the underpinnings of the French capital's reputation and mythic force which was based largely upon the city's capacity to put itself on display Some of the authors reassess the famed centrality of Paris from the vantage point of our globalized twenty first century by acknowledging its entanglements with South Africa Turkey Japan and the United States The volume equally studies a broader range of media than Benjamin did himself from modernist painting and printmaking photography and illustration to urban planning The essays conclude that Paris did in many ways function as the epicenter of modernity's international reach especially in the years from 1850 to 1900 but did so only as a consequence of the idiosyncratic force of its mythic image Above all the essays affirm that the study of late nineteenth century Paris still requires nimble and innovative approaches commensurate with its legend and global aura

Critical Terms for Art History, Second Edition Robert S. Nelson, Richard Shiff, 2010-03-15. Art has always been contested terrain; whether the object in question is a medieval tapestry or Duchamp's *Fountain*. But questions about the categories of art and art history acquired increased urgency during the 1970s when new developments in critical theory and other intellectual projects dramatically transformed the discipline. The first edition of *Critical Terms for Art History* both mapped and contributed to those transformations, offering a spirited reassessment of the field's methods and terminology. Art history as a field has kept pace with debates over globalization and other social and political issues in recent years, making a second edition of this book not just timely but crucial. Like its predecessor, this new edition consists of essays that cover a wide variety of loaded terms in the history of art, from sign to meaning, ritual to commodity. Each essay explains and comments on a single term, discussing the issues the term raises and putting the term into practice as an interpretive framework for a specific work of art. For example, Richard Shiff discusses *Originality* in Vija Celmins's *To Fix the Image in Memory*, a work made of eleven pairs of stones, each consisting of one original stone and one painted bronze replica. In addition to the twenty-two original essays, this edition includes nine new ones: performance, style, memory, monument, body, beauty, ugliness, identity, visual culture, visual studies, and social history of art.
