Monahan, 2016-04-01 In The Merchants of Siberia Erika Monahan reconsiders commerce in early modern Russia by reconstructing the trading world of Siberia and the careers of merchants who traded there She follows the histories of three merchant families from various social ranks who conducted trade in Siberia for well over a century These include the Filat evs who were among Russia s most illustrious merchant elite the Shababins Muslim immigrants who mastered local and long distance trade while balancing private endeavors with

service to the Russian state and the Noritsyns traders of more modest status who worked sometimes for themselves sometimes for bigger merchants and participated in the emerging Russia China trade Monahan demonstrates that trade was a key component of how the Muscovite state sought to assert its authority in the Siberian periphery The state's recognition of the benefits of commerce meant that Russian state and empire building in Siberia were characterized by accommodation in this diverse borderland instrumentality trumped ideology and the Orthodox state welcomed Central Asian merchants of Islamic faith This reconsideration of Siberian trade invites us to rethink Russia's place in the early modern world The burgeoning market at Lake Yamys' an inner Eurasian trading post along the Irtysh River illuminates a vibrant seventeenth century Eurasian caravan trade even as Europe Asia maritime trade increased By contextualizing merchants and places of Siberian trade in the increasingly connected economies of the early modern period Monahan argues that commercially speaking Russia was not the outlier that most twentieth century characterizations portrayed

AIDS and Ebola is always with us In Europe the most devastating plagues were those from the Black Death pandemic in the 1300s to the Great Plague of London in 1665 For the last 100 years it has been accepted that *Yersinia pestis* the infective

agent of bubonic plague was responsible for these epidemics This book combines modern concepts of epidemiology and molecular biology with computer modelling Applying these to the analysis of historical epidemics the authors show that they were not in fact outbreaks of bubonic plague Biology of Plagues offers a completely new interdisciplinary interpretation of the plagues of Europe and establishes them within a geographical historical and demographic framework This fascinating detective work will be of interest to readers in the social and biological sciences and lessons learnt will underline the implications of historical plagues for modern day epidemiology

Controlling Contagion Sheilagh Ogilvie, 2025-02-18

How human institutions markets states communities religions guilds and families have helped both to control and to exacerbate epidemics throughout history How do societies tackle epidemic disease In Controlling Contagion Sheilagh Ogilvie answers this question by exploring seven centuries of pandemics from the Black Death to Covid 19 For most of history infectious diseases have killed many more people than famine or war and in 2019 they still caused one death in four Today we deal with epidemics more successfully than our ancestors managed plague smallpox cholera or influenza But we use many of the same approaches Long before scientific medicine human societies coordinated and innovated in response to biological shocks sometimes well sometimes badly Ogilvie uses historical epidemics to analyse how human societies deal with externalities situations where my action creates costs or benefits for others beyond those that I myself incur Social institutions markets states communities religions guilds and families help us manage the negative externalities of contagion and the positive externalities of social distancing sanitation and immunization Ogilvie shows how each institution enables us to coordinate innovate and inspire each other to limit contagion But each institution also has weaknesses that can make things worse Markets shut down voluntarily during every epidemic in history but they also brought people together spreading contagion States mandated quarantines sanitation and immunization but they also waged war and censored information exacerbating epidemics Religions admonished us to avoid infecting our neighbours but they also preached against science and medical innovations What decided the outcome Ogilvie argues was a temperate state an adaptable market and a strong civil society where a diversity of institutions played to their own strengths and checked each other's flaws
