*Vernacular List of Trees, Shrubs, and Woody Climbers in the Madras Presidency* Alfred Wyndham Lushington, 1915

**The Nutmeg Tree** Margery Sharp, 1964      **The Nutmeg's Curse** Amitav Ghosh, 2021-10-14 The author of *The Great Derangement* finds the origins of our climate crisis in Western colonialism's violent exploitation of human life and the environment. A powerful work of history, essay, testimony, and polemic, Amitav Ghosh's new book traces our contemporary planetary crisis back to the discovery of the New World and the sea route to the Indian Ocean. *The Nutmeg's Curse* argues that the dynamics of climate change today are rooted in a centuries-old geopolitical order constructed by Western colonialism. At the center of Ghosh's narrative is the now ubiquitous spice, nutmeg. The history of the nutmeg is one of conquest and exploitation of both human life and the natural environment. In Ghosh's hands, the story of the nutmeg becomes a parable for our environmental crisis, revealing the ways human history has always been entangled with earthly materials such as spices, tea, sugarcane, opium, and fossil fuels. Our crisis, he shows, is ultimately the result of a mechanistic view of the earth where nature exists only as a resource for humans to use for our own ends rather than a force of its own full of agency and meaning. Writing against the backdrop of the global pandemic and the Black Lives Matter protests, Ghosh frames these historical stories in a way that connects our shared colonial histories with the deep inequality we see around us today. By interweaving discussions on everything from the global history of the oil trade to the migrant crisis and the animist spirituality of Indigenous communities around the world, *The Nutmeg's Curse* offers a sharp critique of Western society and speaks to the profoundly remarkable ways in which human history is shaped by non-human forces.

**The Jewel** Jewel Tea Company, 1922      *Phytochemistry of Australia's Tropical Rainforest* Cheryll J. Williams, 2021-12 Rare, unique, and irreplaceable precious native rainforests occupy a precariously small part of Australia while retaining a remarkable level of both biological and chemical diversity unrivalled by any other ecosystem. Australia's ancient history and traditions are intimately intertwined with the rainforest plants that humans have utilised as both food and medicine. *Phytochemistry of Australia's Tropical Rainforest* is a record of this history and details how our understanding of these plants has led to the discovery of anaesthetics, analgesics, steroids, antimalarials, and more. It provides an insight into the habitat, ecology, and family associations of hundreds of species and explores their future therapeutic potential alongside phytochemical studies of the ancient plant lineages. Toxicological evaluations of important poisonous plants are also included. Rainforests provide shelter for unique flora and fauna that are counted among the rarest species on Earth, many of which are illustrated in this book. This comprehensive work is an essential reference for phytochemists, ethnobotanists, and those with an interest in rainforests and their medicinal and botanical potential.

*The Journal of the Indian Archipelago and Eastern Asia* James Richardson Logan, 1851      *Chopra's Indigenous Drugs of India* Chopra R N, I.C. Chopra, 2006      *The Ongoing Columbian Exchange* Christopher Cumo, 2015-02-25 This unique encyclopedia enables students to understand the myriad ways that the Columbian

Exchange shaped the modern world covering every major living organism from pathogens and plants to insects and mammals. Most people have only the vaguest notion of how profoundly the world was changed by Christopher Columbus's arrival in the Americas. Indeed, some of what is commonly regarded as traditional Native American life and culture, such as living in teepees and hunting buffalo from horseback, for example, came from the arrival of Europeans. This encyclopedia helps students acquire fundamental information about the Columbian Exchange through approximately 100 alphabetically arranged entries on animals, plants, diseases, and items that were exchanged, accompanied by sidebars throughout that provide interesting discussions of key people, companies, and other related topics. The work begins with an introductory essay that overviews the Columbian exchange and not only addresses its biological and cultural components but also treats it as a political and economic event. The alphabetically organized entries cover topics ranging from the African slave trade, almonds, and alpacas to watermelon, whooping cough, and yellow fever. The encyclopedia also offers a chronology of the major events of the Columbian Exchange, as well as 15 transcribed primary source documents that enable students to look into history directly, including passages about the exchange that focus on the Irish Potato Famine, the slave trade, and the influenza pandemic of 1918-1919.

**Food and World Culture** Linda S. Watts, Kelty Clark-Mahoney, 2022-08-23. This book uses food as a lens through which to explore important matters of society and culture. In exploring why and how people eat around the globe, the text focuses on issues of health, conflict, struggle, contest, inequality, and power. Whether because of its necessity, pleasure, or ubiquity, the world of food and its lore proves endlessly fascinating to most people. The story of food is a narrative filled with both human striving and human suffering. However, many of today's diners are only dimly aware of the human price exacted for that comforting distance from the lived world, realities of food justice struggles. With attention to food issues ranging from local farming practices to global supply chains, this book examines how food's history and geography remain inextricably linked to sociopolitical experiences of trauma connected with globalization, such as colonization, conquest, enslavement, and oppression. The main text is structured alphabetically around a set of 70 ingredients, from almonds to yeast. Each ingredient's story is accompanied by recipes. Along with the food profiles, the encyclopedia features sidebars. These are short discussions of topics of interest related to food, including automats, diners, victory gardens, and food at world's fairs. This project also brings a social justice perspective to its content, weighing debates concerning food access, equity, insecurity, and politics.

**Paxton's Magazine of Botany, and Register of Flowering Plants**, 1838 **Magazine of Botany and Register of Flowering Plants** Joseph Paxton, 1838 *Paxton's Magazine of Botany, and Register of Flowering Plants* Sir Joseph Paxton, 1838. Periodical devoted to the illustration in colour of new and uncommon plants grown in British gardens, although primarily horticultural in appeal, it contains the first descriptions of many new species.
