Productivity, Separability and Deprivation Atanu Sengupta, Soumyendra Kishore Datta, Susanta Mondal, 2013-04-09 In production and service sectors we often come across situations where females remain largely overshadowed by males both in terms of wages and productivity. Men are generally assigned jobs that require more physical work while the less strenuous job is allocated to the females. However, the gender dimension of labor process in the service sector in India has remained relatively unexplored. There are certain activities in the service sector where females are more suitable than males. The service sector activities are usually divided into OAE and Establishments. In this work, an attempt has been made to segregate the productivity of females compared to that of males on the basis of both partial and complete separability models. An estimate has also been made of the female labor supply function. The results present a downward trend for female participation both in Own Account Enterprises (OAE) and Establishments. The higher the female shadow wage, the lower their supply. This lends support to the supposition that female labor participation is a type of distress supply rather than a positive indicator of women's empowerment. Analysis of the National Sample Service Organization data indicates that in all the sectors, women are generally paid less than men. A micro econometric study reveals that even in firms that employ solely female labor, incidence of full-time labor is deplorably poor. It is this feature that results in women workers' lower earnings and their deprivation.

Grandma's Helper Helena Hayes Thomas, 2011-11 I was inspired by my grandson Michael Thomas Jr. to write *Grandma's Helper*. I didn't realize that over the years I had forgotten so much. As I spent treasured moments caring for my grandchild, I would jot down little reminders as to what to do next in the course of the day of grandparenting. Then it occurred to me to compile the notes into a book to help other grandmas, grandpas, moms, and dads. Introducing a child to the world around him provides opportunity to bring out the physical as well as the spiritual side of his development. Early training and guidance of small children provide valuable lessons for grandparents. The main ingredients that we must possess are tender loving care and a reverence for God and His Word as we train our children in the way they should go. It is the purpose of this book to teach the fulfillment of that commission.
