**Education in the 21st Century** Amanda Berry,Cathy Buntting,Deborah Corrigan,Richard Gunstone,Alister Jones,2022-01-31 This book explores a range of issues central to STEM and 21st Century education It explores research into the relationships between creativity critical thinking and STEM Education from both a theoretical and practical perspective It examines matters associated with three main concerns First is the ways some research and development that is labelled STEM appears to be essentially one of the specific individual components S T E or M with a new label rather than something going across and or beyond these more traditional components The second at times intertwining concern is the common ways in which school curriculum continues to hold separate disciplines as its core The third concern is that while cross curriculum goals are increasingly common in this century particularly for creativity and critical thinking it is also common that the goals remain only vaguely linked with the more usual components of the whole curriculum This book reflects on all three of these important concerns and the integrated whole that can result from them Monash University King s College London and Waikato University have now generated six edited books on successive related research issues of significance to contemporary science education Each of these books has been substantially shaped by a writing workshop involving all authors in intensive discussion about drafts of their contributions a process of great worth in its own right as well as for enhancing the value of the final volume and then each author reworking the contribution in the light of the discussions The seventh will extend beyond science education and explore a range of issues central to STEM and 21st Century education
