Thus, this edition contains some 500 new articles by more than 400 authors from 25 countries in addition to the completely revised 1 500 articles from the first edition. Sanson, 2020-12-31 *Women in the History of Linguistics* is a ground breaking investigation into women's contribution to the description, analysis and codification of languages across a wide range of different linguistic and cultural traditions. Notably, the volume looks beyond Europe to Africa, Australia, Asia and North America, offering a systematic and comparative approach to a subject that has not yet received the scholarly attention it deserves. In view of women's often limited educational opportunities in the past, their impact is examined not only within traditional and institutional contexts but also in more domestic and less public realms. The chapters explore a variety of spheres of activity including the production of grammars, dictionaries, philological studies, critical editions and notes, and reflections on the nature of language and writing systems as well as women's contribution to the documentation and maintenance of indigenous languages, language teaching and acquisition methods, language debates and language use and policy. Attitudes towards women's language, both positive and negative, that regularly shape linguistic description and analysis are explored alongside metalinguistic texts specifically addressed to them as readers. *Women in the History of Linguistics* is intended for all scholars and students interested in the history of linguistics, women's studies, social and cultural history and the intersection between language and gender.
