New Money, Nice Town Leonard Nevarez, 2014-01-14 The economic restructuring that has gone on since the 1980s has produced a new economic space in which service and high tech firms are at the forefront of innovation One of the features of the new economy is what pop geographer Joel Kotkin calls nerdistans or smaller cities with a substantial high tech sector limits on growth environmentally friendly policies and a generally well educated population In New Money Nice Town Leonard Nevarez takes a close look at how new economy firms in quality of life cities interact with local political structures finding that they are both more liberal and more detached than their traditional counterparts This new global economy has created communities whose politics are more democratic but also more tenuous and unstable

Consuming Schools Trevor Norris, 2011-01-01 The increasing prevalence of consumerism in contemporary society often equates happiness with the acquisition of material objects Consuming Schools describes the impact of consumerism on politics and education and charts the increasing presence of commercialism in the educational sphere through an examination of issues such as school business partnerships advertising in schools and corporate sponsored curriculum First linking the origins of consumerism to important political and philosophical thinkers Trevor Norris goes on to closely examine the distinction between the public and the private sphere through the lens of twentieth century intellectuals Hannah Arendt and Jean Baudrillard Through Arendt's account of the human activities of labour work and action and the ensuing eclipse of the public realm and Baudrillard's consideration of the visual character of consumerism Norris examines how school commercialism has been critically engaged by in class activities such as media literacy programs and educational policies

Patterson,2017-02-01 Markets run on information Buyers make decisions by relying on their knowledge of the products available and sellers decide what to produce based on their understanding of what buyers want But the distribution of market information has changed as consumers increasingly turn to sources that act as intermediaries for information companies like Yelp and Google Antitrust Law in the New Economy considers a wide range of problems that arise around one aspect of information in the marketplace its quality Sellers now have the ability and motivation to distort the truth about their products when they make data available to intermediaries And intermediaries in turn have their own incentives to skew the facts they provide to buyers both to benefit advertisers and to gain advantages over their competition Consumer protection law is poorly suited for these problems in the information economy Antitrust law designed to regulate powerful firms and prevent collusion among producers is a better choice But the current application of antitrust law pays little attention to information quality Mark Patterson discusses a range of ways in which data can be manipulated for competitive advantage and exploitation of consumers as happened in the LIBOR scandal and he considers novel issues like confusopoly and sellers use of consumers personal information in direct selling Antitrust law can and should be adapted for the information economy Patterson argues and he shows how courts can apply antitrust to address today s problems **An Economic History of Modern Sweden** Lennart Schön,2012 This book gives a comprehensive account of Swedish economic development from 1800 to the early years of the new millennium *The Rise of the Network Society* Manuel Castells,2011-08-24 This first book in Castells groundbreaking trilogy with a substantial new preface highlights the economic and social dynamics of the information age and shows how the network society has now fully risen on a global scale Groundbreaking volume on the impact of the age of information on all aspects of society Includes coverage of the influence of the internet and the net economy Describes the accelerating pace of innovation and social transformation Based on research in the USA Asia Latin America and Europe The Independent Telecommunications Consumer Enhancement Act of 2000

Prosperity without Growth Tim Jackson, 2016-12-08 What can prosperity possibly mean in a world of environmental and social limits The publication of Prosperity without Growth was a landmark in the sustainability debate Tim Jackson's piercing challenge to conventional economics openly questioned the most highly prized goal of politicians and economists alike the continued pursuit of exponential economic growth Its findings provoked controversy inspired debate and led to a new wave of research building on its arguments and conclusions This substantially revised and re-written edition updates those arguments and considerably expands upon them Jackson demonstrates that building a post growth economy is a precise definable and meaningful task Starting from clear first principles he sets out the dimensions of that task the nature of enterprise the quality of our working lives the structure of investment and the role of the money supply He shows how the economy of tomorrow may be transformed in ways that protect employment facilitate social investment reduce inequality and deliver both ecological and financial stability Seven years after it was first published Prosperity without Growth is no longer a radical narrative whispered by a marginal fringe but an essential vision of social progress in a post crisis world Fulfilling that vision is simply the most urgent task of our times

