New Leadership Into The 21st Century

New Leadership Into The 21st Century:

New Leadership into the 21st Century Yahya ibn Shabazz, 2003-09-17 Imam W Deen Mohammed said in a public address words make people I believe that a word can be anything that leaves an impression on the minds of human society be it spoken acted out or whatever form it may take all creation is to be seen as a word According to scripture all creation is here as a result of a word spoken by G d so again we say words make people If we can go deeper and look at the mind of the human being and look at what kinds of words that are going into the mental makeup of a person we then can get a better picture of what forms the character of that person We must understand that our physical construction only acts as a vehicle that transports the mind which is the real person So just to view the physical makeup of a person is not really seeing that person at all It is the ideas the activities the words etc that comes from that persons mind that helps us to see the real person So now we can see the importance of understanding a word like leader Leader a person that leads or has commanding influence or authority over others The director conductor or guide Ship the state condition or quality of something Art skill of office So now we see that not only do we still need leaders but also we must have leaders that have the best interest of the people at heart Leaders with the vision the wisdom knowledge and the integrity to know when to stay or change courses so that not only will they be able to get the people to the next level but will also give the people the knowledge so that they may guide themselves through the rough waters of society When we talk about leadership we should understand that for the subject to even come up there has to be something lacking in the minds of the people in term of where we as a people or as a society want to go and how we are going to reach the goals we have set for ourselves In todays society we hear some foolish people make the statement I dont need a leader Or I follow my self I make my own decisions We must understand that theres not a thought or an idea that we can think of that is our very own We are influenced by the environment that we live in We should also realize that this society is not hap hazard but rather very orchestrated Therefore many decisions that we make become life determining In todays society we are lead to think that all accomplishments have to be material With this kind of thinking we can easily see how a person can become so limited in terms of growth and development and a non contributor to the positive development of human society as a whole Many are influenced by the all pervasiveness of the media which contrary to what those in media would have us believe media is not art mimicking life but rather it helps to set the trends of life We see many people with lots of money especially those in the field of entertainment with little or no vision reach their peak in the early stages of their development and then suddenly crash as a result of the trials of life Still others who desire to have these material accomplishments although never rise to that level still they see it as their lifes goal and in their quest for it they use illegal methods which eventually leaves them dead in the streets or locked up behind bars for a good deal of their young lives Then there are those who continue to struggle to make ends meet and those who do manage to make it up the higher end of the economic ladder Too many of these tend to lose their identity because they have been lead to believe that

Naval Diplomacy in 21st Century Kevin Rowlands, 2018-08-31 This book offers a detailed investigation of naval diplomacy past and present and challenges the widely accepted Anglo American school of sea power thought Despite the acknowledgement of the importance of the threat or use of force in the pursuit of policy since the dawn of strategic thought the utility of seapower in operations other than war is poorly understood and articulated Theorists have invariably viewed seapower in peacetime through the lens of hard power effects such as coercion and deterrence Commentaries on engagement interoperability and the forging of friendships are largely conspicuous by their absence This book considers how all these strands of international politics can be better understood for use in the 21st century The book explains and defines naval diplomacy with existing theoretical frameworks being critically analysed It reviews over 500 incidents from the post Cold War era drawing on this empirical evidence to determine that naval diplomacy remains a potent means of 21st century statecraft It finds that existing understanding of naval diplomacy is insufficient and offers an alternative model drawing on basic communication and stakeholder theories The implications of the book relate directly to national security naval deployments could be more effectively targeted foreign activity at sea could be better understood and if necessary countered finally the ability of non state actors to support national interests from the sea could potentially be better harnessed This book will be of much interest to students of naval power maritime security strategic studies and International Relations

It isn't a calamity to die with dreams unfulfilled but it is a calamity not to dream. It is not a disaster to be unable to capture your ideal but it is a disaster to have no ideal to capture. It is not a disgrace not to reach the stars but it is a disgrace to have no stars to reach for. Not failure but low aim is a sin.
