Bretney, Gordon Hull, Jo Anne Van Tilburg, 2012-12-31. Recipient of the Jo Anne Stolaroff Cotsen Prize. The product of ten years of fieldwork at Little Lake Ranch in the Rose Valley, the southern gateway to the Owens Valley, this book presents the results of intensive rock art analyses carried out by the interdisciplinary research team of the UCLA Rock Art Archive. The research attempts to establish a connective web of associations to break down traditional but artificial barriers between rock art and the rest of archaeology. Through time-honored methods of stylistic analysis, the focus is on recent breakthroughs in the analysis of meaning and religion in the context of landscape attributes and ecological opportunities. Regional or ethnic differences suggested by the rock art record have made it possible to create a flexible analytical framework containing previously unpublished or overlooked archaeological excavation and object data. This book describes the occurrence, concentration, distribution, and formal variation of pecked and painted motifs.