Law and the "Sharing Economy" Derek McKee, Finn Makela, Teresa Scassa, 2018-11-27 La controverse entoure les plateformes d'economie de partage partiellement en raison de leur impact économique Certains secteurs subissent des contrecoups de manière plus aiguë les chauffeurs d'Uber font concurrence aux chauffeurs de taxi ou les hôtes Airbnb rivalisent avec les hôtes Par ailleurs Uber exacerberait l'emploi précaire et mal rémunéré tandis qu'Airbnb amplifierait la spéculation immobilière et entraînerait une hausse du coût de location On a tenté de réglementer ce type de plateformes mais la technologie est telle qu'elle permet aux entreprises d'aisément contourner la réglementation conventionnelle si bien que les

accusations de concurrence déloyale fusent de toutes parts provoquant une remise en question du cadre réglementaire. En effet, de telles plateformes viennent brouiller les cartes confondant les distinctions convenues entre personnel et commercial, infrastructure et contenu, autonomie contractuelle et contrôle hiérarchique. Cette ambiguïté peut avoir d'importantes répercussions sur le bon fonctionnement de l'appareil réglementaire qui encadre les principes organisateurs du travail, de la concurrence, de l'impact de l'assurance de l'information et de l'interdiction de la discrimination, sans parler de la réglementation sectorielle spécialisée. Cinq thématiques sont abordées dans cet ouvrage : les technologies de la réglementation, la réglementation de la technologie, les lieux de la réglementation, du local au mondial, la réglementation des marchés et la réglementation du travail. Les chapitres se conjuguent pour offrir une réflexion d'une gamme d'experts sur la jurisprudence traditionnelle que sur les approches théoriques qui informent et façonnent la réglementation de l'économie du partage. Publié en anglais.

Consumer Protection in Asia Geraint Howells, Hans-W. Micklitz, Mateja Durovic, André Janssen, 2022-08-25. This book looks at the consumer protection offered in a range of Asian countries for example China, Japan and South Korea in key areas such as consumer sales law, unfair terms, product liability and unfair commercial practices. However, it is interesting to note that consumer protection is on the rise everywhere and to compare how this differs depending upon the legal cultures. It is also fascinating to reflect on the influence of models for law reform such as the EU laws. ASEAN has also affected the development of consumer policy for its member states. The book takes the form of national reports which explain the development of the law and also shed light on how the law works in practice. The book also contains thematic reports which look at each area of the law from a comparative perspective. Commentators from around the globe reflect on their impression of Asian consumer law based on their own differing legal systems and benchmarks. A must read for anyone with an interest in consumer law in Asia and beyond; this book will form the basis of further research and discussion internationally. *World Economic Outlook, October 1999*. International Monetary Fund, 1999-10-01. Supporting Studies for the World Economic Outlook prepared by IMF staff provide a more detailed analysis of issues recently covered in the main publication. The current edition includes studies of globalization and growth, the future of the international financial system, currency crises, business cycles and exchange rates, supply side issues in the contractions experienced in the Baltics, Russia and other countries of the former Soviet Union, and challenges to European labor markets posed by European Economic and Monetary Union (EMU).

Consumer Democracy Margaret Scammell, 2014-02-10. This book argues that marketing is inherent in competitive democracy, explaining how we can make the consumer nature of competitive democracy better and more democratic. Margaret Scammell argues that consumer democracy should not be assumed to be inherently antithetical to proper political discourse and debate about the common good. Instead, Scammell argues that we should seek to understand it to create marketing literate criticism that can distinguish between democratically good and bad campaigns and between shallow, cynical packaging and campaigns that at least aspire to be responsive, engender citizen participation and enable

accountability Further we can take important lessons from commercial marketing enjoyment matters what citizens think and feel matters and just as in commercial markets structure is key the type of political marketing will be affected by the conditions of competition Web Systems Design and Online Consumer Behavior Gao, Yuan,2004-11-30 Web Systems Design and Online Consumer Behavior takes an interdisciplinary approach toward systems design in the online environment by providing an understanding of how consumers behave while shopping online and how certain system design elements may impact consumers perceptions attitude intentions and actual behavior This book contains theoretical and empirical research from expert scholars in a number of areas including communications psychology marketing and advertising and information systems This book provides an integrated look at the subject area as described above to further our understanding of the linkage among various disciplines inherently connected with one another in electronic commerce
