[Great Thinkers in 60 Minutes - Volume 1](#) Walther Ziegler,2017-03-09 Great Thinkers in 60 Minutes Volume 1 comprises the five books already published as separate volumes Plato in 60 Minutes Rousseau in 60 Minutes Smith in 60 Minutes Kant in 60 Minutes and Hegel in 60 Minutes Each short study sums up the key idea at the heart of each respective thinker and asks the question Of what use is this key idea to us today But above all the philosophers get to speak for themselves Their most important statements are prominently presented as direct quotations in speech balloons with appropriate graphics with exact indication of the source of each quote in the author s works This light hearted but nonetheless scholarly precise rendering of the ideas of each thinker makes it easy for the reader to acquaint him or herself with the great questions of our lives Because every philosopher who has achieved global fame has posed the question of meaning what is it that holds at the most essential level the world together There have emerged here a range of very different answers In Plato for example the Idea of the Good is that to which we need to open our souls in Rousseau it is rather only in our own original nature that we need to trust in Adam Smith it is in self interest which spurs on each individual and is finally transformed by an invisible hand into the common good in Kant it is the application of Reason which frees us and makes us capable of extraordinary moral actions and in Hegel finally everything is held together by the dialectical self development of the World Spirit which drives onward from epoch to epoch through the deeds of individuals and of nations until it has finally reached its great goal In other words the meaning of the world and thus of our own lives remains among philosophers a topic of great controversy One thing though is sure each of these five thinkers struck from his own perspective one brilliant spark out of that complex crystal that is the truth

The Quality of Practitioner Research, 2007-01-01 This book contains different perspectives on the quality of practitioner research or action research and focuses specifically on questions of the relation between the researcher and the field of the researched The collaborative characteristic of research by practitioners is seen by many as crucial for the better understanding and transformation of practices Those who are included in these practices are expected to be part of the research The distance between researcher and researched should therefore be small in fact this distance is absent when practitioners do research within their own field without the interference of researchers from outside the school This raises fundamental questions about the relationship between the researcher and the researched or the field of the researched The authors of this book share a concern about the popularity of uncritical and rather technical approaches to practitioner research or action research The book offers inspiring and thought provoking ideas to all involved in research by practitioners especially in education researchers and facilitators in the field of practitioner research action research and qualitative research teachers and other practitioners philosophers of education and postgraduate students Most chapters in the book are proceedings from the joint International Practitioner Research Conference and the Collaborative Action Research Network Conference 2005 in Utrecht the Netherlands organized by Fontys University dept of Inclusive Special Education and Leiden University Graduate School of Teaching ICLON
